NEW DIMENSIONS IN PRIVACY LAW

This broad-ranging examination of privacy law considers the challenges faced by the law in changing technological, commercial and social environments. It encompasses three overlapping areas of analysis: privacy protection under the general law; legislative measures for data protection in digital communications networks; and the influence of transnational agreements and other pressures toward harmonised privacy standards. Leading, internationally recognised authors discuss developments across these three areas in the United Kingdom, Europe, the United States, APEC (the forum for Asia-Pacific Economic Cooperation), Australia and New Zealand. Chapters draw on doctrinal and historical analysis of case law, theoretical approaches to both freedom of speech and privacy, and the interaction of law and communications technologies, in order to examine present and future challenges to law's engagement with privacy.

ANDREW T. KENYON is the Director of the Centre for Media and Communications Law at the University of Melbourne, and Associate Professor in the Faculty of Law. He researches in comparative media law, across topics in defamation, privacy, journalism, media regulation and copyright. These interests come together in his role as editor of the refereed international journal, the *Media & Arts Law Review*.

MEGAN RICHARDSON is the Deputy Director of the Centre for Media and Communications Law at the University of Melbourne, and Associate Professor in the Faculty of Law. Her research spans the fields of intellectual property and privacy.

PREFACE

It has been a tremendous pleasure to work with leading academic and judicial figures from five countries in producing this collection which addresses issues in UK, European, US, Australian, New Zealand and Asian privacy law. This project began with an Australian Research Council discovery grant on privacy and the internet, awarded to Sam Ricketson, Megan Richardson and Lesley Hitchens, and then took on a life of its own. A series of public seminars on 'Privacy: New Issues and Policies' was presented under the auspices of the CMCL – Centre for Media and Communications Law – at the University of Melbourne during 2003 and 2004. We are grateful to the Law School and the sponsors of the CMCL for their support of the events, and to the administrative staff at the CMCL who make such seminars run so smoothly.

After the seminar series, we commissioned further chapters to increase the collection's breadth and depth, as well as developing all the chapters with their authors. Thanks to Cambridge University Press for their enthusiastic support for this publication as well as to two anonymous referees who gave some most helpful insights and suggestions on our original proposal. We also appreciate the contributions of Martin Vranken, in translating the chapter by Yves Poulet and Marc Dinant, and of Kate MacNeill and Jason Bosland at the CMCL for their assistance during the editing phase. Above all, thanks to the authors for their thoughtful chapters and careful revisions, and for their thorough engagement with the project throughout.
