Index

abbreviations, in this volume, xiv
A-chain, 45
act-out task, 74
adjectival [stative] response, 129–131
Adone, D., 3, 6, 17, 28, 33, 62, 66, 158, 159, 161, 171, 172
Aikhenvald, A., 54
Allen, S.E.M., 122, 167–168
American Sign Language [ASL]
age of acquisition and fluency, 24
deaf children of non-native signers, 24–25, see also Simon
definitions of native/early/late signers, 24
distinction between resilient and fragile features, 21
frozen lexicon, 24
serial verb structures, 163
animacy restriction on the ditransitive alternation, 41–42
animal communications, 8–9, 168
Ansaldo, U., 4
Arends, J., 1, 2, 3, 4
ASL, see American Sign Language
Baker, C. L., 107
Baker, P., 2
Baptista, M., 3
Bellugi, U., 24
Bencini, G.M.L., 122
Berbice Dutch, 55
Bickerton, D., 3, 11–12, 17, 22–23, 60, 152
Binding Theory [BT], 30–32, 79
blind children, language acquisition by,
23–24, 168–169
Bollée, A., 5, 37, 44
Borer, H., 44–46, 123
Bowerman, M., 26–27, 30
Braine, M.D.S., 122
Brooks, P. J., 122, 123, 169
Bruyn, A., 3, 35, 36, 43, 107, 108, 109, 111
BT, see Binding Theory
by-phrases, and verbal/adjectival passives, 48, 53
Cairns, H., 81–82
Cantonese Chinese
serial verb constructions, 146
Cape Verde Creole, 2
cases studies, 17–18, see also child language acquisition studies; language deprivation cases; language invention cases
Cayenne Creole
do double-object construction, 43
Chafetz, J., 122
Chaudenson, R., 2
Chien, Y. C., 72, 74, 76, 79, 81–82, 88, 89, 95, 96, 166, 180
child language acquisition studies, 198
approaches, 63–64
experiment descriptions, 73–77
history, 63
research design, 65–66
research materials, 72
research methods rationale, 72–73
research population, 66–67
training and practice sessions, 67–72
types of data, 64–65
children
adult’s correction of, 13–14
sensitivity to language-specific prosodic properties of speech, 10–11, see also blind children, language acquisition by, deaf children of hearing parents
Chinese, see also Cantonese Chinese;
Mandarin Chinese
do double-object construction, 107–108
Chomsky, N., 10, 12, 27, 30, 63
Claessen, H., 16–17
complex syntax, 30
insecurity of Seselwa adults, 62
comprehension data, 64
experiments for, 74
connectionist neural network models, 9–10
constructivist/emergentist/usage-based approach, 15–16
coreference, 31
Corne, C., 33, 37, 44, 60
Crago, M. B., 122
Crain, S., 81–82, 122–123
Creole languages
complexity of grammar, 4
difference from pidgins, 1
exceptional status of, 4
creolisation
deaf children of hearing parents, 22–23
role of children and adults in process, 3–4
with nativisation, 1–2, 3
without nativisation, 2–3
critical period for language acquisition, 169
Curtiss, S., 19
Darwin, C., 63
de Villiers, J., 64–65, 121, 122, 161
de Villiers, P., 64–65, 121, 122
deaf children of hearing parents, 20–22
creolisation, 22–23
degenerate input, 27–28
DeGraff, M., 3, 4
Diessel, H., 30
ditransitive verbs, 34–35, see also double-object construction; prepositional ditransitive construction; serial ditransitive constructions
Creole languages, 120
distribution of DOC and PDC in Creole languages, 35–37
experiments
method, 112–113, 189–191
results, 113–120
in first language acquisition, 107–109
spontaneous data, 109–112
DOC, see double-object construction
domain-specificity argument, 9, 10
double-object construction (DOC), 34–35, see also under Morisyen and Seselwa and children, 106–107, 167
Dye, C., 30
Eimas, P., 10
elicited production, 149–150
elicited production task, 75–76
emergentist approach, see constructivist/emergentist/usage-based approach
Emmorey, K., 24
equipotentiality hypothesis, 9
expanded pidgins, 1
Ezeizabarrena, M.-J., 16–17
feral children, 17, 18, see also Victor
first language acquisition
future research, 172–173
going beyond input, 168–171
issues in, 8
without a conventional language model, 164–166
Foley, C., 30
Fox, D., 122–123
fragile features, 21
Frank, R. E., 161
French, absence of double-object constructions, 109, 111–122
Friederici, U., 24
Gazzaniga, M., 11
generative grammar, 14
generativist approach, see nativist/generativist/Universal Grammar approach
Genie, 17, 18, 169
acquiring only resilient language features, 21
Gleitman, L. R., 23–24
goals of this study, 6
Goldin-Meadow, S., 20–22
Gordon, P., 76, 122
grammaticality task, 77
Grimshaw, J., 81–82, 84, 174–179
Grodzinsky, Y., 122–123
Gropen, J., 108
Gullah, 54–55
Haitian Creole, 54–55
Hawaiian Creole, 2, 55
Heine, B., 4
Holm, I., 1
home signs, 20
Horgan, D., 122
Horn, A., 24
Horn, P., 24
Hsu, J. R., 81–82
Hudson-Kam, C. H., 171
Hyams, N., 15, 16
Idioma de Signos Nicaraguense (ISN), 26
implicit arguments, in children’s interpretation of passive, 142–143
impoverished input, 27
innateness, 8–11, see also blind children, language acquisition by interdisciplinary work, value of, 6–7
Inuktitut, 167–168, 169
Isabelle, 17, 19
ISN, see Idioma de Signos Nicaraguense
Israel, M., 123
Iwata, G. A., 26
Jamaican Creole, 54–55
jargons, 1
Johnson, C., 123
judgment data, 64–65
experiments for, 76–77
Jusczyk, P. W., 10
K’iche Mayan, 169
Kandel, E. R., 9
Kaufman, T., 3
Kegl, J., 26
Kriegl, S., 52
Kriol, 54–55
Kuteva, T., 4
La Digue, 5
Landau, B., 23–24
language acquisition models, 15–17
Language Bioprogram Hypothesis, 3, 22–23
language deprivation cases, 18–20, see also Genie; Isabelle; Victor
language invention cases, 20–27
language models, language acquisition without, 166–168
Latinate restriction on the ditransitive alternation, 41
Lebeaux, D., 145
Lefèbvre, C., 3
Lenguaje de Signos Nicaraguense (LSN), 26, see also Idioma de Signos Nicaraguense
Lenneberg, E., 18–19
Levin, B., 41, 42
lexical learning hypothesis [LLH], problem posed by experiment 4 results, 103
logical problem of language acquisition, 12
Louisiana Creole, double-object construction, 43–44
LSN, see Lenguaje de Signos Nicaraguense
Lumsden, J. S., 3
Lust, B. C., 30
Léveillé, M., 111
Mühlhäuser, P., 1
Mahé, 5
Mandarin Chinese
serial verb constructions, 146
Maratsos, M., 10, 121, 122
Marcus, G. F. S., 170
Matthews, S., 4, 146
Mauritian Creole, 55
Mauritius, Republic of, 4–5, see also Morisyen
Mazurkewich, I., 107
McDaniel, D., 81–82
McKee, C., 81–82
McWhorter, J. H., 2, 4, 146
meaning, and verb behaviour, 106
Meisel, J., 15, 16–17
Michaels, S., 1
Mills, A., 121, 122
Morford, J., 20
Morisyen, 4–5
adjectival vs verbal passives, 46–49
differences from Seselwa
double-object construction, 39, 44
ditransitive verbs, 109–111
double-object construction, 36, 37–44
geny-passive, 47, 50–52
impersonal passives, 49–51
passive constructions in L1 acquisition, spontaneous data, 124–125
previously used Grimshaw and Rosen experiment, 84–85, 174–179
previous experiments, 81–84
spontaneous data, 80–81
serial verb constructions, 56–62
spontaneous data, 147–149
variability and ambiguity of input, 27–28
verbal passive, main properties, 53
Mufwene, S., 2, 3, 4
Muyssken, P. C., 4, 54–56
Mylander, C., 21–22
nativisation, 22
nativist/generativist/Universal Grammar approach, 15
negative evidence, role in L1 acquisition, 13–14
Negerhollands
double-object construction, 35, 107
serial verb construction, 54–55
neural network models, see connectionist neural network models
newborns, ability to discriminate first from other languages, 10
Newport, E. L., 17–18, 24, 25, 171
Nicaraguan sign language, 26–27, see also Idioma de Signos Nicaraguense; Lenguaje de Signos Nicaraguense
serial verb structures, 163–164, 168
null subject languages, 14–15
Null Subject Parameter, 14–15, 173
off-line thinking, and innateness, 11
optional infinitive stage, 16
overgeneralisation by children, 170–171
Papiamentu, 55
parameters in UG, 14–15, 173
party game scenario, 91–92
passive, 121
passive constructions, 44–46
distinction between adjectival and verbal passives, 46
in Creole children, 167–168
in first language acquisition, 121–123, 143
comprehension experiment, 125–135, 192–195
production experiment, 135–143, 195–197
spontaneous data, 123–125
lexical derivation, 44–45
syntactic derivation, 45–46
passive morpheme (PM), 44–45
PDC, see prepositional ditransitive construction
picture selection task, 73–74
pidgins, 1, 2, 22
Pinker, S., 10, 107–108, 121, 122, 164, 170
Plag, I., 2, 3
Plato's problem, see poverty-of-the-stimulus argument
PLD, see primary linguistic data
PM, see passive morpheme
Poeppe, D., 16
poverty-of-the-stimulus argument, 12, 27
Praslin, 5
prepositional ditransitive construction
(PDC), 35, see also ditransitive verbs and children, 106–107
primary linguistic data (PLD), 14
Principle B violation
children's knowledge of, 79
theories regarding, 79–80
Creole-speaking children, 78, 84–85, 166–167
conclusions, 104–105
proposition, 80
production data, 64
experiments for, 74–76
pronouns and reflexives, 30–33, 104–105
experiments
Morisyen-speaking children, 81–85
results, 100–103
Seselwa-speaking children, 85–100
importance in understanding mental representations for language, 78
in first language acquisition, 79–80
spontaneous data, 80–81
puppets
getting children familiar with, 76
use of asexual names, 85–86
Radford, A., 16–17, 88, 162
Ravel, J.-L., 6
regularisation of input by children, 171
Reinhart, T., 79–80
research directions, 172–173
resilient features, 21
Reunion Creole, 2, 55
reversal response, 129, 131–132
Rizzi, L., 16
Roeppe, T., 47, 136, 137, 160, 161, 167
Rosen, S., 81–82, 84, 174–179
Ross, D., 171
Saint Joseph Preschool, 66
Saint Lucia French Creole, double-object construction, 43
Sankoff, G., 2
Saramaccan
  double-object construction, 35
  impersonal passives, 51
  serial verb construction, 55
  serials of degree, 58
Schütze, C. T., 16
Schlisselberg, G., 64–65
scope of this study, 6
SDC (serial ditransitive constructions), 36
semantic distracter response, 131, 132
Senegal Creole, 55
Senghas, A., 26–27, 163–164
sensitive periods for language acquisition, 169
sentence completion task, 74–75
serial ditransitive constructions [SDC], 36
serial verb constructions [SVC]
  argument-introducing serials, 57, 58–59
  as evidence of West African languages’ influence on Creoles, 53–54
  aspectual serials, 58
  causative serials, 58
  classification of Creole languages with respect to, 54–56
  definitions, 53–54, 144
  directional serials, 56–57
  experiments, 161–164
  conclusions, 161–164
  method, 149–152, 198–199
  results, 152–160
  importance in grammatical theory, 144
  in Creole children, 168
  in first language acquisition, 145–146, 164–165
  multiple verbs, 60–62
  properties, 54
  resultative serials, 59
  serials of degree, 58
  spontaneous data, 146–149
Seselwa, 5–6
  adjectival vs verbal passives, 46–49
  differences from Morisyen
  double-object construction, 39, 44
  ditransitive verbs, 109
  double-object construction, 35, 37–44
  ganny-passive, 50–52
  impersonal passives, 49–51
  passive constructions in L1 acquisition comprehension experiment, 125–135
  spontaneous data, 123–125
  pronouns and reflexives, 32–33
  binding experiment 1, 85–89, 180–181
  binding experiment 2, 89–91, 182–185
  binding experiment 3, 91–95, 185–187
  binding experiment 4, 96–97, 187–188
  binding experiment 4 results, 98–103
  conclusions from experiments, 95, 103
  serial verb constructions, 56–62
  experiments, 161–164
  purdir, 151
  spontaneous data, 146–147
  variability and ambiguity of input, 27–28
  verbal passive, main properties, 53
