- Admission price equilibrium, 76-78, 102-3
 Admission prices, 100-101, 123
 Admission price system, 101-2
 defined, 76, 101
 Agents, 60-61, 101, 136
 Anonymous Lindahl price equilibrium, 103
 Anonymous Lindahl price system, 102-3
 Anonymous pricing in Tiebout economies, 89-120
 admission price equilibrium, 102-3
 admission prices, 101, 123
 admission price system, 101-2
 defined, 76, 101
 asymptotic constant returns to scale, 108-9
 core, 95-99
 emptiness of, 96-99
 crowding types, market games with, 113-16
 crowding types model, 94-95, 112-13
 differentiated crowding model, 92-94, 111-12
 equilibrium and prices, 99-105
 feasible state of the economy, 95
 jurisdictions, optimal size of, 105
 Lindahl price system, 100-103
 local public goods economies:
 crowding types model, 94-95
 models of, 91-95
 nondifferentiated/differentiated crowding models, 92-94
 nondifferentiated crowding model, 109-11
 per capita boundedness, 108
 strict small group effectiveness, 106-8
 Taste Anonymity in Consumption (TAC), 95
 Taste Anonymity in Production (TAP), 95
 Tiebout assumption six, 105-9
 uniform Tiebout equilibrium, 104
 uniform Tiebout price system, 104
 Anonymous Revelation Game (ARG), 149
Apartheid system, and factor integration, 333-34
 Asymptotic constant returns to scale, 108-9

 Benchmark case of global destination regime, 267-68
 Blocking opportunities, exhaustion of, 130, 132
 Boundedness, per capita, 108

 Capacity:
 added at fixed time intervals, 172-74
 continuous additions to, 165-67
 fixed increments in, 178-80
 intermittent capacity additions, 162, 171-80
 replacement, 174-75
 City formation, "slime mold" model of, 15-32
 Club, defined, 130
 Club economies:
 anonymous pricing in Tiebout economies, 89-120
 complementarities between private and club goods, 122
 decentralization in, 121-38
 defined, 130
 and existence problems, 135-36
 main feature of, 130
 Club structure, 130
 Club theory, basis of, 121
 Club type system, 131
 Coalition structure, 130
 Competitive equilibrium, 128-30
 and decentralization in club economies, 129-30
 defined, 128
 and First Welfare Theorem, 68-78
 equivalence of core/equilibrium outcomes, 72
 two-part equilibrium outcomes in core, 71-72
 wage/price-taking equilibrium for economies with collective goods, 69-72
 Conjectural prices, 126
 Consumption-based taxation, comparing, 312-13
 Continuous additions to capacity, 165-71
 depreciation/maintenance, 168-69
 irreversibility/adjustment costs, 169-71
 simplest case, 165-67
 Cost share equilibrium, 103
 Cross-border income shifting:
 behavior of multinationals with, 246-49
 optimal tax policy in home country, 250-52
 optimal tax policy in host country, 249-50
 tax policy with, 244-54

- Crowding types, market games with, 113-16
 Crowding types model, 94-95, 112-13
- Decentralization in club economies, 121-38
 club, defined, 130
 club economy:
 defined, 130
 main feature of, 130
 club structure, 130
 club type system, 131
 coalition structure, 130
 and competitive equilibrium, 129-30
 complementarities between private and public goods, 122-27
 decentralization, defined, 122
 efficient scale, 134-35
 equal-treatment core, 131
 "exhaustion of blocking opportunities," 130, 132
 existence, 135-36
 nonanonymous crowding, 121, 123
 and price systems, 129-35
 replication and optimal size, 127-29
 unreplicated club economy, 122
- Decentralized tax autonomy, 262-85
- Depreciation, as continuous addition to capacity, 168-69
- Destination- and origin-based taxation, 286-313
 consumption-based taxation, comparing, 312-13
 destination-based consumption tax, 294-96
 replacing by origin-based consumption taxes, 304-6
 investment system, 308-10
 log-linearized model, 308-10
 model, 289-94
 consumption and saving behavior, 290-92
 government, 293
 production and investment, 289-90
 solution, 294
 origin-based consumption tax, 302-4
 with foreign ownership, 304
 neutralizing distributional effects, 304
 without foreign ownership, 303
 origin-based production tax, 297-302
 effects on intergenerational distribution, 300-301
 effects on international distribution, 302
 efficiency effects, 299-300
 public budget constraint, 310-11
 saving system, 311-12
- Differentiated crowding model, 92-94, 111-12
- Domestic income shifting, 239-43
 optimal tax policy in home countries, 241-42
 optimal tax policy in host countries, 242-43
- Economic integration, 314-39
 and income redistribution, 325-27
 full insurance for the variable factor, 325-26
 partial insurance of variable input, 326-27
 and income risk, 322-29
 in absence of income redistribution policy, 322-24
- Efficient scale, 134-35
