The development of agriculture has often been described as the most important change in all of human history. Volume II of The Cambridge World History explores the origins and impact of agriculture and agricultural communities, and also discusses issues associated with pastoralism and hunter-fisher-gatherer economies. To capture the patterns of this key change across the globe, the volume uses an expanded timeframe from 12,000 BCE to 500 CE, beginning with the Neolithic and continuing into later periods. Scholars from a range of disciplines, including archaeology, historical linguistics, biology, anthropology, and history, trace common developments in the more complex social structures and cultural forms that agriculture enabled, such as sedentary villages and more elaborate foodways, and then present a series of regional overviews accompanied by detailed case studies from many different parts of the world, including Southwest Asia, South Asia, China, Japan, Southeast Asia and the Pacific, sub-Saharan Africa, the Americas, and Europe.

Graeme Barker is Emeritus Disney Professor of archaeology, Senior Fellow of the McDonald Institute for Archaeological Research, and Professorial Fellow, St John’s College at the University of Cambridge. He is the author of The Agricultural Revolution in Prehistory and Prehistoric Farming in Europe (Cambridge University Press, 1985).

Candice Goucher is a professor of history at Washington State University. With Linda Walton, she published several world history textbooks, including the second edition of World History: Journeys from Past to Present, and was co-lead scholar on the multimedia project Bridging World History.
The Cambridge World History is an authoritative new overview of the dynamic field of world history. It covers the whole of human history, not simply history since the development of written records, in an expanded timeframe that represents the latest thinking in world and global history. With over two hundred essays, it is the most comprehensive account yet of the human past, and it draws on a broad international pool of leading academics from a wide range of scholarly disciplines. Reflecting the increasing awareness that world history can be examined through many different approaches and at varying geographic and chronological scales, each volume offers regional, topical, and comparative essays alongside case studies that provide depth of coverage to go with the breadth of vision that is the distinguishing characteristic of world history.

## Contents

*List of figures*  xi  
*List of maps*  xxi  
*List of tables*  xxiii  
*List of contributors*  xxv  
*Preface*  xxvii

1 · Introduction: a world with agriculture  
Graeme Barker and Candice Goucher

2 · Archaeogenetics  
Maria Pala, Pedro Soares, Gyaneshwer Chaubey, and Martin B. Richards

3 · Agricultural origins: what linguistic evidence reveals  
Christopher Ehret

4 · What did agriculture do for us? The bioarchaeology of health and diet  
Charlotte Roberts

5 · Communities  
Amy Bogaard

6 · Pastoralism  
Alan K. Outram

7 · Agriculture and urbanism  
Daphne E. Gallagher and Roderick J. McIntosh
Contents

8 · Early agriculture in Southwest Asia 210
   ALAN H. SIMMONS

9 · ‘Ain Ghazal, Jordan 243
   GARY O. ROLLEFSON

10 · Early agriculture in South Asia 261
     ELEANOR KINGWELL-BANHAM, CAMERON A. PETRIE, AND DORIAN Q. FULLER

11 · Mehrgarh, Pakistan 289
     CAMERON A. PETRIE

12 · Early agriculture in China 310
     XINYI LIU, DORIAN Q. FULLER, AND MARTIN JONES

13 · Xinglonggou, China 335
     XINYI LIU, ZHIJUN ZHAO, AND GUOXIANG LIU

14 · Early agriculture in Japan 353
     SIMON KANER AND KEN’ICHI YANO

15 · The Nara basin paddies, Japan 387
     KEN’ICHI OKADA (TRANSLATED BY SIMON KANER)

16 · Early agriculture in Southeast Asia and the Pacific 411
     HUW BARTON

17 · Swamp cultivators at Kuk, New Guinea 445
     TIM DENHAM

18 · Early agriculture in sub-Saharan Africa to c. 500 CE 472
     PAUL J. LANE

19 · The Tichitt tradition in the West African Sahel 499
     KEVIN C. MACDONALD

20 · Early agriculture in the Americas 514
     DEBORAH M. PEARSELL
Contents

21 · Nanchoc valley, Peru  539
  TOM D. DILLEHAY

22 · Early agricultural society in Europe  555
  ALASDAIR WHITTLE

23 · Pioneer farmers at Brześć Kujawski, Poland  589
  PETER BOGUCKI AND RYSZARD GRYGIEL

Figures

2.1 Synthetic map of the first principal component of variation in ninety-five classical genetic markers (from L.L. Cavalli-Sforza et al., *The History and Geography of Human Genes*, © 1994 by Princeton University Press) 32

2.2 Plot of the age ranges of the major mitochondrial DNA founder clusters in Europe, inferred from a founder analysis of control-region sequences (after M. Richards et al., ‘Tracing European founder lineages in the Near Eastern mtDNA pool’, *American Journal of Human Genetics*, 67 (2000), 1251–76), and accounting for three quarters of the variation in Europeans 33

2.3 Genome-wide SNP *ADMIXTURE* analysis of global populations 39

2.4 Frequencies of mtDNA haplogroups based on ancient DNA from Europe, with comparative contemporary data (April 2014) from the same regions 45

3.1 Nilo-Saharan linguistic stratigraphy 61

3.2 Nilo-Saharan family tree: new subsistence lexicon, from proto-North Sudanic to proto-Sahelian periods 66

3.3 The family tree of the early stages of Cushitic divergence 69

3.4 The Niger–Congo family tree 72

4.1 Example of bone formation on tibia (lower leg bone) 100

4.2 Example of bone destruction in vertebrae 101

4.3 Dental caries in first permanent molar tooth 108

4.4 Cribra orbitalia in orbit 112

4.5 Rib with new bone formation on it 114

4.6 Normal vertebra (left) and one with a healed fracture to the spinous process (‘clay-shoveller’s fracture’) 115

4.7 Enthesal changes (new bone formation in form of a spur) to end of ulna (forearm bone) 116

4.8 Femur (thigh bone) with circumscribed area of destruction (Allen’s fossa), possibly related to ‘activity’ 118

4.9 Enamel hypoplasia in teeth (lines/grooves) 120

5.1 Gilgal I, Jordan valley: (a) general site plan (after O. Bar-Yosef et al. (eds.), *Gilgal: Early Neolithic Occupations in the Lower Jordan Valley; The Excavations of Tamar Noy* (Oxford: Oxbow Books, 2010), fig. 2.1); (b) Locus 11, which contained concentrations of flint (black) in the southeast part of the room and multiple baskets (BSK) from which a distinct lithic toolkit and a store of unprocessed wild
barley and oats had spilled onto the floor (after Bar-Yosef et al., Gilgal, fig. 2.14); the floor assemblage also included figurines, a charred post-socket and a charred beam or post 131

5.2 Göbekli Tepe, southeast Turkey: (a) aerial view of the main excavation area (photo N. Becker © DAI); (b) Pillar 43 in Enclosure D is one of the most richly decorated (photo K. Schmidt © DAI) 133

5.3 Reconstructed MPNNB house, Tell Halula, Syria, showing subfloor burials and rooms at the back for storage (from I. Kuijt et al., ‘The changing Neolithic household: household autonomy and social segmentation, Tell Halula, Syria’, Journal of Anthropological Archaeology, 30 (2011), 502–22, fig. 4, reprinted by permission of Elsevier) 135

5.4 Hornstaad-Hörnle, Lake Constance, southwest Germany: (a) plan of the excavated area with distribution of tool types; (b) inset of whole site plan and reconstructed house; (c) charred cereal ears from household stores (after Schlichtherle 1995: figs. 2, 3; B. Dieckmann et al., ‘Hornstaad – Zur inneren Dynamik einer jungneolithischen Dorfanlage am westlichen Bodensee’, in A. Lippert et al. (eds.), Mensch und Umwelt während des Neolithikums und der Frühbronzezeit in Mitteleuropa (Rahden: Marie- Leidorf, 2001), fig. 19; U. Maier, ‘Archäobotanische Untersuchungen in der neolithischen Ufersiedlung Hornstaad-Hörnle IA am Bodensee’, in U. Maier and R. Vogt (eds.), Siedlungsarchäologie in Alpenverland, vol. v: Botanische und pedologische Untersuchungen zur Ufersiedlung Hornstaad-Hörnle IA. (Stuttgart: Konrad Theiss, 2001), Plate 5) (photo reproduced with the permission of the Landesamt für Denkmalpflege im Regierungspräsidium, Stuttgart) 139

5.5 The chambered long cairn at Hazleton North, Gloucestershire, UK: (a) plan (after A. Saville, Hazleton North: The Excavation of a Neolithic Long Cairn of the Cotswold-Severn Group (London: English Heritage, 1990)); (b) disarticulated human remains in the south chamber (A. Whittle, Europe in the Neolithic (Cambridge University Press, 1996), fig. 7.10) 143

5.6 Early paddy-field systems at Chuodun, lower Yangtze, China: (a: plan; (b) paddy-field unit showing connecting canals (after D.Q. Fuller and L. Qin, ‘Water management and labour in the origins and dispersal of Asian rice’, World Archaeology, 41 (2009), fig. 3 and plate 2, reprinted by permission of Taylor & Francis Ltd) 147

5.7 (a) Dry-fields and adjacent houses of the Chulmun period at the Pyeonggeodong site, Jinju, South Gyeongsang province, South Korea (courtesy of Mr Ho-Pil Yun, Chief Researcher, Historical and Archaeological Center, Gyeongnam Development Institute); (b) plan of dry-field areas and associated houses, hearths, and pit features of the Mumun period, Daepyeong I, Jinju, South Gyeongsang province, South Korea (courtesy of Mr Ho-Pil Yun and Dr G.-A. Lee, University of Oregon) 149

5.8 Dolmen cluster at San 125, Osang-ri village, Naega-myeon subcounty, Gyeonggi province, South Korea (photo by Sunwoo Kim) 151
List of figures

5.9 Reconstruction of the ‘public building’ (Structure 6) at San José Mogote, Oaxaca, Mexico (reprinted by permission of the publisher from K.V. Flannery and J. Marcus, *The Creation of Inequality: How Our Prehistoric Ancestors Set the Stage for Monarchy, Slavery and Empire*, 140 (Cambridge, MA: Harvard University Press, 2012)) 153

5.10 (a) Plan of the SU site, Mogollon mountains (courtesy of the Field Museum, A88136); (b) plan of Shabik’eshchee Village, Chaco Canyon, New Mexico (courtesy of National Park Service, Chaco Culture National Historical Park, CHCU 65708) 155

8.1 View of the Round Tower at Jericho, 8000 BCE (photo: Israel/Ancient Art and Architecture Collection Ltd/Bridgeman Images) 223

8.2 One of the carved columns from Göbekli Tepe (from A.H. Simmons, *The Neolithic Revolution in the Near East: Transforming the Human Landscape* (Tucson: University of Arizona Press, 2007)) 225

8.3 PPNB architecture at Ghwair I, southern Jordan (photo by Alan H. Simmons) 226

8.5 Cypro-PPNB ’Ais Giorkis, Cyprus (photo by Alan H. Simmons) 237

9.1 Schematic plan of excavated units at ’Ain Ghazal on the western (top) and eastern banks of the Wadi Zarqa (Zarqa River) (drawing by G. Rollefson based on earlier versions by A. Omari and M. Bataineh) 244

9.2 A late Yarmoukian tent foundation, a remnant of a visit to ’Ain Ghazal by sheep/goat pastoralists (photo by Y. Zo’bi) 246

9.3 The western room of an MPPNB house from the Central Field at ’Ain Ghazal (photo by C. Blair) 248

9.4 The ground floor of a two-storey building that caught fire and was thoroughly destroyed in the later LPPNB period (photo by Y. Zo’bi) 249

9.5 (a) A PPNC ‘corridor building’ (photograph by C. Blair); (b) a Yarmoukian ‘longhouse’ (photo by Y. Zo’bi) 251

9.6 (a) An MPPNB subfloor burial whose skull was removed, and the body then recovered with dirt and a new plaster floor (photo by C. Blair); (b) a ‘trash burial’ from the later MPPNB period (photo by B. Byrd) 253

9.7 MPPNB skull from ’Ain Ghazal showing the delicate modelling of the plaster coating (photo by H. Wada) 255

9.8 (a) One of three two-headed plaster busts; (b) one of two free-standing statues from the cache excavated from ’Ain Ghazal in 1985 (photos by John Tsantes) 257

9.9 (a) An apsidal building originally constructed in the LPPNB period but later cleared and re-used by Yarmoukian residents (photo by H. Wada); (b) a circular ‘shrine’ in the North Field (photo by Y. Zo’bi) 258

9.10 (a) View to the north of an LPPNB temple built high on the slope of the East Field; (b) the temple at the south end of the East Field (photos by B. Degedeh) 259
List of figures

10.1 Timeline of the South Asian Neolithic, focusing on the areas mentioned in the text and showing the approximate time that various crops and livestock enter the archaeological record 265
11.1 Google Earth™ image showing the location of Mehrgarh (circled to left) in relation to the location of the later Pirak (circled to right), each site lying on a separate alluvial fan (after C.A. Petrie and K.D. Thomas, ‘The topographic and environmental context of the earliest village sites in western South Asia’, Antiquity, 86:334 (2012)) 290
11.2 Map of Mehrgarh showing the location of excavated areas in relation to the course of the Bolan River (after C. Jarrige et al. (eds.), Mehrgarh: Field Reports 1974–1985 from Neolithic Times to the Indus Civilisation (Karachi: Department of Culture and Tourism, Government of Sindh, Pakistan, in collaboration with the French Ministry of Foreign Affairs, 1995), fig. 4) 291
11.5 Flotation to retrieve carbonized plant remains at Liulin, Shanxi province; Zhijun Zhao in the middle 314
12.1 Foxtail millet field in Aohan, near the Xinglonggou site 317
12.2 Carbonized remains of millet from Xinglonggou, dating to 7700 cal BCE 318
12.3 Rice field in Zhejiang province 324
12.4 The Neolithic site of Hemudu (photograph kindly supplied by Judith Cameron) 324
12.5 Field systems at Chuodun, dating to 4000 cal BCE 327
12.6 Field systems at Maoshan dating to 4700–4200 cal BCE (after P. Ding et al., ‘Zhejiang Yuhang Linping Maoshan yizhi (Maoshan site at Linping, Yuhang, Zhejiang province)’, News on Cultural Relics, 17 March 2010, fig. 1) 328
13.1 Post-excavation plan of Xinglonggou I (after H. Yang et al., The Origin of Jades in East Asia: Jades of the Xinglongwa Culture (Centre for Chinese Archaeology and Art, Chinese University of Hong Kong, 2007), 19) 337
13.2 Xinglonggou I, looking northwest 339
13.3 Cultivated fields of maize and weedy millet near Xinglonggou 340
13.4 Early Neolithic jade slit ring from Xinglonggou I (after Yang et al. 2008: 90) 342
13.5 Rows of early Neolithic ‘pit structures’ at Xinglonggou I (after Yang et al. 2008: 11) 344
13.6 Animal skulls in the western part of ‘pit structure’ F5 at Xinglonggou I (after Yang et al. 2008: 23) 345
13.7 Terracotta statue recovered at Xinglonggou II 347
Excavations of early Yayoi rice paddies at Itazuke, Fukuoka prefecture, revealed the footprints of some of the earliest known rice farmers in the Japanese archipelago (courtesy of Fukuoka Prefectural Board of Education) 357

Material culture associated with early rice farming: Yayoi pottery from Itazuke, Fukuoka prefecture, stone reaping knives from Yoshinogari, Saga prefecture, and wooden agricultural tools from Sasai, Fukuoka prefecture (redrawn from A.Wieczorek and W. Steinhaus (eds.), Zeit der Morgenröte: Japans Archäologie und Geschichte bis zu den ersten Kaisern (Mannheim: Reiss-Engelhorn-Museen, 2004)) 358

Ditch-enclosed Yayoi settlement, Otsuka, Kanagawa prefecture (courtesy of Kanagawa Prefectural Board of Education) 370

Yayoi period paddy fields from Osaka (redrawn from T. Inoue, 'Early irrigation systems of rice paddy fields in Japan', in B.J. Coles et al. (eds.) Bog Bodies, Sacred Sites and Wetland Archaeology (Exeter: Wetland Archaeology Research Project, 1999), 115–20) 371

Plan of the sixth-century farmstead at Kuroimine, Gunma prefecture (redrawn from K. Takeuchi et al. (eds.), Satoyama: The Traditional Rural Landscape of Japan (Berlin: Springer, 2003)) 384

The distribution of final Jomon and early Yayoi sites in the southern Nara basin 388

Early Yayoi paddy fields and settlement at Kawanishi-Negarigaki, a moated circular settlement of the Early Yayoi period; and (b) Haginomoto, the first paddy fields of the Early Yayoi period found in the Ner basin 390

The transition from the final Jomon settlement to early Yayoi paddy fields at Tamade 391

Location of the Nakanishi-Akitsu site complex 393

Plan and section of early Yayoi paddies at Nakanishi-Akitsu 396

Final Jomon and early Yayoi pottery chronology and calibrated radiocarbon dates 398

Calibrated radiocarbon dates from the paddy fields at Nakanishi-Akitsu 399

Transformation of the wild landscape to paddy field at Nakanishi-Akitsu 407

Peter Bellwood’s model of the Austronesian dispersals of farmers from MSEA into ISEA (from G. Barker, The Agricultural Revolution in Prehistory: Why did Foragers Become Farmers? (Oxford University Press, 2009), fig. 6.17) 414

Burial 86 at Ban Non Wat, c. 1500 BCE: individual interred with pig remains, including pig skull placed on right lower limb (image credit: Charles Higham) 424
List of figures

16.3 Rice remains from ‘Neolithic’ sites in Thailand: (a) domesticated rice spikelet base from Khao Sam Kaeo TP43 US4, dating to 383–203 BCE (WK18769); (b) rice caryopsis from Khao Sam Kaeo TP7 US16, dating to 359–57 BCE (WK21175); (c) rice caryopsis from Ban Non Wat K500 4.2 GEN, direct AMS date of 441–203 BCE (BA121030); (d) rice caryopsis from Phu Khao Thong S7 US4, dating to 36 BCE to 125 CE (OxA26629) (image credits: Cristina Castillo) 427

16.4 Niah Cave, flexed burial B205, looking northeast (left, scale = 1 m), with a close-up view (top right) showing a Neolithic polished quadrangular adze that was buried with it (bottom right black and white scales in cm) (image credit: Graeme Barker/G. Barker and M. Janowski (eds.), Why Cultivate? Anthropological and Archaeological Approaches to Foraging-Farming Transitions in Southeast Asia (Cambridge: McDonald Institute for Archaeological Research, 2011), fig. 7) 433

16.5 Three skulls placed on the chest of a single burial at Teouma, Vanuatu (from S. Bedford et al., ‘The Teouma Lapita site and the early human settlement of the Pacific Islands’, Antiquity, 80 (2006), fig. 9) 435

16.6 Landscape view of a typical homegarden (behind house) showing polycultural nature of mixed plantings that grades seamlessly into a secondary, managed forest, that itself has regenerated from an older slash-and-burn field (identified by the low areas of vegetation in the image) (photo by Huw Barton) 441

17.1 Maps showing (a) the location of Kuk in Papua New Guinea; and (b) Kuk Swamp within its landscape setting 448

17.2 Archaeostratigraphic model for the stratigraphy at Kuk (from T.P. Denham et al., ‘Contiguous multi-proxy analyses (X-radiography, diatom, pollen and microcharcoal) of Holocene archaeological features at Kuk Swamp, upper Wahgi valley, Papua New Guinea’, Geoarchaeology, 24 (2009), fig. 3) 452

17.3 Schematic depiction of the conceptual and methodological bases for the interpretation of early agriculture in New Guinea (updated version of T.P. Denham, ‘Early to mid-Holocene plant exploitation in New Guinea: towards a contingent interpretation of agriculture’, in T.P. Denham et al. (eds.), Rethinking Agriculture: Archaeological and Ethnoarchaeological Perspectives (Walnut Creek, CA: Left Coast Press, 2007), fig. 5.4) 453

17.4 Chronology of practices and forms of plant exploitation in the upper Wahgi valley (updated version of T.P. Denham et al., ‘Contiguous multi-proxy analyses (X-radiography, diatom, pollen and microcharcoal) of Holocene archaeological features at Kuk Swamp, upper Wahgi valley, Papua New Guinea’, Geoarchaeology, 24 (2009), fig. 1) 454

17.5 Archaeobotanical and palaeoecological information from Kuk: (a) summary pollen and microcharcoal diagram; (b–e) photomicrographs of phytoliths and starch grain residues from stone tools, and an electron micrograph of an aroid seed at Kuk dating to c. 10,000 years ago (reproduced from T.P. Denham, ‘Environmental archaeology: interpreting practices-in-the-landscape through geoarchaeology’, in B. David and J. Thomas (eds.), Handbook of Landscape Archaeology (Walnut Creek: Left Coast Press, 2008), 468–81) 456
List of figures

17.6 Archaeological features indicative of early agricultural practices at Kuk (all photos provided by, and used with permission of, Prof. Jack Golson and reproduced from T.P. Denham, ‘Early to mid-Holocene plant exploitation in New Guinea: towards a contingent interpretation of agriculture’, in T.P. Denham et al. (eds.), Rethinking Agriculture: Archaeological and Ethnoarchaeological Perspectives (Walnut Creek, CA: Left Coast Press, 2007), fig. 5.3) 460

17.7 Digital representation of the preserved bases of mounds dating to c. 7,000–6,400 years ago (from T.P. Denham and S. Haberle, ‘Agricultural emergence and transformation in the upper Wahgi valley, Papua New Guinea, during the Holocene: theory, method and practice’, The Holocene, 18 (2008), fig. 5) 463

17.8 Plans of the oldest ditch networks exposed in excavation at Kuk 465

18.1 Cattle burial from basal levels at Karkarichinkat Nord, Mali, c. 2600 BCE (photo © Kat Manning, reproduced with permission) 476

18.2 SEM image of the domestic pearl millet rachis and involucre from Er Neg, lower Tilemsi valley, Mali, c. 2000 BCE (photo © Kat Manning, reproduced with permission) 478

18.3 In situ andesite grinding stone associated with carbonized barley seeds (in burned soil and charcoal below) from the Ancient Ona Culture site of Ona Gudo, Asmara plateau, Eritrea, c. 800–400 BCE (photo © Matthew Curtis, reproduced with permission) 480

18.4 Lothagam West (Gejiio) Pastoral Neolithic pillar site, West Turkana, Kenya (photo © Elisabeth Hildebrand, reproduced with permission) 481

18.5 Ol Ngoro rock shelter, Lolldaiga hills, Kenya (photo © Paul J. Lane) 482

18.6 Terracotta ‘cigars’ from Birimi, Ghana – this artefact form is especially diagnostic of the Kintampo culture (photo © Joanna Casey, reproduced with permission) 485

18.7 Example of a Pastoral Neolithic stone bowl, from site GvJh3, central Rift Valley, Kenya (photo © Stanley Ambrose, reproduced with permission) 486

18.8 In situ Urewe hemispherical bowl and dimple-based pot from site LOL-13, Lolui Island, Uganda (photo © Oli Bolies, reproduced with permission) 488

18.9 View across early herder settlement areas, Kasteelberg Hill, South Africa (photo © Karim Sadr, reproduced with permission) 493

19.1 The Tichitt tradition: a regional map 500

19.2 The pre-Tichitt site of Bou Bteiah, situated on a rocky outcrop within a vast plain – ideal for monitoring herds or wild game movements (photo by K. MacDonald) 501

19.3 Excavations at Djiganyai in 2000 (photo by K. MacDonald) 502

19.4 Pre-Tichitt to Tichitt lithics from the sequence at Djiganyai (illustration by R. Vernet and K. MacDonald) 503

19.5 Domestic millet impressions in a Tichitt tradition potsherd (photo by K. MacDonald) 504

19.6 Plan of Dakhlent el Atrouss-I (courtesy of R. Vernet) 508

19.7 Classic Tichitt rim forms from Ndondi Tossokel, in the middle Niger 511
List of figures

20.1 Likely areas of origin for selected crops of the Americas 515
20.2 Drawing of a foot-plough by Felipe Guaman Poma from his El Primer Nueva Coronica y Buen Gobierno (Werner Forman Archive/Bridgeman Images) 531
21.1 Location map of the Nanchoc valley in Peru 541
21.2 The location of Las Pircas sites on the alluvial fans of the Nanchoc valley 543
21.3 Schematic drawing of Paijan house remains dated around 10,000 BP 545
21.4 The remains of an excavated Las Pircas house 546
21.5 The foundation of a rectangular-shaped Tierra Blanca house form 546
21.6 Outline of the two mounds at the Cementerio de Nanchoc site 547
21.7 Coca leaves excavated from a Tierra Blanca house floor 547
22.1 Reconstruction of the Alpine Iceman, dated to the later fourth millennium cal BCE (after M. Egg and K. Spindler, Kleidung und Ausrüstung der Gletschermumie aus den Ötztaler Alpen (Mainz: Verlag des Römisch-Germanischen Zentralmuseums, 2009)) 558
22.2 Houses of the Lengyel culture at Alsónyék-Bátaszék, Hungary, dating to the earlier fifth millennium cal BCE (after A. Osztás et al., 'Alsónyék-Bátaszék: a new chapter in research of the Lengyel Culture', Documenta Prachistorica, 39 (2012)) 559
22.3 The section excavated by Miloje Vasic at the tell of Vinča-Belo Brdo, in 1933 (photo courtesy of Nenad Tasic) 560
22.4 A portion of the burial ground at Tiszapolgár-Basatanya (after I. Bognár-Kutzián, The Copper Age Cemetery of Tiszapolgár-Basatanya (Budapest: Akadémiai Kiadó, 1963)) 560
22.6 Reconstruction of the causewayed enclosure at Whitehawk, Sussex (drawing by Ian Dennis) 563
22.7 The monument complex at Locmariquer, Morbihan, Brittany, including the Er Grah long cairn, stone row with the fallen Grand Menhir Brisé, and the passage grave of La Table des Marchands (after S. Cassen (ed.), Autour de la Table: explorations archéologiques et discours savants sur des architectures mégalithiques à Locmariquer, Morbihan (Table des Marchands et Grand Menhir) (Nantes: Laboratoire de recherches archéologiques, CNRS, and Université de Nantes, 2009)) 564

xxv
The Cambridge Histories have long presented authoritative multi-volume overviews of historical topics, with chapters written by specialists. The first of these, the Cambridge Modern History, planned by Lord Acton and appearing after his death from 1902 to 1912, had fourteen volumes and served as the model for those that followed, which included the seven-volume Cambridge Medieval History (1911–1936), the twelve-volume Cambridge Ancient History (1924–1939), the thirteen-volume Cambridge History of China (1978–2009), and more specialized multi-volume works on countries, religions, regions, events, themes, and genres. These works are designed, as the Cambridge History of China puts it, to be the ‘largest and most comprehensive’ history in the English language of their topic, and, as the Cambridge History of Political Thought asserts, to cover ‘every major theme’.

The Cambridge World History both follows and breaks with the model set by its august predecessors. Presenting the ‘largest and most comprehensive’ history of the world would take at least three hundred volumes – and a hundred years – as would covering ‘every major theme’. Instead the series provides an overview of the dynamic field of world history in seven volumes over nine books. It covers all of human history, not simply that since the development of written records, in an expanded timeframe that represents the newest thinking in world history. This broad timeframe blurs the line between archaeology and history, and presents both as complementary approaches to the human past. The volume editors include archaeologists as well as historians, and have positions at universities in the United States, Britain, France, Australia, and Israel. The essays similarly draw on a broad author pool of historians, art historians, anthropologists, classicists, archaeologists, economists, linguists, sociologists, biologists, geographers, and area studies specialists, who come from universities in Australia, Britain, Canada, China, Estonia, France, Germany, India, Israel, Italy, Japan, the Netherlands, New Zealand, Poland, Portugal, Singapore, Sweden, Switzerland, and the United States. They include very senior scholars whose works have helped to form the field, and also mid-career and younger scholars whose research will continue to shape it in the future. Some of the authors are closely associated with the rise of world history as a distinct research and teaching field, while others describe what they do primarily as global history, transnational history, international history, or comparative history. (Several of the essays in Volume 1 trace the development of these overlapping, entangled, and at times competing fields.) Many authors are simply specialists on their topic who the editors thought could best explain this to a broader audience or reach beyond their comfort zones into territory that was new.

xxvii
Preface

Reflecting the increasing awareness that world history can be examined through many different approaches and at varying geographic and chronological scales, each volume offers several types of essays, including regional, topical, and comparative ones, along with case studies that provide depth to go with the breadth of vision that is the distinguishing characteristic of world history. Volume 1 introduces key frames of analysis that shape the making of world history across time periods, with essays on overarching approaches, methods, and themes. It then includes a group of essays on the Palaeolithic, covering the 95 per cent of human history up to 10,000 BCE. From that point on, each volume covers a shorter time period than its predecessor, with slightly overlapping chronologies volume to volume to reflect the complex periodization of a truly global history. The editors chose the overlapping chronologies and stayed away from traditional period titles (e.g. ‘classical’ or ‘early modern’) intentionally to challenge standard periodization to some degree. The overlapping chronologies also allow each volume to highlight geographic disjunctions and imbalances, and the ways in which various areas influenced one another. Each of the volumes centers on a key theme or cluster of themes that the editors view as central to the period covered in the volume and also as essential to an understanding of world history as a whole.

Volume 2 (A World with Agriculture, 12,000 BCE–500 CE) begins before the Neolithic and continues into later periods to explore the origins of agriculture and agricultural communities in various regions of the world, as well as to discuss issues associated with pastoralism and hunter-fisher-gatherer economies. It traces common developments in the more complex social structures and cultural forms that agriculture enabled, and then presents a series of regional overviews accompanied by detailed case studies from many different parts of the world.

Volume 3 (Early Cities and Comparative History, 4000 BCE–1200 CE) focuses on early cities as motors of change in human society. Through case studies of cities and comparative chapters that address common issues, it traces the creation and transmission of administrative and information technologies, the performance of rituals, the distribution of power, and the relationship of cities with their hinterlands. It has a broad and flexible chronology to capture the development of cities in various regions of the world and the transformation of some cities into imperial capitals.

Volume 4 (A World with States, Empires, and Networks, 1200 BCE–900 CE) continues the analysis of processes associated with the creation of larger-scale political entities and networks of exchange, including those generally featured in accounts of the rise of ‘classical civilizations’, but with an expanded timeframe that allows the inclusion of more areas of the world. It analyses common social, economic, cultural, political, and technological developments, and includes chapters on slavery, religion, science, art, and gender. It then presents a series of regional overviews, each accompanied by a case study or two examining one smaller geographic area or topic within that region in greater depth.

Volume 5 (Expanding Webs of Exchange and Conquest, 500 CE–1500 CE) highlights the growing networks of trade and cross-cultural interaction that were a hallmark of the millennium covered in the volume, including the expansion of text-based religions and the transmission of science, philosophy, and technology. It explores social structures, cultural institutions, and significant themes such as the environment, warfare, education, the family, and courtly cultures on both a global and Eurasian scale, and continues the
Preface

examination of state formation begun in Volume 4 with chapters on polities and empires in Asia, Africa, Europe, and the Americas.

The first five volumes each appear in a single book, but the last two are double volumes covering the periods conventionally known as the early modern and modern, an organization signalling the increasing complexity of an ever more globalized world in the last half millennium, as well as the expanding base of source materials and existing historical analyses for these more recent eras. Volume 6 (The Construction of a Global World, 1400–1800 CE) traces the increasing biological, commercial, and cultural exchanges of the period, and explores regional and transregional political, cultural, and intellectual developments. The first book within this volume, ‘Foundations’, focuses on global matrices that allowed this increasingly interdependent world to be created, including the environment, technology, and disease; crossroads and macro-regions such as the Caribbean, the Indian Ocean, and Southeast Asia in which connections were especially intense; and large-scale political formations, particularly maritime and land-based empires such as Russia, the Islamic Empires, and the Iberian Empires that stretched across continents and seas. The second book within this volume, ‘Patterns of Change’, examines global and regional migrations and encounters, and the economic, social, cultural, and institutional structures that both shaped and were shaped by these, including trade networks, law, commodity flows, production processes, and religious systems.

Volume 7 (Production, Destruction, and Connection, 1750–Present) examines the uneven transition to a world with fossil fuels and an exploding human population that has grown ever more interactive through processes of globalization. The first book within this double volume, ‘Structures, Spaces, and Boundary Making’, discusses the material situations within which our crowded world has developed, including the environment, agriculture, technology, energy, and disease; the political movements that have shaped it, such as nationalism, imperialism, decolonization, and communism; and some of its key regions. The second book, ‘Shared Transformations?’ explores topics that have been considered in earlier volumes, including the family, urbanization, migration, religion, and science, along with some that only emerge as global phenomena in this era, such as sports, music, and the automobile, as well as specific moments of transition, including the Cold War and 1989.

Taken together, the volumes contain about two hundred essays, which means the Cambridge World History is comprehensive, but certainly not exhaustive. Each volume editor has made difficult choices about what to include and what to leave out, a problem for all world histories since those of Herodotus and Sima Qian more than two millennia ago. Each volume is arranged in the way that the volume editor or editors decided is most appropriate for the period, so that organizational schema differ slightly from volume to volume. Given the overlapping chronologies, certain topics are covered in several different volumes because they are important for understanding the historical processes at the heart of each of these, and because we as editors decided that viewing key developments from multiple perspectives is particularly appropriate for world history. As with other Cambridge Histories, the essays are relatively lightly footnoted, and include a short list of further readings, the first step for readers who want to delve deeper into the field. In contrast to other Cambridge Histories, all volumes are being published at the same time, for the leisurely pace of the print world that allowed publication over several decades does not fit with twenty-first-century digital demands.
In other ways as well, the Cambridge World History reflects the time in which it has been conceptualized and produced, just as the Cambridge Modern History did. Lord Acton envisioned his work, and Cambridge University Press described it, as ‘a history of the world’, although in only a handful of chapters out of several hundred were the principal actors individuals, groups, or polities outside of Europe and North America. This is not surprising, although the identical self-description of the New Cambridge Modern History (1957–1979), with a similar balance of topics, might be a bit more so. The fact that in 1957 – and even in 1979, when the last volume of the series appeared – Europe would be understood as ‘the world’ and as the source of all that was modern highlights the power and longevity of the perspective we have since come to call ‘Eurocentric’. (In other languages, there are perspectives on world history that are similarly centred on the regions in which they have been produced.) The continued focus on Europe in the mid-twentieth century also highlights the youth of the fields of world and global history, in which the conferences, professional societies, journals, and other markers of an up-and-coming field have primarily emerged since the 1980s, and some only within the last decade. The Journal of World History, for example, was first published in 1990, the Journal of Global History in 2005, and New Global Studies in 2007.

World and global history have developed in an era of intense self-reflection in all academic disciplines, when no term can be used unselfconsciously and every category must be complicated. Worries about inclusion and exclusion, about diversity and multivocality, are standard practice in subfields of history and related disciplines, including archaeology, that have grown up in this atmosphere. Thus as we editors sought topics that would give us a balance between the traditional focus in world history on large-scale political and economic processes carried out by governments and commercial elites and newer concerns with cultural forms, representation, and meaning, we also sought to include topics that have been important in different national historiographies. We also attempted to find authors who would provide geographic balance along with a balance between older and younger voices. Although the author pool is decidedly broader geographically – and more balanced in terms of gender – than it was in either of the Cambridge Modern Histories, it is not as global as we had hoped. Contemporary world and global history is overwhelmingly Anglophone and, given the scholarly diaspora, disproportionately institutionally situated in the United States and the United Kingdom. Along with other disparities in our contemporary world, this disproportion is, of course, the result of the developments traced in this series, though the authors might disagree about which volume holds the key to its origins, or whether one should spend much time searching for origins at all.

My hopes for the series are not as sweeping as Lord Acton’s were for his, but fit with those of Tapan Raychaudhuri and Irfan Habib, the editors of the two-volume Cambridge Economic History of India (1982). In the preface to their work, they comment: ‘We only dare to hope that our collaborative effort will stimulate discussion and help create new knowledge which may replace before many years the information and analysis offered in this volume.’ In a field as vibrant as world and global history, I have no doubts that such new transformative knowledge will emerge quickly, but hope this series will provide an entrée to the field, and a useful overview of its state in the early twenty-first century.

MERRY E. WIESNER-HANKS
