 systemic arteries, 93, 250, 253  
 veins, 428, 433  
 wave speed, 276

wall thickness, 92, 250  
 aorta, 253, 255  
 arteriole, 346, 364  
 artery, 102, 250, 364  
 capillary, 367  
 large artery, 364  
 left ventricle, 204, 215  
 pulmonary artery, 473  
 small artery, 364  
 thin-walled vessels, 95  
 veins, 438  
 with age, 252

wave, 105  
 'a' wave, 186, 225, 443  
 amplitude, 304  
 area changes, 262  
 attenuation, 236, *see* wave damping  
 factor, 120  
 'c' wave, 443  
 compression, 235  
 damping, **116**, 278, 299, 447  
 depolarization, 183  
 effect of convective velocity, 297  
 effect of nonlinearity, 447  
 effect of taper, 295  
 effect of viscosity, **301**  
 elastic, 235  
 energy, 282

fast, 305  
 femoral artery, 301  
 Fourier analysis, 126, 266  
 front, 313  
 fundamental frequency, 267  
 harmonic frequencies, 267  
 high frequency, 445, 492  
 iliac junction, 297  
 impedance analysis, **338**  
 in capillaries, 376  
 in pulmonary arteries, 489  
 in veins, 440  
 in vena cava, 443, 447  
 incident, 121  
 large arteries, 274  
 length, *see* wavelength  
 longitudinal, 305  
 multiple reflections, 288  
 nonlinearities in veins, 447  
 'P' wave, 186  
 partial reflection, 122  
 period, 274  
 periodic, 126  
 pressure, 127, 261, **271**, 441  
 along arteries, 115  
 in veins, **441**  
 propagation, **271**

propagation  
 in arteries, **269**  
 in pulmonary arteries, **491**  
 in veins, **443**

pulse, 274, 285, 313, 330, 375, 496  
 reflected, 121, 275, 278, 283, 285, 291, 444  
 in arteries, 278–297  
 reflection coefficient, 282

reflection, **120**, 446  
 in veins, 445  
 partial, 284

repolarization ('P' wave), 184  
 resonance, 125  
 shear, 305  
 shock, *see* shock wave  
 simple, **112**  
 sinusoidal, 124, 300, 444  
 sound, 115, 235, 306  
 standing, 112, 116, 121  
 steepening, in veins, 447  
 stretched string, 113, 272  
 torsional, 305  
 transmitted, 122, 278, 446  
 travelling, 113 115, 120  
 'v' wave, 186, 225, 443  
 water, 115, 298

waveform  
 flow rate, harmonic content, 268  
 in pulmonary artery, 490  
 pressure, harmonic content, 268

wavefront, 114  
 wave speed, 114, 120, 236, 275, 304  
 aorta, 236, 277, 285, 298  
 determination of, **272**
