Publications of the Newton Institute

Edited by H.K. Moffatt

Director, Isaac Newton Institute for Mathematical Sciences

The Isaac Newton Institute of Mathematical Sciences of the University of Cambridge exists to stimulate research in all branches of the mathematical sciences, including pure mathematics, statistics, applied mathematics, theoretical physics, theoretical computer science, mathematical biology and economics. The four six-month long research programmes it runs each year bring together leading mathematical scientists from all over the world to exchange ideas through seminars, teaching and informal interaction.

ACKNOWLEDGEMENTS

I would like to thank Chris Bishop for his help in setting up the workshop on on-line learning, to Renato Vicente for helping me with preparing the manuscript for publication, to Magnus Rattray for his helpful comments and to the participants of the workshop for their contribution to this book.

Finally, I would like to thank Christiane and Jonathan for their considerable patience.
