Based on unrestricted access to papers and personnel at BP, as well as numerous other sources, this second volume of BP’s history aims to be an honest and comprehensive examination of the Company in the period 1928 to 1954. Such a history inevitably touches on many different historical interests ranging from international relations to social, economic, political and military topics, primarily in Britain and the Middle East.

The book includes penetrating insights into the direction and management of the Company, the achievements and shortcomings of successive chairmen, and the relationship between the Company and its major shareholder, the British Government. It also deals in detail with matters which have retained an aura of controversy and mystique long after their occurrence, most notably the international petroleum cartel which sought to control world oil markets, and the major international crisis arising from Iran’s oil nationalisation.

Concluding his account of these events, Dr Bamberg calls into question some widely held views on the history of BP and the oil industry. Was it in BP’s interest to be closely identified with the declining imperial power of Britain during an age of rising nationalism? Did BP, as one of the famous ‘Seven Sisters’ of the oil industry, control its economic and political environment to its own advantage? Or was it buffeted and thrown off course by events beyond its control?

Introduction 1

Part I Depression, recovery and war, 1928–1945

1 Management and finance, 1928–1939 11
   The board of directors 13
   The management of operations in Iran 19
   Profits and finance 22

2 A new concession and a ‘fresh start’ in Iran, 1932–1939 27
   From Qajar to Pahlavi rule: the scene in Iran 28
   The cancellation of the D’Arcy concession 33
   The reactions of the Company and the British Government 34
   Appeal to the League of Nations 37
   The new concession 41
   A ‘fresh start’ 51
   More problems 54
   Conclusion 61

3 Operations and employment in Iran, 1928–1939 63
   Operations 65
   Employment 75
Contents

4 Co-operation in the markets, 1928–1939 106
   The Achnacarry Agreement and ‘As Is’ 107
   Joint marketing initiatives 117
   Sales and markets 119
   Shipping 134

5 Concessionary interests outside Iran, 1928–1939 142
   Colombia 143
   Venezuela 144
   Kuwait 146
   Iraq 155
   Concessions elsewhere 171

6 The British Government and oil, 1928–1939 174
   Oil in Britain and the Empire 176
   Oil from coal 179
   Aviation spirit 182
   Combination, rationalisation and prices 183

7 Research and technical progress, 1928–1939 189
   Oilfield technology 190
   ‘Cracking’ processes and motor spirit quality 192
   Alkylation and aviation spirit manufacture 198

8 War, 1939–1945 206
   Organising for war 206
   Shipping and the pattern of trade 216
   Wartime operations 219
   Profits and finance 225
   Planning ahead 226

9 Transition in Iran, 1939–1947 230
   The ‘make-up’ payments agreement 230
   Enter the Allies and a new Shah 235
   Company operations and employment 238
   Politics, foreign influence and oil concessions 250
   Conclusion 257

Part II Postwar expansion, 1946–1951

10 Management and finance, 1946–1951 261
   The board of directors and the Company’s organisation 261
   Profits and finance 273
Contents

11 The search for market outlets, 1943–1951 277
   Ideas of alliance with Royal Dutch-Shell 279
   Marketing aims and organisation 282
   Market-located refining and the expansion of shipping 287
   Product markets and sales 292
   Crude oil sales 301

12 The Company and the British Government, 1946–1951 308
   Government controls and the Company’s downstream plans 309
   The coal/oil conversion campaign 315
   The currency crisis: sterling oil and dollar oil 321
   The Government’s fiscal policy 324
   Fraser and the Government 326

13 Politics and joint interests in the Middle East, 1946–1951 329
   The USA, oil and the Middle East 329
   The Iraq Petroleum Company 334
   Kuwait 341
   Conclusion 344

14 Operations and employment in Iran, 1946–1951 347
   Operations 348
   Employment 356

Part III Crisis in Iran, 1947–1954

15 The Supplemental Agreement, 1947–1950 383
   Preliminary negotiations 385
   The Supplemental Agreement 393
   The fate of the Supplemental Agreement 399
   The Saudi Arabian 50:50 agreement 405
   Conclusion 408

16 Nationalisation, January–June 1951 410
   Countdown to nationalisation 414
   Appeal for arbitration 419
   The Jackson mission 422
   Takeover 430
   Conclusion 436

17 Eviction, June–October 1951 438
   The International Court’s interim ruling and the Harriman mission 438
# Contents

The Stokes mission 444  
Eviction 451  

18 Failed initiatives, October 1951–August 1953 459  
The McGhee–Musaddiq proposals, October–November 1951 460  
The International Bank’s proposals, November 1951–March 1952 465  
The idea of a management company, April–July 1952 469  
Musaddiq falls and rebounds, July 1952 471  
The Churchill–Truman proposals, July–October 1952 473  
Truman’s outgoing initiatives, November 1952–January 1953 479  
Last efforts with Musaddiq, January–July 1953 483  
Musaddiq’s overthrow, August 1953 488  
Conclusion 488  

19 The consortium, August 1953–October 1954 490  
Hoover steps in 490  
The formation of the consortium 495  
Final negotiations in Tehran 504  
Conclusion 509  

20 Conclusion 512  

Appendix 1 A note on statistics and their sources 523  
Appendix 2 Notes and sources to the graphs and diagrams 525  
Appendix 3 Draft Achnacarry Agreement, 18 August 1928 528

Preface

In volume 1 of *The History of The British Petroleum Company* (1982), Ronald Ferrier described the origins and development of BP in approximately the first three decades of the twentieth century. This volume follows on from where volume 1 left off and terminates with the settlement of the Anglo-Iranian oil nationalisation dispute in 1954.

The treatment is somewhat different from the preceding volume. In part this is attributable to the changing nature of the Company as it emerged from the early pioneering years and developed into a more corporate form of enterprise in a changed social, economic and political environment. Mainly, however, differences in style and approach between the two volumes arise from the change in author, which took place after I succeeded Ronald Ferrier as BP historian on his retirement in 1989. By that time he had done much work on the second volume, on which, despite ill health, he continued to work for another year before handing over to me in mid-1990. From that point on, I became responsible for the book.

Writers of commissioned histories tend to be suspected of compromising their impartiality and independence in obeisance to their paymasters, who, it is frequently supposed, seek to be shown in a favourable light. To counteract such suspicions, historians commonly insert disclaimers of bias or censorship in the prefaces of commissioned Company histories. In the case of this history of BP, the scope for doubting its honesty of purpose is if anything magnified by its being written, not by a commissioned outside historian, but by an historian in the employment of the Company. Those who are inclined to doubt the integrity of this history may be reassured to know that no restrictions were placed on access to sources of information in BP, or on the manner in which they were used; that BP’s pre-1955 archives, located
xxii

Preface

at the University of Warwick, are now open to outside access, enabling researchers to study the evidence used for this volume and draw their own conclusions; and that the research and writing of this volume was monitored by an Editorial Committee which included, for varying periods, not only successive BP chairmen (Sir David Steel, Sir Peter Walters and Robert Horton) and directors (Lord Robbins and Lord Greenhill), but also eminent external historians (Professor Alfred D. Chandler, Professor Donald Coleman and Dr Peter Mathias), whose combined experience, knowledge and critical acumen could at any time be exercised to uphold the integrity and standards of the history.

Of course, none of that can possibly guarantee that this volume will satisfy all who might be interested in it. Although the aim has been to achieve a full, balanced coverage of the Company’s activities, heed has also been taken of Voltaire’s cautionary maxim: ‘Le secret d’ennuyer est … de tout dire’ (‘The way to be a bore [for an author] is to say everything’). For that reason – and for the practical purpose of keeping the book to a manageable length – much detail has been excluded. As a result, there will surely be specialists in particular fields who feel that one aspect or another of BP’s history has been underemphasised or overlooked. While some may be disappointed by the treatment or exclusion of their special interests, there are others – particularly those who have made academic business history their speciality – with whom the whole idea of writing individual company histories is out of favour. Adherents to that school of thought hold that the most fruitful approach to expanding knowledge and understanding of the development of business is by the comparative analysis of a number of businesses, not by corporate biographies of single firms – a form of ‘life without theory’, as Disraeli described biography. It is indeed not difficult to find company histories which conform to that description. Yet there are also pitfalls in going to the opposite extreme and being too doctrinaire in stripping a business of its unique features, reducing enterprise to a mechanistic formula. Although there are repetitions in history, that is not to say that history repeats itself exactly. As Charles Wilson wrote some forty years ago, at the beginning of his classic history of Unilever: ‘There is no trick or sequence of tricks that can be learnt to be repeated successfully: too many factors are changing too much of the time’.

For the historian, dealing, like the businessman, with a myriad of variables and subjective factors, there can be no objectively perfect balance between biography and theory, narrative and analysis, qualitative judgement and statistical measurement. Unable to identify an
Preface

objective optimum, I have tried to interweave the Company’s unique characteristics and identity with topics of wider, comparative interest such as finance, marketing, organisation, technology and government relations. Much more space is devoted to international affairs than is usual in business histories, but that, I feel, is an accurate reflection of BP’s exceptionally deep involvement in matters of international diplomacy, particularly in relation to Iran. The balance and style will not, of course, suit every purpose or taste. Nor, on matters of interpretation, will my views meet with universal approval – an impossible prospect given the wide range of opinions which are held on some of the more controversial episodes in BP’s history.

A work such as this – extending over a number of historical disciplines and drawing on a great volume and range of sources – requires more than a solo effort. A most important contribution was made by the antecedent work of Laurence Lockhart and Rose Greaves, who in 1970 completed a meticulously researched multi-volume record of BP’s relations with the Iranian Government up to 1954 for in-house circulation only. Most of the subsequent research was done during Ronald Ferrer’s term as BP historian. Among his research assistants, Anne Ewing was concerned with British oil policy; Julian Bowden researched and wrote up the history of the Iraq Petroleum Company; Robert Brown provided information on the Company’s employment policies in Iran; Ewen Green produced interesting material on relations between the Company and the British Government after World War II, before moving on to a research fellowship at Brasenose College, Oxford and later to a lectureship at the University of Reading; Pamela Tansey investigated the Company’s marketing activities in continental Europe; and Anne Saunders was resourceful in locating relevant documents at the Public Records Office, Kew. Others who contributed to the history after retiring from their full-time employment with BP were Commander Edward Platt, who did much work on the history of the Company’s shipping activities; John Hooper, who was indefatigable in researching the technical side of the Company’s history; and Keith Taggart, whose skill in compiling the financial statistics was matched only by the pleasure of his company. In the later stages, after the research phase was largely over, Jenny Ward brought a fresh mind to the challenging task of unravelling and reducing the huge volume of material on the Company’s concessionary relations with Iran to manageable proportions. Throughout, the study of documentary evidence was enlivened by discussions with scholars and others – including many past and present BP employees – whose knowledge and
xxiv

Preface

recollections helped greatly to clarify subjects and events which might otherwise have remained obscure. They are too numerous for me to acknowledge every one individually, and to mention some would mean excluding others. In this invidious dilemma, I can think of no better course than to thank them all together.

Outside the circle of those involved with the research and writing were others who were concerned with supporting services and administration. The Company’s archivists – under first Janette Harley and later Anita Hollier – provided a first-class information retrieval service. Among those who provided secretarial support were, in the early days, Kay Underdown, held in very high esteem by Ronald Ferrier; Sandra Peters, who I shall always remember for showing the strength of mind not to go under as the paper piled higher; and Judy Scherbeneg, whose tact and efficiency in keeping the office wheels turning when I was preoccupied with the final stages of completing this volume went largely unsung at the time. I have also been extremely fortunate that the senior managers who have been administratively responsible for the history since I became BP historian have, without exception, been people who have combined highly professional managerial skills with a friendly and personal way of going about their business. They include David Walton, Dick Olver, Paul Fowler and, at the time of writing, Robert Pennant Jones.

Finally, I wish to express my gratitude to BP’s present board of directors for continuing to support the research and writing of this history – albeit on much reduced resources – during the unusually difficult times through which the Company has passed in recent years. Having spared the means, I hope they will be able to derive some pleasure from the result.

A note on the text

Country names

In general, countries are described by the names which were in use at the time. For example, Palestine is used instead of Israel before the state of Israel came into being. However, an exception is made in the case of Persia, whose name was changed to Iran in 1935. In referring to that country in this book, it would be confusing to use the name Persia up to 1935 and then to change to Iran because successive chapters of the book do not always follow one another in strict chronology. The name Iran has therefore been used throughout the text, except in quotations, which are verbatim and reflect the common western usage of the name Persia even after 1935.

Company names

The entity which is now known as The British Petroleum Company plc was called the Anglo-Persian Oil Company Limited when it was originally formed in 1909. In 1935 the name was changed to the Anglo-Iranian Oil Company Limited and in 1954 it was changed to The British Petroleum Company Limited. In order to avoid confusion, the entity which underwent these successive changes of name is referred to as the Company throughout the text. That term is not otherwise used as a proper noun, except where it forms part of another company’s name, for example in the Burmah Oil Company.
