1 An introduction to risk, adventure and risk management 1

Tracey J. Dickson
Focus questions 1
Introduction 2
Risk, adventure and the outdoors 3
Why adventure and the outdoors? 4
A whole-of-organisation approach to risk management 7
Philosophy 9
People, equipment and environment 9
Social and political context 9
Child protection and the nanny state 10
The risk management process 13
Expanding the steps in the risk management process 17
Communicate and consult and monitor and review 21
Conclusion 21
References 21

2 Organisational sustainability and risk management 25

Brian Weir & Tracey J. Dickson
Focus questions 25
Introduction: what is sustainability? 25
Organisational sustainability and risk management 28
What is sustainability in an organisational sense? 29
How will we know our organisation is sustainable? 34
Some strategies to assist 36
Points for action for practitioners 39
References and further resources 40
## Contents

### 3 The legal context for outdoor activities and programs

*Lyn Ainsworth & Jon Heshka*

- Focus questions
- Introduction
- The concept of ‘reasonableness’
- Risk management standard AS/NZS/ISO 31000: 2009
- Work health and safety: statutory liability
- Key operational areas of responsibility
- Special characteristics of participants
- Obligations
- Reasonably practicable
- Penalties
- Relationship with civil liability
- Law of negligence: breach of duty of care
- Some other legal issues to consider
- Using the law to mitigate risk: civil liabilities legislation
- Recreational activities and dangerous recreational activities
- Risk management when something goes wrong
- Recent cases
- Points for action for practitioners
- References and further resources

### 4 The organisational context of risk management

*Tracey J. Dickson & Anne Terwiel*

- Focus questions
- Introduction
- Strategic management: an overview
- Accreditations and reviews
- Knowledge management and knowledge transfer
- Moving beyond strategic management
- Leadership and power
- Training, development and education
- Conclusion
- Points for action for practitioners
- References and further resources

### 5 The real physical risks: putting it into perspective

*Tracey J. Dickson*

- Focus questions
- Introduction
- Research on incidents in outdoor, adventure and sporting activities
- Overview of the available research
- Conclusion
- Points for action for practitioners
- References and further resources

### 6 Program design and activity selection

*Eric Brymer & Tonia L. Gray*

- Focus questions
- Introduction
# Program Evaluation

**Tonia L. Gray & James T. Neill**

## Focus questions

1. Introduction
1. Historical dimensions of program evaluation
1. Aspects of evaluation
1. What are the main approaches to program evaluation?
1. What steps are involved in program evaluation?
1. Common practices in program evaluation
1. Conclusion
1. Points for action for practitioners
1. References and further resources

## Risk Communication

**Clare Dallat**

## Focus questions

1. Introduction
1. Research insights
1. Practical applications for risk communicators
1. Conclusion
1. Points for action for practitioners
1. References and further resources

## Technology, Risk and Outdoor Programming

**James T. Neill & Tonia L. Gray**

## Focus questions

1. Introduction
1. What is technology?
1. Reasons for using technology in the outdoors
1. Types of technology in outdoor programming
1. Level of technology in outdoor programming
1. Technology, risk and safety
1. Technology becoming passé
1. Audio and video availability on mobile devices
1. Location tracking
1. Conclusion
1. References and further resources

## Severe Weather

**Paul Colagiuri**

## Focus questions

1. Introduction
Table of Contents

Severe weather events and the outdoor industry 186
Managing risks associated with severe weather 187
Severe weather events 191
Points for action for practitioners 200
References and further resources 202

11 Learning from injury surveillance and incident analysis 204

Tracey J. Dickson

Focus questions 204
Introduction 205
Are we safe? 206
Why investigate injuries and incidents? 207
Different paradigms 207
Injury surveillance 210
Accident and incident prevention 213
Gathering data 216
Environmental extremes 217
Incident and injury investigation and analysis 220
Organisational learning, learning organisations and knowledge management 223
Conclusion 224
Points for action for practitioners 224
Glossary of terms 225
References and further resources 226

Appendix: Examples of risk analyses 231
Index 238
