978-0-521-12512-3 - Partial Differential Equations and Fluid Mechanics

Edited by James C. Robinson and Jose L. Rodrigo

Table of Contents

[More information](#)

Contents

<i>Preface</i>	<i>page</i> ix
<i>List of contributors</i>	x
1 Shear flows and their attractors	
<i>M. Boukrouche & G. Lukaszewicz</i>	1
2 Mathematical results concerning unsteady flows of chemically reacting incompressible fluids	
<i>M. Bulíček, J. Málek, & K.R. Rajagopal</i>	26
3 The uniqueness of Lagrangian trajectories in Navier–Stokes flows	
<i>M. Dashti & J.C. Robinson</i>	54
4 Some controllability results in fluid mechanics	
<i>E. Fernández-Cara</i>	64
5 Singularity formation and separation phenomena in boundary layer theory	
<i>F. Gargano, M.C. Lombardo, M. Sammartino, & V. Sciacca</i>	81
6 Partial regularity results for solutions of the Navier–Stokes system	
<i>I. Kukavica</i>	121
7 Anisotropic Navier–Stokes equations in a bounded cylindrical domain	
<i>M. Paicu & G. Raugel</i>	146
8 The regularity problem for the three-dimensional Navier–Stokes equations	
<i>J.C. Robinson & W. Sadowski</i>	185
9 Contour dynamics for the surface quasi-geostrophic equation	
<i>J.L. Rodrigo</i>	207
10 Theory and applications of statistical solutions of the Navier–Stokes equations	
<i>R. Rosa</i>	228
