

## INDEX

- absorption of moisture, analogue of Newton's law of cooling, 312
  - — — by slab, 312
- admittance, indicial, definition of, 356
  - — of inductive circuit, 196
- aeroplane, action of elevator, 355
  - control, 355
  - equations of motion, 204
  - gun recoil on, 203
  - variation in vertical velocity, 355
- amplifier, audio frequency, 212
  - input impedance, 214
  - television, 233
- analogue, electrical, of heat flow in long rod, 239
  - — — — — in short rod, 241
  - thermal, of long submarine cable, 239
  - — of Ohm's law, 303
  - — of short submarine cable, 241
- analytic function, definition of, 9
- analytical continuation, 17, 48, 95, 108, 319 (prob. 8)
- angle range of  $z$  in asymptotic expansion, 107
- annealing of steel rod, 310
- Appendix I (modulus of definite integrals), 237
  - 2 ( $\sin \theta \geq 2\theta/\pi$ ,  $0 \leq \theta \leq \frac{1}{2}\pi$ ), 337
  - 3 (asymptotic formulae), 337
  - 4 (Mellin theorem, proof of), 341
  - 5 (transformation of contour), 346
  - 6 (inversion of  $p^*$  on  $Br_2$ ), 351
  - 7 (inversion of  $p^v$  on  $Br_1$ ,  $R(v) \geq 1$ ), 352
  - 8 (product theorem), 354
  - 9 (convergence of series), 357
  - 10 (short list of  $p$ -multiplied Laplace transforms), 361
- approximation,  $t$  large, theory of, 84, 119
  - — examples of, 99, 100
  - $t$  small, theory of, 82, 116
  - — examples of, 83, 84, 117, 118, 215, 222, 226, 356
- array for initial conditions function, 158
- arrival current in cable, formula for, 241
  - — — — graph of, 242
- artificial line for balancing cable, 242
- asymptotic expansion, 101, 106, 111, 277, 296, 321, 322, 337
  - — differentiation of, 339
  - — for erf  $x$ , 101
  - — for  $J_0(z)$ , 106

INDEX

- asymptotic expansion in cable problem, 111  
 — — in filter problem, 277  
 — — in loud speaker problem, 296  
 — — integration of, 339  
 — — smallest term of, 338
- attenuation coefficient, of cable, 249  
 — in loud speaker horn, 295
- automobile, heating of brake drums, 307
- barrier, when function has branch point, 19, 22, 24, 25, 69–76, 95, 110, 114, 117, 130, 273, 275, 291
- beams, deflexion of, 207
- Bessel function  $J_0(z)$ , asymptotic expansion of, 106  
 — — — — — of, angle range of phase  $z$  in, 107  
 — — — — — of, remainder in, 107  
 — — — transform of, 140, 364  
 — — — zeros of, 89, 281, 286 (see ref. 234, p. 216, for values)  
 — —  $J_0[\sqrt{t^2 - b^2}]$ , 292  
 — —  $J_1[\sqrt{t^2 - b^2}]$ , 292–5  
 — —  $J_2[\sqrt{t^2 - b^2}]$ , 293, 294  
 — —  $J_\nu(z)$ , contour integral for, 103  
 — — —,  $Y_\nu(z)$  definition of, 102  
 — — — differential equation for, 102  
 — — — transform of, 364  
 — — — transformation of contour integral for, 105  
 — —  $I_0(z)$ , 246, 284–7  
 — — — transform of, 140, 365  
 — —  $I_1(z)$ , 365 (put  $\nu = 1$ )  
 — —  $I_0[\sqrt{t^2 - b^2}]$ , 151, 248, 250  
 — —  $I_1[\sqrt{t^2 - b^2}]$ , 152, 250–2  
 — —  $I_\nu(z)$ , contour integral for, 105  
 — — — definition of, 104  
 — — — differential equation for, 104  
 — — — transform of, 365  
 — — — transformation of integral for, 105  
 — —  $K_0(z)$ , infinite integral for, 123  
 — —  $K_\nu(z)$ , definition of, 104  
 — — — differential equation for, 104
- $Br_1$ , the contour, definition of, 65  
 — equivalent contours, 66, 69, 72, 75  
 —  $Br_2$ , the contour, 70, 77  
 — — conditions for equivalence, 78
- brake drums of automobile, heating of, 307
- branch point, 12, 17–25, 68–75, 109, 113  
 — — phase change of  $z$  in relation to, 20, 21  
 — — principal, 19–21, 25
- Bromwich-Wagner integral, 66

- cable, characteristic or surge impedance of, 237
  - differential equation for, 237
  - signal shaping in, 244, 260
  - terminated by resistance  $\sqrt{L/C}$ , 255, 258
  - wave solution for, 254
  - with terminal apparatus, 253
- calculus of residues, 50
- capacitance, charging of, 161
- carrier wave in radio telephony, 325 (prob. 48)
- Cauchy-Riemann conditions, 9
- Cauchy's integral formula, 36
- Cauchy's theorem, 30
- cellular construction in loud speaker horn, 288
- characteristic impedance of transmission line, 237
- complementary function in solution of differential equation, 156
- complex integration, 27
- concentration gradient of moisture, 312
- condenser microphone, differential equation for, 234, 283
- conical horn loud speaker, transient in, 334
- continuity, definition of, 4
- contour,  $Br_1$ , 65
  - $Br_2$ , 70, 77
  - $Br'_2$ , 77
  - $Br_3$ , 126, 127, 349
  - equivalent, 66, 69, 72, 75
  - integral, differentiation of, 121
    - — for  $\cos t$ , 138
    - — for  $e^{at}$ , 138
    - — for  $\operatorname{erfc} x$ , 99
    - — for  $f(z)$ , at  $z = a$ , 35, 122
    - — for  $1/I(1 + \nu)$ , 94–6
    - — for  $J_\nu(z)$ , 103–5
    - — for  $I_\nu(z)$ , 104–6
    - — for  $\sin t$ , 138
- convergence of series, 357
- $\cos z$ , factors of, 14
- $\cosh z$ , factors of, 15
- critical damping of dynamical system, 160
- cut-off frequency of filter, 263, 265
  
- deflexion of beams, 207
- derivatives of  $f(z)$  at  $z = a$ , 35, 122
- differential coefficient, 7
  - equation, complementary function of, 156
  - — initial conditions, 154–9
  - — for cable transmission, 237
  - — for condenser microphone, 283
  - — for heat diffusion in cylinder, 231, 310

- differential equation for heat diffusion in slab, 299–307  
 — — for  $J_\nu(z)$ ,  $Y_\nu(z)$ ,  $H_\nu^{(1)}(z)$ ,  $H_\nu^{(2)}(z)$ , 102  
 — — for magnetic force in solenoid core, 279  
 — — simultaneous, 328 (prob. 63)  
 — — solution of ordinary, 154  
 — — — of partial, 229
- differentiation, 7  
 — under integral sign, 121, 250, 293  
 — of heat in long cylinder, 310  
 — — — in slab, 299–307
- diffusivity, 300
- divergent integral, 353  
 — series (asymptotic), 337
- dot, Morse code, 145, 198
- dumbbell contour, 72 (Fig. 25a), 73 (Fig. 26b), 275 (Fig. 91b), 291 (Fig. 96c)
- eddy currents, in solenoid core, 279
- elasto-viscosity, 330 (prob. 78)
- electrical artificial line for balancing cable, 242  
 — transmission line, 235  
 — — — surge impedance of, 237  
 — wave filter, 261  
 — — — attenuation in, 271  
 — — — frequency spectrum, 190  
 — — — high-pass type, 265  
 — — — low-pass type, 263  
 — — — quasi-distortionless type, 277 (footnote)  
 — — — sine input to, 271  
 — — — termination, 261
- equation, difference, 261  
 — of motion of aeroplane, 204
- equivalent contour, 66–9, 72, 78, 109, 113, 290
- erf  $x$ , definition of, 97  
 — — convergent series for, 98
- erfc  $x$ , definition of, 98  
 — — asymptotic expansion for, 101  
 — — contour integral for, 99
- error function integral, definition of, 97  
 — — graph of, 100
- essential singularity, definition of, 16, 43
- Euler's constant, definition of, 91
- evaluation of infinite real integrals, 61  
 — of residue at multiple pole, 57, 59, 60  
 — — — at simple pole, 51–9
- expansion of transform in convergent series, 138
- exponential function, contour integral for, 136  
 — — transform of, 136

exponential loud speaker horn, transient in, 292, 334

force, impulsive, 164–71

— — in pile driving, 168

forces acting on aeroplane, 204

Fourier expansion, obtained by transform procedure, 146

— — of  $|\sin t|$ , 147

— integral theorem, 178

— theorem, 177

— transform, 180

frequency spectrum, 181, 188, 189

— — of  $e^{-\alpha t}$ , 184

— — of  $e^{-\alpha t} \cos \omega_0 t$ , 185

— — of  $H(t)$ , 182

— — of  $I(t)$ , 183

— — of rectangular impulse, 182

— — of current in L.P. filter, 190

$f(t)$ , transform for finite interval of  $t$ , 145, 147, 149, 325 (prob. 46, 47),  
326 (prob. 51)

function, analytic, definition of, 9

— continuous, definition of, 4

— Heaviside's unit, *see under* Heaviside

— of complex variable, definition of, 3

— — — isometric plotting of, 5, 13

$f(z)$ , value at  $z = a$  expressed as contour integral, 35

gamma function, definition of, 91

— — contour integral for, 94

— — duplication formula for, 94

— — graph of, 93

— — real integral for, 93

Gaussian error function, 96

— integral, 96

gradient, concentration, of moisture, 312

gravity, acceleration due to, in Great Britain and U.S.A., 203

gun recoil on aeroplane, 203

gusts of wind, effect on aeroplane, 355

$G(x)$ , the function, 98

Hankel functions  $H_0^{(1)}(z)$ ,  $H_0^{(2)}(z)$ , asymptotic expansion of, 107

— — — — — angle range in, 107

— —  $H_\nu^{(1)}(z)$ ,  $H_\nu^{(2)}(z)$ , definition of, 102

— — — — — differential equation for, 102

heat, capacitance, definition of, 299

— diffusion in long cylinder, 310

— — in slab, 299

— flux, definition of, 299

— resistance, definition of, 299

- heating of automobile brake drums, 307  
 Heaviside's telegraph equation, 237  
   — unit function, definition of, 163  
   — — — integral representation of, 164  
 helical spring, long loaded, oscillation of, 115, 339  
 horn, conical loud speaker, 334  
   — exponential loud speaker, 288  
 hyperboloid of revolution (modular surface), 13  
  
 impedance of cable, surge or characteristic, 237  
   — — — transform of, 236  
 impulse, definition of, 164  
   — frequency spectrum of, 182, 183  
   — general theorem, 170  
   — generator, 329 (prob. 74)  
   — transform of rectangular, 166  
   — — of triangular, 165  
 inductance of solenoid with metal core, 281  
 infinite slab, heat diffusion in, 299  
 initial conditions for differential equation, 154, 157  
 integral, divergent, 121  
   — double, 122, 123  
 integration, by parts, 128–31  
   — changing order of, 123  
   — complex, 27  
   — round branch point, 67–76, 94, 110, 114, 130, 274, 292  
 inversion of transform, 136  
   — of  $p^{-\nu}$  on  $Br_1$ , 136  
   — of  $p^\nu$  on  $Br_1$ ,  $R(\nu) \geq 1$ , 352  
   — of  $p^n$  on  $Br_2$ , 351  
 isometric plotting of function, 5, 13  
 $I_0(t)$  transform of, 365  
 $I_0\{a\sqrt{(t^2 - b^2)}\}$ , contour integral for, 126, 151  
 $I_0[\sqrt{(t^2 - b^2)}]$ , transform of, 152  
 $I_1[a\sqrt{(t^2 - b^2)}]/\sqrt{(t^2 - b^2)}$ , transform of, 152  
 $I_\nu(z)$ , contour integral for, 105, 106  
   — — — transformation of, 105  
   — definition of, 104  
   — differential equation for, 104  
   — transform of, 365  
 iteration, of electrical mesh, 261, 262, 267, 270  
 iterative impedance of electrical wave filter, 262  
  
 $J_0(z)$ , asymptotic expansion for, 106  
   — — — angle range of  $z$ , 107  
   — transform of, 143, 364  
   — zeros of, 89, 281, 286  
 $J_0[\sqrt{(t^2 - b^2)}]$ , contour integral for, 292

- $J_0[\sqrt{(t^2 - b^2)}]$ , transform of, 363  
 $J_\nu(z)$ , contour integral for, 104  
 — — — — transformation of, 105  
 — definition of, 103  
 — differential equation for, 102  
 — transform of, 364
- $K_0(z)$ , infinite integral for, 123  
 $K_\nu(z)$ , definition of, 104  
 — differential equation for, 104
- Laplace integral, 136  
 — transform, 135
- Laurent's theorem, 41  
 — — application of, 43–6
- Laurent's expansion, principal part of, 43, 46, 319 (prob. 9)
- leakage current in cable, formula for, 247, 249
- leakage of cable, 235
- linear transformation of contour, 348 (§ 4)
- list of  $p$ -multiplied Laplace transforms, 361
- loaded cable, definition of, 245
- $\log z$ , branches of, 25
- loud speaker, conical horn, sound propagation in, 334  
 — — exponential horn, cellular construction of, 288  
 — — — — sound propagation in, 288  
 — — transient due to conical horn, 334  
 — — — due to exponential horn, 295
- Mellin inversion theorem, conditions for validity, 344, 345  
 — — — — proof of, 341  
 — — — — statement of, 135
- membrane of microphone, deflection of, 286–8  
 — — — modes of, 286
- microphone, condenser type, 283
- modular surface, isometric representation of, 5, 13
- modulation in radio telephony, 325 (prob. 48)
- Morse dot, 145, 176, 183, 199
- motor-generator, torsional oscillation of, 200
- multiple pole, definition of, 13, 43  
 — — evaluation of residue at, 57, 59, 60
- multi-valued function, 12–25
- Napierian logarithm, 25
- Newton's law of cooling, analogue of, 312
- 'normal curve' or Gaussian error function, 96
- Ohm's law, thermal analogue of, 303
- ordinary linear differential equation, 154
