## CONTENTS

*Preface to the Second Edition* page vii*Preface to the First Edition* ix

## PART I. THEORY OF COMPLEX VARIABLE

<i>Chapter</i> 1. Functions of a complex variable	3
2. Integration: Cauchy's theorem: Taylor's and Laurent's theorems	27
3. Calculus of residues	50
4. The Bromwich contour: equivalent contours: evaluation of integrals	65
5. Gamma, error and Bessel functions	91
6. Evaluation of $\frac{1}{2\pi i} \int_{B_r} \frac{e^{az} \phi(z) dz}{z}$ when $\phi(z)$ has branch points	109
7. Differentiation and integration under the integral sign	121

## PART II. THEORY OF TRANSFORM CALCULUS

<i>Chapter</i> 8. Mellin inversion theorem: transform theory	135
9. Solution of ordinary linear differential equations	154
10. Discontinuous functions: impulses: frequency spectra	163

## PART III. TECHNICAL APPLICATIONS OF PARTS I AND II

<i>Chapter</i> 11. Electrical circuits: vibrational systems: aeroplane dynamics: deflexion of beams	195
---	-----

## CONTENTS

<i>Chapter</i> 12. Radio and television receivers	<i>page</i> 212
13. Partial linear differential equations: electrical transmission lines: electrical wave filters	229
14. Solenoid with metal core: condenser microphone: loud speaker horn	279
15. Diffusion of heat: absorption of moisture	299
Problems to be worked out by the reader	317

## PART IV. APPENDICES AND LIST OF REFERENCES

<i>Appendix</i> 1. The modulus of a definite integral cannot exceed the product of the maximum modulus $M$ and the length of the path $l$	337
2. Proof that $\sin \theta \geq 2\theta/\pi$ when $0 \leq \theta \leq \frac{1}{2}\pi$	337
3. Asymptotic series	337
4. The Mellin inversion theorem	341
5. Transformation of contour	346
6. Inversion of $p^n$ on $Br_2$ , $n \geq 1$	351
7. Inversion of $p^\nu$ on $Br_1$ when $R(\nu) \geq 1$	352
8. The product theorem	354
9. Convergence of infinite series	357
10. Short list of $p$ -multiplied Laplace transforms	361
<i>References.</i> A. Scientific papers	366
B. Books	375
C. Additional	376
<i>Index</i>	379
