## Subject index

- accelerative production functions, 60–2,  
 70, 74–5, 86, 92–3, 109, 166, 182,  
 184  
   curve, 59  
   derivative, 62–3  
   one-actor case, 69–70; derivative, 69;  
   equation, 69  
   positive interdependence, 63  
   simplifying assumptions, 64
- centralization, 105  
   defined, 105  
 cliques, 122–9  
   defined, 102, 124  
   mathematical model, 126  
   and network size, 125  
   simulation, 26  
   size, 125  
 collective action, 2, 5, 8, 11–12, 16–18,  
 30, 180  
   computer simulation, 192  
   decision models, 11  
   defined, 4–5  
   determinants of, 20–1  
   dilemma of, 34  
   government, 7  
   individual in, 5, 15, 26, 30  
   motivations for, 6–7, 9  
   rationale for, 5, 8, 11  
   theories of, 3–4, 7–8  
 collective dilemma, 193  
 collective good, 181; *see also* public good  
 continuous, 24  
   defined, 4, 41  
   lumpy, 24, 26  
   math model, 28  
 conjunction of probabilities, 27, 122  
 contracts, 101  
   all-or-none, 32–3  
 conventions, 94
- costs, *see* organizing costs  
 critical mass, 1, 10, 20, 49, 52–3, 56, 87–  
 8, 174, 181  
   and cliques, 128  
   mathematical model, 166  
   and reach trade-offs, 158  
   and resources, 169  
   theory of, 2, 9, 50
- decelerative production function, 60–2, 73,  
 79–80, 84, 89, 92–3, 181–3, 188  
   curve, 59  
   derivative of, 61  
   and negative dependence, 61  
   one-actor case, 68  
   order effects, 80–2  
   surplus, 83–4  
   and willing subsets, 80  
 decision making, 65  
   with full information, 65  
   group heterogeneity, 65  
   sequentiality in, 65  
 decision models, 11  
 density, 104  
   definition, 104  
   equation, 104
- efficacy, 9–10; *see also* noticeability, prob-  
 lems of  
   defined, 9  
 ego networks, 106  
 empowerment, 175  
 “exploitation of the great by the small,”  
 182
- free riding, 3, 6, 8–9, 14, 38, 47, 54, 85,  
 182  
   defined, 4  
   rational response, 4, 8, 47

## 204 SUBJECT INDEX

- group  
 defined, 5, 18  
 total contributions, expected, 138, 161–2, 169–71  
 group heterogeneity, 19, 65, 76, 110, 122–3, 134, 141, 143, 149  
 analysis of regression, 118  
 and decision making, 65  
 defined, 19, 110  
 effects of, 142  
 selection, 149–53  
 group homogeneity, 49, 50, 52, 72, 74–5  
 group outcomes, 109–10  
 defined, 109–10  
 group size, 39–41, 44–6, 48–9, 52–3, 55, 73–5, 115  
 economy of scale, 48  
 efficacy, 54  
 heterogeneity, 181, 184  
 jointness of supply, 43, 45, 181  
 mathematical model, 40–1  
 paradox of, 38f  
 and resource heterogeneity, 183  
 resources, 53, 56
- heterogeneity, *see* group heterogeneity; interest heterogeneity; resource heterogeneity
- incentives, 187  
 intrinsic, 188  
 manipulable, 189  
 material, 187  
 purposive, 187  
 solidary, 187
- independent decisions, 31, 32  
 mathematical model, 31–3
- indirect production, 89
- individual as rational actor, 3–5, 8–9, 19, 35, 47, 58, 61, 63, 65–6, 70, 73, 75  
 in collective action, 5, 15  
 cost–benefit formula, 162  
 expected contribution, 131–2  
 interest, 16  
 mathematical model, 15  
 resources, 16  
 threshold level, 172
- inflation function, 137f
- information, 131, 152, 184–5  
 cost of, 142–6, 155–6  
 full, 146  
 gathering and resources, 153  
 and large networks, 149  
 and mobilization, 154  
 models, 11  
 and organizing, 136  
 and selection, 133, 138, 140, 142  
 value of, 152
- interdependence, 9, 10, 30, 76  
 defined, 9  
 negative, 61  
 positive, 63
- interest, 16, 87, 115, 158, 167, 174–5, 178  
 defined, 16  
 distribution, 166  
 group, 18, 21  
 mathematical model, 164  
 mean level effect, 116–18  
 recruiting for, 176  
 and resources, 164, 185  
 selecting for, 172, 177
- interest heterogeneity, 108, 116, 118, 161  
 probability density function, 161–3
- jointness of interest, 74
- jointness of supply, 41–2, 48, 50, 52, 181, 187  
 definition, 41–2  
 group size, 43, 45, 49, 52  
 model of, 43  
 zero jointness, 48
- marginal returns, 92
- mathematical models,  
 cliques, 126  
 collective good, 28  
 consumer decision model, 164  
 expected contribution function at equilibrium, 162  
 group interest, 18, 19  
 group size, 40–1  
 independent decisions, 31–3  
 individual interest level, 172  
 interest density probability function, 161  
 interest level and resource ratio, 164  
 organizing costs, 35  
 probability density function, 161  
 production function, 25, 64, 168  
 resource density probability function, 161  
 resource level, 65  
 resources and interest, 163–6  
 selection, 136; ratio, 136–7, 140  
 selection strategies, 135  
 selectivity, 122, 131, 133; inflation

- function, 137–40; and partial information, 136; payoff derivative, 141, 144
- sequential interdependence, 32
- simultaneous coordinated action, 33
- standardization, 27
- standardized production function, 64
- subgroup targeting, 159
- theoretical framework for, 15, 16, 18–19, 24–6, 28
- total contribution, 148, 161, 167, 169
- mobilization
  - cost of, 144
  - and information, 154
  - trade-off, 155
- mobilizing agents, 2, 10, 54, 55, 88–9, 101–3, 158, 167–9, 181, 183
- decisions, 155, 160
- resources of, political and economic, 56, 135
- network(s), 54, 102, 105f, 112, 115, 147, 183
  - centralization, 110, 113–15, 120–1, 183–4; defined, 122; and weak ties, 122
  - defined, 102–3, 110
  - density, 110, 113, 121, 128
  - size of, 111, 113, 115, 122, 146, 149, 180; and information, 149
  - selectivity in, 130; defined, 130
- network effect, 184
- noticeability, problems of, 55; *see also* efficacy
- optimization, 71, 80
  - equation, 72
- organizers, 1, 34, 102, 115, 136, 158
  - decisions, 34, 155, 160
  - multiple, 36, 37
  - resources, 135, 130
- organizing costs, 34–5, 107, 110, 116, 118, 120–1, 130, 135, 188
  - defined, 107
  - mathematical model, 35
- outcomes, *see* group outcomes
- probability density function, 16
- production function(s), 24, 58–100, 163–6, 183, 188
  - accelerative, *see* accelerative production functions
  - curves, 59, 60
  - decelerative, *see* decelerative production functions
  - definition of variables, 24
  - diminishing marginal returns, 25
  - general third order, 70, 84, 93
  - homogeneous group, 71
  - increasing marginal returns, 25
  - linear, 67, 72–3; slope of, 24, 70
  - mathematical model, 64, 168
  - one-actor case, 66–8
  - standardized, 64
- public good; *see also* collective good
  - defined, 41
- punishments, 188
- reach, 157–79
  - defined, 157
  - heterogeneity, 185
  - resource distribution, 185
  - and selection, 158
- recruitment, 158–63
  - for interests, 161
  - for resources, 161
  - strategies, 159, 166, 175–80, 185–6
- resource heterogeneity, 65, 86, 108, 116, 122, 125, 128, 141, 146, 161
  - density probability function, 101f
  - distribution, 110, 134, 161
  - and group size, 183
- resources, 16, 54, 56, 75, 87
  - constraints, 152, 154
  - definition, 17, 20–1
  - distribution of, 50, 52, 154, 166, 185
  - and group size, 52
  - heterogeneity of, 65, 86
  - and information gathering, 153
  - and interest, 164; mathematical model, 164
  - level of, 174, 175
- rewards, 188
- sanctions, 190
- selection strategies, 135
  - hypothesis, 179
  - for increasing  $n$ , 148
  - for interest, 172, 176–7
  - mathematical model, 135
  - for resources, 173
  - targeting the big, 135
- selectivity, 121, 149, 157–79, 184–5
  - defined, 121–2, 186
  - equation, 122
