Preface

For many, single best answer (SBA) questions represent a novel mode of testing, and with new concepts often come concern and anxiety. The best way to alleviate these feelings is through familiarisation and preparation.

Working through large textbooks can be laborious and time-consuming, and can often leave one feeling that they have achieved very little. What's needed is a book that provides the FRCR candidate with a breadth of knowledge through a myriad of examination practice questions that are supported with concise yet accurate answers.

This is where this book excels!

With 360 'life-like' examination questions which cover the key concepts of each of the six Part 2A modules, this book is a must for all FRCR candidates. New modalities and their increasing role in the management of patients are addressed. What's more, because each question encompasses a new radiological scenario and is accompanied by reasoned answers, the reader is quickly left with a sense of achievement during their exam revision.

This book is perfect for 'sneaking' revision into busy working lives and for those candidates who demand more, the references that accompany the answers permit further knowledge acquisition.

An abundance of practice questions and detailed answers with references! This book is an essential FRCR revision companion.

Introduction

Congratulations on passing the FRCR Part 1!

Now for Part 2A: six modules of single best answer (SBA) questions. Don't panic! Remember lots of candidates pass every year, so success is achievable.

We found the best way to pass was to practise, practise and practise mock questions. Unfortunately, many books pose irrelevant questions, or offer little in the way of answers or explanation. This contradicts the purpose of a revision book, which is meant to help avoid the laborious task of sifting through countless textbook pages.

With these failings in mind, we have written a book which covers the relevant information of all six modules and provides concise yet informative referenced answers.

Go on, test yourself! Start now and never look back. Success is just around the corner. Good luck!
