CHAPTER I

Introduction

CHAPTER II

Initiation of Explosion by Friction

CHAPTER III

Initiation by Impact of Explosion in Liquids
CONTENTS

CHAPTER IV

Initiation by Impact of Explosion in Solids

4.2. Time from impact to initiation, p. 61. 4.3. The influence of grit, p. 63. 4.4. Size of hot spot, p. 64. 4.5. Initiation by impact of explosion in primary explosives, p. 65. 4.6. Hot spots in the ignition of gunpowder, p. 66.

CHAPTER V

The Growth of Explosion to Detonation

5.1. Types of camera used, p. 67. 5.2. Growth of explosion in liquids, p. 70. (1) Explosions obtained with cavity strikers, p. 70. (2) Explosions between flat surfaces, p. 74. (3) Growth of explosion in liquids other than nitroglycerine, p. 82. 5.3. Growth of explosion in solid secondary explosives, p. 82. (1) Propagation in P.E.T.N., p. 82. (2) Propagation in cyclonite and tetryl, p. 83. 5.4. Growth of explosion in primary explosives, p. 86. 5.5. Nature of the initial burning region, p. 88. ‘Critical size’ and detonation of explosives, p. 88. 5.6. Low-velocity detonation, p. 93. 5.7. The burning of some propellants, p. 93. 5.8. Gaseous products of explosion, p. 95. 5.9. High-velocity detonation, p. 96.
