<i>List of contributors</i>	
Part I Outlook	1
1 Introduction	3
Shlomi Arnon, John Barry, George Karagiannidis, Robert Schober, and Murat Uysal	
Part II Optical wireless communication theory	9
2 Coded modulation techniques for optical wireless channels	11
Ivan B. Djordjevic	
2.1 Atmospheric turbulence channel modeling	12
2.2 Codes on graphs	13
2.3 Coded-MIMO free-space optical communication	19
2.4 Raptor codes for temporally correlated FSO channels	26
2.5 Adaptive modulation and coding (AMC) for FSO communications	29
2.6 Multidimensional coded modulation for FSO communications	35
2.7 Free-space optical OFDM communication	38
2.8 Heterogeneous optical networks (HONs)	43
2.9 Summary	48
Acknowledgments	49
References	49
3 Wireless optical CDMA communication systems	54
Jawad A. Salehi, Babak M. Ghaffari, and Mehdi D. Matinfar	
3.1 Introduction	54
3.2 OCDMA system description	55
3.3 Indoor wireless optical CDMA LAN	59
3.4 Free-space optical CDMA systems	68
3.5 Modulation	75
3.6 Experimental prototypes	81

Cambridge University Press

978-0-521-19787-8 - Advanced Optical Wireless Communication Systems

Edited by Shlomi Arnon, John R. Barry, George K. Karagiannidis, Robert Schober and Murat Uysal

vi	Contents	
	Acknowledgment	84
	References	84
4	Pointing error statistics	87
	Shlomi Arnon	
	References	89
5	Equalization and Markov chains in cloud channel	90
	Mohsen Kavehrad	
	5.1 Introduction	91
	5.2 Channel propagation modeling	92
	5.3 Modeling results and eigen analyses	99
	5.4 Equalization related issues	103
	5.5 Summary and conclusions	112
	Acknowledgment	113
	References	113
6	Multiple-input multiple-output techniques for indoor optical wireless communications	116
	Steve Hranilovic	
	6.1 Indoor OW MIMO channel characteristics	117
	6.2 MIMO for diffuse OW channels	119
	6.3 Spot-diffusing OW MIMO systems	123
	6.4 Point-to-Point OW MIMO communications	127
	6.5 Future directions	138
	References	139
7	Channel capacity	146
	Amos Lapidoth, Stefan M. Moser, and Michèle Wigger	
	7.1 Introduction and channel models	146
	7.2 Capacity results	150
	7.3 Proof techniques	163
	References	172
	Part III Unique channels	175
8	Modeling and characterization of ultraviolet scattering communication channels	177
	Haipeng Ding, Brian M. Sadler, Gang Chen, and Zhengyuan Xu	
	8.1 Introduction	177
	8.2 Single scattering models	181

		Contents	vii
	8.3	Multiple scattering models	183
	8.4	NLOS UV channel measurement systems	189
	8.5	Numerical and experimental results	192
	8.6	Summary	198
		References	199
9		Free-space optical communications underwater	201
		Brandon Cochenour and Linda Mullen	
	9.1	Introduction: towards a link equation	201
	9.2	Introduction to ocean optics	202
	9.3	Channel characterization: theory	213
	9.4	Experimental research in wireless optical communications underwater	218
	9.5	System design for uFSO links	228
	9.6	Summary	236
		References	237
10		The optical wireless channel	240
		Roger Green and Mark Leeson	
	10.1	Introduction	240
	10.2	System configurations	241
	10.3	Optical sources	242
	10.4	Optical detectors	244
	10.5	Optical filters	245
	10.6	Nature of the optical wireless channel	247
	10.7	Interference sources	248
	10.8	Impact of interference on BER	251
	10.9	Channel impulse response	253
	10.10	Hardware aspects of the receiver-amplifier in the indoor channel environment	255
	10.11	Modulation schemes for optical wireless	263
	10.12	Optics for optical wireless	267
	10.13	Concluding remarks	268
		References	269
11		Hybrid RF/FSO communications	273
		Nick Letzepis and Albert Guillén i Fàbregas	
	11.1	Introduction	273
	11.2	Channel model	275
	11.3	Information-theoretic preliminaries	281
	11.4	Uniform power allocation	287
	11.5	Power allocation	292
	11.6	Conclusions and summary	295
