Handbook of Human Oocyte Cryopreservation

Eleonora Porcu, MD
Director, Infertility and IVF Centre, Department of Gynecology, Obstetrics and Pediatrics,
University Hospital S. Orsola-Malpighi, Bologna,
Assistant Professor in Reproductive Medicine, University of Bologna, Bologna, Italy

Patrizia Ciotti, BSc
Research Scientist, Infertility and IVF Centre, University of Bologna, Bologna, Italy

Stefano Venturoli, MD
Professor, Department of Gynecology, Obstetrics and Pediatrics, University of Bologna, Bologna, Italy

Cambridge University Press has no responsibility for the persistence or
accuracy of URLs for external or third-party internet websites referred to
in this publication, and does not guarantee that any content on such
websites is, or will remain, accurate or appropriate.

Every effort has been made in preparing this book to provide accurate
and up-to-date information which is in accord with accepted standards
and practice at the time of publication. Although case histories are drawn
from actual cases, every effort has been made to disguise the identities of the
individuals involved. Nevertheless, the authors, editors and publishers can
make no warranties that the information contained herein is totally free from
error, not least because clinical standards are constantly changing through
research and regulation. The authors, editors and publishers therefore
disclaim all liability for direct or consequential damages resulting from the
use of material contained in this book. Readers are strongly advised to pay
careful attention to information provided by the manufacturer of any
drugs or equipment that they plan to use.
Contents

Preface vii

1. Why freeze human eggs? Clinical and biological indications for human oocyte cryopreservation 1
   Ethical and legal indications 1
   Fertility-saving indications 4
   IVF laboratory flexibility indication 15
   The controversial family planning indication 15

2. The natural history of human oocyte cryopreservation 18
   Preliminary research 18
   Early animal studies 18
   Early human studies 21
   Subsequent research 22
   Recent clinical application 23
   Safety of oocyte cryopreservation 34

3. Clinical management of oocyte cryopreservation 42
   Ovarian stimulation and oocyte storage 42
   Storage of surplus eggs in a standard cycle 42
   Egg storage to avoid ovarian hyperstimulation syndrome 43
   Egg storage in polycystic ovary syndrome 43
   Egg storage in cancer patients 44

4. Laboratory management of oocyte cryopreservation 49
   The egg freezing laboratory: location, equipment, instruments, materials 49
   Selecting freezable eggs: the freezeable egg score 49
   Cryobiology 69

5. Slow freezing 71
   Principles 71
   Evolution of the slow freezing methodology 71
   Slow freezing/rapid thawing 74
   Setting up for a freezing cycle 77
   Setting up for a thawing cycle 77
   Freezing solutions at different sucrose concentrations 77
   Thawing solutions with differentiated sucrose concentrations 78
   Setting up for a freezing cycle with differential sucrose concentrations 79
   Setting up for a thawing cycle with differential sucrose concentrations 79
   Starting the freezing cycle 81
   Rapid thawing 85

6. Vitrification 89
   Principles 89
   Evolution of the vitrification technique 89
   Vitrification/warming 90
   Way of utilization of the devices during warming phase 103

7. Comparison between Slow freezing and vitrification: pros and cons 114
   Introduction 114
   Practical advantages and disadvantages of slow freezing versus vitrification 115

8. Safety of storage 118
   Liquid nitrogen supply and cryocontainer fill-up 118
   Staff safety 118
Directions for optimal long-term storage 120
The problem of cryopreserved oocyte transport to another center 123

9. Database 124
   Registration 124
   Data updating 125

10. Physician–embryologist cooperation for optimal management of the oocyte cryopreservation program 126

11. Costs 128
    Cost of a slow freezing cycle 128
    Cost of a thawing cycle 129
    Cost of a vitrification cycle 130
    Cost of a warming cycle 132

Comparison between slow freezing and vitrification 132

12. Staff 134

13. Tricks and secrets of oocyte cryopreservation 135
    Preparation of cryopreservation solutions 135
    Freezing 135
    Thawing 135
    Vitrification 136
    Minimum volume 136
