<tr>
<td>1</td>
<td>The Case: The man whose antidepressants stopped working</td>
<td>Do depressive episodes become more difficult to treat and more recurrent over time?</td>
<td>When can you stop antidepressant treatment and what do you do if medications that worked in the past no longer work?</td>
</tr>
<tr>
<td>2</td>
<td>The Case: The son who would not take a shower</td>
<td>Will a 32-year-old man with an 18-year history of psychotic disorder ever be able to live on his own?</td>
<td>How can aging parents no longer with the health or the means to support an adult patient with a serious mental illness move their son towards independence without decompensating his psychotic illness or making him homeless?</td>
</tr>
<tr>
<td>3</td>
<td>The Case: The man who kept hitting his wife over the head with a frying pan</td>
<td>How do you treat aggressive behavior in a patient with early Alzheimer's Disease?</td>
<td>Can Alzheimer patients ever be treated with black box antipsychotics?</td>
</tr>
<tr>
<td>4</td>
<td>The Case: The son who would not go to bed</td>
<td>What do you do when SSRIs and behavioral therapy fail to reverse disability in OCD for more than 19 years?</td>
<td>How to improve quality of life for a patient with treatment resistant OCD still living at home?</td>
</tr>
<tr>
<td>5</td>
<td>The Case: The sleepy woman with anxiety</td>
<td>How can you be anxious and narcoleptic at the same time?</td>
<td>Finding an effective regimen for recurrent, treatment resistant anxious depression while juggling complex treatments for sleep disorder.</td>
</tr>

|      | The Question: Are the complaints of a 63-year-old woman with a complex set of psychiatric conditions due to incomplete recovery, or to SSRI induced apathy?  
|      | The Dilemma: How to have your cake and eat it, too: namely, remission from psychiatric disorders yet no drug-induced cognitive side effects |
| 7    | The case of physician do not heal thyself |
|      | The Question: Does the patient have a complex mood disorder, a personality disorder or both?  
|      | The Dilemma: How do you treat a complex and long-term unstable disorder of mood in a difficult patient? |
| 8    | The son whose parents were desperate to have him avoid Kraepelin |
|      | The Question: Can you forecast whether an adolescent will become bipolar, schizophrenic or recover?  
|      | The Dilemma: Should you treat symptoms empirically when the diagnosis changes every time the patient come for a visit? |
| 9    | The soldier who thinks he is a “slacker” broken beyond all repair after 3 deployments to Iraq |
|      | The Question: Are his back injury and PTSD going to end his military career?  
|      | The Dilemma: Is polypharmacy with 14 medications including multiple opiates, tranquilizers and psychotropics the right way to head him towards symptomatic remission? |
| 10   | The young man everybody was afraid to treat |
|      | The Question: How can you be confident about the safety of combining antihypertensive medications for serious hypertension with psychotropic drugs for serious depression in a patient with a positive urine screen for amphetamine?  
|      | The Dilemma: Which antidepressants can you use? |
| 11   | The young woman whose doctors could not decide whether she has schizophrenia, bipolar disorder or both |
|      | The Question: Is there a such thing as schizoaffective disorder?  
|      | The Dilemma: Does treatment depend upon whether the diagnosis is schizophrenia, bipolar disorder or schizoaffective disorder? |
| 12   | The scary man with only partial symptom control on clozapine |
|      | The Question: How to manage breakthrough positive symptoms as well as chronic negative symptoms in a 48-year-old psychotic patient with a history of homicide and suicide attempts?  
|      | The Dilemma: What do you do when even clozapine does not work adequately? |
Contents

13 The Case: The 8-year-old girl who was naughty 133
   The Question: Do girls get ADHD?
   The Dilemma: How do you treat ADHD with oppositional symptoms?

14 The Case: The scatter-brained mother whose daughter has ADHD, like mother, like daughter 151
   The Question: How often does ADHD run in families?
   The Dilemma: When you see a child with ADHD, should you also evaluate the parents and siblings?

15 The Case: The doctor who couldn’t keep up with his patients 167
   The Question: Is cognitive dysfunction following a head injury due to traumatic brain injury or to depression?
   The Dilemma: How can treatment improve his functioning at work?

16 The Case: The computer analyst who thought the government would choke him to death 175
   The Question: Can you tell the difference between schizophrenia, delusional disorder and obsessive compulsive disorder?
   The Dilemma: What do you do when antipsychotics do not help delusions?

17 The Case: The severely depressed man with a life insurance policy soon to lose its suicide exemption 185
   The Question: Is unstable depression without mania or hypomania a form of unipolar depression or bipolar depression?
   The Dilemma: Do mood stabilizers work for patients with very unstable mood even if the patient has no history of mania or hypomania?

18 The Case: The anxious woman who was more afraid of her anxiety medications than of anything else 201
   The Question: Is medication phobia part of this patient’s anxiety disorder?
   The Dilemma: How do you treat a patient who has intolerable side effects with every medication?

19 The Case: The psychotic woman with delusions that no medication could fix 209
   The Question: How can you weigh severe side effects with therapeutic benefits of clozapine plus augmentation in a severely ill patient?
   The Dilemma: Is it possible for a patient to have better functioning even though treatment does not help her delusions?

20 The Case: The breast cancer survivor who couldn’t remember how to cook 223
   The Question: What is chemobrain?
   The Dilemma: Can you treat cognitive dysfunction following chemotherapy for breast cancer?

| 21          | The woman who has always been out of control | The Question: How do you treat chaos?  
The Dilemma: What can you expect from an antipsychotic in a woman with many problems and diagnoses? |
| 22          | The young man with alcohol abuse and depression like father, like son; like grandfather, like father; like great grandfather, like grandfather | The Question: How can you help a young man who denies his alcoholism and depression?  
The Dilemma: Why do so few psychopharmacologists treat addictive disorders with approved medications? |
| 23          | The woman with psychotic depression responsive to her own TMS machine | The Question: What do you do for TMS responders who need long-term maintenance?  
The Dilemma: Finding simultaneous medication treatments to supplement TMS for her psychosis, confusion and mood disorder when ECT and clozapine have failed |
| 24          | The boy getting kicked out of his classroom | The Question: What is pediatric mania?  
The Dilemma: What do you do for a little boy with a family history of mania and who is irritable, inattentive, defiant and aggressive? |
| 25          | The young man whose dyskinesia was prompt and not tardive | The Question: What is the cause of a profound and early onset movement disorder in a young man who just started a second generation atypical antipsychotic?  
The Dilemma: How do you treat the psychotic illness without making the movement disorder worse? |
| 26          | The patient whose daughter wouldn’t give up | The Question: Is medication treatment of recurrent depression in an elderly woman worth the risks?  
The Dilemma: Should remission still be the goal of antidepressant treatment if it means high doses and combinations of antidepressants in a frail patient with two forms of cancer and two hip replacements? |
| 27          | The psychotic arsonist who burned his house and tried to burn himself | The Question: How to keep an uncooperative 48-year-old psychotic man with menacing behavior under behavioral control  
The Dilemma: What can you do after you think you have blocked every dopamine receptor and cannot give clozapine? |
28 The Case: The woman with depression whose Parkinson’s disease vanished
The Question: Can state dependent parkinsonism be part of major depressive disorder?
The Dilemma: How to diagnose and treat with simultaneous antidepressants and anti-parkinsonian drugs?

29 The Case: The depressed man who thought he was out of options
The Question: Are some episodes of depression untreatable?
The Dilemma: What do you do when even ECT and MAOIs do not work?

30 The Case: The woman who was either manic or fat
The Question: Will patients be compliant with effective mood stabilizers that cause major weight gain?
The Dilemma: Can you find a mood stabilizer that does not cause weight gain or a medication that blocks the weight gain of the mood stabilizer?

31 The Case: The girl who couldn’t find a doctor
The Question: How aggressive should medication treatment be in a child with an anxiety disorder?
The Dilemma: Can you justify giving high dose benzodiazepines plus SSRIs to a 12-year-old?

32 The Case: The man who wondered if once a bipolar always a bipolar?
The Question: Is antidepressant induced mania real bipolar disorder?
The Dilemma: Can you stop mood stabilizers after 7 years of stability following one episode of antidepressant induced mania without boarding a 2 year roller coaster of mood instability?

33 The Case: Suck it up, soldier, and quit whining
The Question: What is wrong with a soldier returning from his deployment in Afghanistan?
The Dilemma: Is it traumatic brain injury, PTSD or post-concussive syndrome, and how do you treat him?

34 The Case: The young man who is failing to launch
The Question: What is the underlying illness and when can you make a long term diagnosis?
The Dilemma: What can you do for a young adult on a tragic downhill course of social and cognitive decline?

35 The Case: The young cancer survivor with panic
The Question: Why is this patient resistant to medication treatments?
The Dilemma: How aggressive should psychopharmacological treatment be in terms of dosing and duration of drug treatment for panic?
Contents

36 The Case: The man whose antipsychotic almost killed him 409
 The Question: How closely should you monitor atypical antipsychotic augmentation in a type 2 diabetic with treatment resistant depression?
 The Dilemma: Can you rechallenge a patient with an atypical antipsychotic for his highly resistant depression when he developed hyperglycemic hyperosmotic syndrome on the medication the last time he took it?

37 The Case: The painful man who soaked up his opiates like a sponge 417
 The Question: What do you do for a complex chronic pain patient whose symptoms progress despite treatment?
 The Dilemma: How far can medications go to treat chronic pain?

38 The Case: The woman with an ever fluctuating mood 437
 The Question: Where does her personality disorder end and where does her mood disorder begin?
 The Dilemma: Can medication work for mood instability of a personality disorder?

39 The Case: The psychotic sex offender with grandiosity and mania 451
 The Question: How to stabilize an assaultive patient with deviant sexual fantasies not responsive to standard doses of antipsychotics and mood stabilizers?
 The Dilemma: Should heroic doses of quetiapine be tried when standard doses give only a partial response?

40 The Case: The elderly man with schizophrenia and Alzheimer’s disease 457
 The Question: How do you treat a patient with schizophrenia who is poorly responsive to antipsychotics and then develops Alzheimer’s dementia?
 The Dilemma: Can you give an antipsychotic for one disorder when this is relatively contraindicated for another disorder in the same patient at the same time?
