Contemporary Chinese Politics considers how new and diverse sources and methods are changing the study of Chinese politics. Contributors spanning three generations in China studies place their distinct qualitative and quantitative methodological approaches in the framework of the discipline and point to challenges or opportunities (or both) of adapting new sources and methods to the study of contemporary China. How can we more effectively use new sources and methods of data collection? How can we better integrate the study of Chinese politics into the discipline of political science, to the betterment of both? How can we more appropriately manage the logistical and ethical problems of doing political research in the challenging Chinese environment? In addressing these questions, this comprehensive methodological survey will be of immense interest to graduate students heading into the field for the first time and experienced scholars looking to keep abreast of the state of the art in the study of Chinese politics.

Mary E. Gallagher is an associate professor of political science at the University of Michigan and the director of the Center for Chinese Studies. She is also a faculty associate at the Center for Comparative Political Studies at the Institute for Social Research. She is the author of Contagious Capitalism: Globalization and the Politics of Labor in China (2005), and her articles have appeared in World Politics, Law and Society Review, Studies in Comparative International Development, and Asian Survey.

Kenneth Lieberthal is a senior Fellow in Foreign Policy and in Global Economy and Development and also is director of the John L. Thornton China Center at the Brookings Institution. He has written and edited fifteen books and monographs, most recently The U.S. Intelligence Community and Foreign Policy: Getting Analysis Right (2009) and (with David Sandalow) Overcoming Obstacles to US-China Cooperation on Climate Change (2009). He is also the author of about seventy periodical articles and chapters in books and has published in the New York Times, Washington Post, Los Angeles Times, Financial Times, South China Morning Post, and numerous other newspapers.

Melanie Manion is a professor of political science and public affairs at the University of Wisconsin–Madison. Her publications include Retirement of Revolutionaries in China (1993) and Corruption by Design (2004). Her articles have appeared in the American Political Science Review, Comparative Political Studies, Journal of Law, Economics, and Organization; and China Quarterly.
Contemporary Chinese Politics

New Sources, Methods, and Field Strategies

Introduction 1
Allen Carlson, Mary E. Gallagher, and Melanie Manion

PART I SOURCES
1 State-Generated Data and Contentious Politics in China 15
   Xi Chen
2 Why Archives? 33
   Neil J. Diamant
3 The Central Committee, Past and Present: A Method of Quantifying Elite Biographies 51
   Victor Shih, Wei Shan, and Mingxing Liu
4 Experimental Methods and Psychological Measures in the Study of Chinese Foreign Policy 69
   Peter Hays Gries
5 Internet Resources and the Study of Chinese Foreign Relations: Can Cyberspace Shed New Light on China’s Approach to the World? 88
   Allen Carlson and Hong Duan
6 Information Overload? Collecting, Managing, and Analyzing Chinese Media Content 107
   Daniela Stockmann

PART II QUALITATIVE METHODS
7 The Worm’s-Eye View: Using Ethnography to Illuminate Labor Politics and Institutional Change in Contemporary China 129
   Calvin Chen
More Than an Interview, Less Than Sedaka: Studying Subtle and Hidden Politics with Site-Intensive Methods
Benjamin L. Read

Cases, Questions, and Comparison in Research on Contemporary Chinese Politics
William Hurst

PART III SURVEY METHODS

A Survey of Survey Research on Chinese Politics: What Have We Learned?
Melanie Manion

Surveying Prospects for Political Change: Capturing Political and Economic Variation in Empirical Research in China
Bruce J. Dickson

Using Clustered Spatial Data to Study Diffusion: The Case of Legal Institutions in China
Pierre F. Landry

Measuring Change and Stability over a Decade in the Beijing Area Study
Mingming Shen and Ming Yang, with Melanie Manion

Quantitative Research and Issues of Political Sensitivity in Rural China
Lily L. Tsai

Reflections on the Evolution of the China Field in Political Science
Kenneth Lieberthal
