APSF. See Anesthesia Patient Safety Foundation
ARDS. See Acute Respiratory Distress Syndrome
Argatroban, 69
arrhythmias, 385–386
arteriovenous malformation (AVM), core clinical competency for,
246–250
intraoperative evaluation for,
247–249
for embolization, 249
for induced hypotension, 248
induction agents in, 248
IV access, 248
with monitors, 247–248
for oxygen desaturation, 248–249
ventilator settings, 248
postoperative management for,
249–250
for anaphylactoid reaction, 250
for blindness, 249–250
preoperative evaluation for,
246–247
lab studies in, 246
lack of patient cooperation in, 246
medication protocol in, 247
patient history in, 246
arthroplasty. See total knee arthroplasty, core clinical competency for
aspiration pneumonia, from aspiration of gastric contents into the lungs, 419
AVM. See arteriovenous malformation (AVM), core clinical competency for
awake intubation, clinical core competency for, 43–44
communication and interpersonal skills as, 43
inpatient care, 43
medical knowledge as, 43
of GERD, 43
patient care as, 43
communication as part of, 43
with other healthcare professionals, 43
practice-based learning and improvement as, 43–44
for submandibular abscess, 149–150
beta-blockers, 4
POISE study on, 4
bivalirudin, 69
blindness, from AVM, 249–250
blood banks. See aortic stenosis, core clinical competency for
blood transfusions, religious conflicts over, 427
breast biopsies, core clinical competency for, 79–81
communication and interpersonal skills as, 81
listening skills, 81
in patient care, 79
in team dynamics, 81
medical knowledge as, 80–81
of GERD, 80
patient care as, 79–80
communication skills as part of, 79
patient history for, 80
professionalism as, 81
broken catheters. See catheters, broken, competency for
bronchospasms, core clinical competency for, 65–67
communication and interpersonal skills as, 67
listening skills, 67
in patient care, 65
in team dynamics, 67
medical knowledge as, 66
application of sciences for, 66
critical analysis of, 66
patient care as, 65–66
communication skills as part of, 65
diagnostic and therapeutic interventions in, 65
with other health care professionals, 66
patient history for, 65
professionalism as, 66–67
lack of self-interest and, 66
cultural sensitivity and, 67
Brown-Sequard syndrome. See Brown-Sequard syndrome, core clinical competency for, 46–50
communication and interpersonal skills as, 49–50
listening skills, 49
in patient care, 46
in team dynamics, 49–50
medical knowledge as, 47–48
risk assessment in, 47
patient care as, 46–47
counseling as part of, 46
diagnostic and therapeutic interventions in, 47
information technologies as part of, 46
management plans for, 46–47
with other health care professionals, 47
patient history for, 46
performance of medical procedures for, 47
practice-based learning and improvement as, 48–49
from clinical study design, 48–49
evidence assimilation, 48
with information technologies, 49

from larger populations, 48  
 systematic methodology in, 48  
 professionalism as, 49  
 cultural sensitivity and, 49
