  recolonisation of grey wolf 558, 568–575
Switzerland, debt for nature swaps (DfNSs) and 39

Tanganyia sardine 149
Tano, K. 635
Tanzania, invasive species in 148
tariffs 240
  invasive species and 152–153
taxation
  agriculture 151
  invasive species and 154
Taylor, M. S. 207, 218, 219, 222, 231, 233, 235, 247
technology subsidies, loss of biodiversity and 265–266
terms of trade 260–261
Thailand, shrimp farm expansion and mangrove loss 73–86
threatened species 531, 532
timber trade 205, 206, 207
Toman, M. 47
tradable permits, invasive species and 153
trade *see* international trade
traditional knowledge (TK) 417–421, 432–439
transfer rewards 494
travel cost method (TCM) of valuation 313, 317–319, 321–332
treaties 33
  on biodiversity conservation 22, 23
Trichopus zeylanicus 420, 428–432, 441
Turpie, J. K. 149
Tyran, J. R. 489

Uganda, genetic diversity in 632
Ukraine, recolonisation of native species 558
umbrella species 348
under-funding 29–30
United Kingdom
  invasive species in 147
  nature conservation on private land 393
  Treasury 'Green Book' 344
  valuation of biodiversity in 352, 353–359
    choice experiments 355–359
    discussion 362–364
    important aspects of biodiversity to people 353–355
    results of study 359–362
  willingness to pay in 36, 44
United Nations
  Environment Programme (UNEP) 59
  Food and Agriculture Organisation (FAO) 624
  Global Environment Facility (GEF) 40–43
United States of America
  deer hunting in 318
  invasive species in 141, 145, 147, 157
  nature conservation on private land 392
  property prices 46
  recolonisation of native species 558
  spatial interactions (neighbour effects) 93
  Willamette Basin study of conservation in working landscape 502, 509–519
    biological model 509–510
    economic model 510–511
    landscape 512–513
    results of study 514–516
    simulation experiments 513–514
  willingness to pay in 36
US–Singapore Free Trade Agreement 144
user rights 85
utility maximisation 252–253

value and valuation
  assessment of value of agricultural biodiversity using data enrichment method 594–597, 617
    choice experiment data 601–603
    data collection 599–605
    econometric analysis 606–616
    farm household data 604–605
    rationale for data enrichment by combining revealed and stated preference data 597–599
    theoretical framework 605–606
  biodiversity 7–13, 343–345, 364–365
    choice experiments and *see* choice experiments in biodiversity valuation
    concepts 8–10
    contribution of species 347–349
    economic value 349–353
    equality of species 346–347
