Key to symbols used ix  Preface x

Introduction 1

Part One: Models of language development

1 The neogrammatarian model 17
   1 Basic issues 17
   1.1 Synchronic irregularity 17
   1.2 Cross-language similarity 21
2 The Indo-European languages 22
3 The neogrammarians 23
4 Sound change: the regularity principle 24
5 Analogy 32
   5.1 Analogical change 35
   5.2 Analogical creation 40
6 The interdependence of sound change and analogy 43
7 Phonological reconstruction (‘the comparative method’) 45
   7.1 Correspondence series and protosegments 46
8 Morphological and syntactic reconstruction 53
   8.1 Morphology 58
8.2 Syntax 60
9 Lexical reconstruction 61
10 Relatedness of languages (genealogical, or genetic, relationship) 63
   10.1 The family tree model 63
   10.2 Protolanguages 70

2 The structuralist model of language evolution 76
   1 Paradigmatic aspects of phonological change 77
      1.1 Structure 77
      1.1.1 Phonological segments 77
      1.1.2 Phonological features 80
Contents

1.2 Function 86
2 Traces of past phonological change remaining in morphological structure: internal reconstruction 89
3 Changes affecting grammatical categories and their exponents 99
4 Limitations of structuralist methods applied to diachrony 104

3 The transformational-generative model of language evolution 108
1 Phonological change 110
1.1 Innovation 114
1.2 Systematic restructuring: formal conditions 122
1.2.1 Rule simplification 123
1.2.2 Rule reordering 126
1.2.3 Reduction in rule input (lexical simplification) 131
1.3 Systematic restructuring: output conditions 132
1.3.1 Reordering which results in increased paradigmatic uniformity 132
1.3.2 The form of lexical entries 133
1.3.3 Phonotactic constraints 135
1.3.4 The motivation of systematic restructuring 136
1.4 Synchronic and diachronic grammars 140
2 Syntactic change 145
2.1 Changes in the syntax of the noun phrase 147
2.1.1 Changes in the transformational rule system 149
2.1.2 Changes in deep structure 154
2.2 Changes in the syntax of the verb phrase 159
2.3 Changes in the syntactic properties of lexical items 167

Part Two: Language contact 171
4 The neogrammarians postulates and dialect geography 173
1 The domain of a sound change 173
2 Lexical replacement: the failure of the ‘phonetic etymologies’ 183
3 Do dialect boundaries exist? 190
4 The wave theory 192
5 Mutual intelligibility 196
6 The social dimension 196

5 The social motivation of language change 198
1 The social stratification of language: the evaluation of linguistic variables 198
2 The synchronic reflection of historical change 204
3 The mechanism of language change 213
6 Contact between languages 216
   1 Lexical borrowing 217
      1.1 Loan-words 217
      1.2 Loan translations (calques) 232
      1.3 Semantic extension (semantic calques) 237
   1.4 The structural effects of lexical borrowing 239
   2 Grammatical borrowing 239
      2.1 Bilingualism and interference between languages 239
      2.2 Linguistic areas 244
      2.2.1 The Balkan linguistic area 246
      2.2.2 Europe as a linguistic area 248
   2.3 Restrictions on borrowing 253
   3 Pidgin and creole languages 256

7 Language and prehistory 262
   1 Classification and language history 262
      1.1 Typology and language history 262
      1.2 Glottochronology (or lexicostatistics) 266
   2 Linguistic reconstruction and prehistory 272
      2.1 The evidence of toponymy 273
      2.2 The evidence of the protolexicon 278
