	Acknowledgements	*page* vii
	Introduction	1
1	Astrobiology: 'The Colour Out of Space?'	6
	The Canonical Three	9
	Prides and prejudices	12
	Copernicanism and the promise of synthesis	23
2	Cosmology, life and duration of the past	27
	Wallace's valiant attempt	28
	Six eras and the (New) standard cosmology	32
	Infinite past(s) and the Davies–Tipler argument	36
	Time and chance: historical parallel of cosmology and astrobiology	49
3	Cosmology, life and selection effects	56
	Non-controversial observation selection: extrasolar planets	57
	Non-controversial observation selection: two examples	59
	Somewhat controversial observation selection: fine-tuning arguments	65
	Controversial observation selection: Olum's problem	72
	The 'real thing': the astrobiological landscape	78
4	Cosmology, life and the Archipelago	86
	Multiverse: a universal solvent	87
	The Archipelago of Habitability	89
	A joint venture of fundamental physics and astrobiology	94
	On two views of anthropic reasoning: a dialogue	102

Table of Contents
More information

5 Astrobiology as a natural extension of Darwinism 108
Galactic Darwinism? 109
Replaying the replay 113
Is convergence useful? 119
Testing convergence 123
A promising partnership 127

6 Rare Earths and the continuity thesis 130
Rare Earth – a key piece of the landscape? 131
Unphysical *ceteris paribus* 133
Further arguments against REH 138
The continuity thesis: 'neither chance nor design' 141
Haldane's ladder and noogenesis 144

7 SETI and its discontents 148
The 'Big Three': classic anti-SETI arguments 149
The argument from biological contingency 151
Carter's argument 156
Beyond epistemology: the context of the campaign 161
Insufficiency of philosophical criticism 163
Towards a coherent philosophy of noogenesis and SETI 181

8 Natural and artificial: the cosmic *Domain of Arnheim* 184
Unconscious intelligence? 186
'. . . It was only by analogy that they called it colour at all' 188
The strangeness of astroengineering 198

9 Astrobiology as the neo-Copernican synthesis? 203
