Contents

Preface

1 Introduction 1
   1.1 Introduction 1
   1.2 A Commodity Taxonomy 4
   1.3 Commodity Markets and Data 6
   1.4 An Overview of the Remainder of the Book 8
      1.4.1 Modeling Storable Commodity Prices 9
      1.4.2 A Two-Factor Model of a Continuously Produced
            Commodity 9
      1.4.3 The Empirical Performance of the Two-Factor Model 10
      1.4.4 Commodity Pricing with Stochastic Fundamental
            Volatility 10
      1.4.5 The Pricing of Seasonally Produced Commodities 11
      1.4.6 The Pricing of Pollution Credits 11
      1.4.7 Non-Storable Commodities Pricing: The Case of
            Electricity 12
   1.5 Where This Book Fits in the Literature 12

2 The Basics of Storable Commodity Modeling 18
   2.1 Introduction 18
   2.2 Dynamic Programming and the Storage Problem: An
       Overview 20
       2.2.1 Model Overview 20
       2.2.2 Competitive Equilibrium 22
       2.2.3 The Next Step: Determining the Forward Price 24
       2.2.4 Specifying Functional Forms and Shock Dynamics 27
   2.3 A More Detailed Look at the Numerical Implementation 30
## Contents

2.3.1 Solving a PDE Using Finite Differences: The One-Dimensional Case 36
2.3.2 Solving the 2D PDE 39
2.3.3 Boundary Conditions 40

2.4 Summary 42

3 High-Frequency Price Dynamics for Continuously Produced Commodities in a Two-Factor Storage Economy: Implications for Derivatives Pricing 44
3.1 Introduction 44
3.2 A Model of the Storage Economy with a Continuously Produced Commodity 47
3.2.1 Introduction 47
3.2.2 Framework and Numerical Solution 47
3.3 Moments and the State Variables 49
3.4 Derivatives Pricing 54
3.5 Extension: Storage Capacity Constraints 65
3.6 Extension: The Effects of Speculation on Price Dynamics in the Storage Economy 67
3.7 Summary and Conclusions 71

4 The Empirical Performance of the Two-Factor Storage Model 73
4.1 Introduction 73
4.2 Empirical Tests of the Theory of Storage: A Brief Literature Review 75
4.3 An Alternative Empirical Approach 77
4.3.1 Overview 77
4.3.2 The Extended Kalman Filter 80
4.3.3 Parameter Choices and Data 83
4.4 Results 84
4.5 The Implications of the Model for the Speculation Debate 100
4.6 Summary and Conclusions 107

5 Stochastic Fundamental Volatility, Speculation, and Commodity Storage 109
5.1 Introduction 109
5.2 Speculation and Oil Prices 114
5.3 The Storage Economy 116
5.4 Equilibrium Competitive Storage 118
5.5 Solution of the Storage Problem 119
5.6 Results: Storage, Prices, and Spreads 120
# Contents

5.7 Results: The Time Series Behavior of Prices, Stocks, and Volatility

5.8 Some Other Empirical Evidence

5.9 Conclusions

6 The Pricing of Seasonal Commodities

6.1 Introduction

6.2 The Model

6.3 Results

6.4 Empirical Evidence

6.5 Alternative Explanations for the Empirical Regularities

6.5.1 Preferences

6.5.2 Inventories as a Factor of Production

6.5.3 Multiple Storable Commodities

6.6 Summary and Conclusions

7 The Dynamics of Carbon Markets

7.1 Introduction

7.2 The Model

7.3 Results

7.4 Summary

8 The Structural Modeling of Non-Storables: Electricity

8.1 Introduction

8.2 Electricity Markets

8.3 A Structural Model for Pricing Electricity Derivatives

8.4 Model Implementation

8.5 Commonly Traded Power Options

8.5.1 Daily Strike Options

8.5.2 Monthly Strike Options

8.5.3 Spark Spread Options

8.6 Valuation Methodology

8.6.1 Daily Strike and Monthly Strike Options

8.6.2 Spark Spread Options

8.7 Results

8.8 Complications

8.9 Summary and Conclusions
