Index

Note: The term 'territories' has been used throughout the index as it is the most neutral word to describe the different constitutional status of British, Dutch, French, Spanish, Scandinavian and US countries in the Caribbean. The text provides differentiation between colonial, dependent and independent status. Page numbers followed by the letters a, f, n or t indicate material in appendixes, figures, notes or tables. Though both British and American English spellings appear throughout the text, British English has been used in the index.
