MY FRIEND
LOUIS WERNER
IN GRATITUDE
FOR HIS INESTIMABLE AID

CONTENTS

INTRODUCTION	<i>page</i> 1
PART I: THE UNCONNECTED MANIFOLD	
<i>Chap.</i> I Invariance; Vectors and Tensors	4
II Integrals. Densities. Derivatives	14
Integrals; Densities, p. 14. Derivatives, p. 21.	
PART II: AFFINELY CONNECTED MANIFOLD	
III Invariant Derivatives	27
IV Some Relations between Ordinary and Invariant Derivatives	34
V The Notion of Parallel Transfer	39
VI The Curvature Tensor	43
The question of integrability, p. 43. The curvature tensor, p. 47.	
VII The Geodesics of an Affine Connexion	53
VIII The General Geometrical Hypothesis about Gravitation	56
The underlying idea, p. 56. The law of gravitation, p. 59.	
PART III: METRICALLY CONNECTED MANIFOLD	
IX Metrical Affinities	63
General investigation, p. 63. Some important facts and relations, p. 69. Geodesic coordinates, p. 72.	
X The Meaning of the Metric According to the Special Theory of Relativity	74

CONTENTS

Chap. XI Conservation Laws and Variational Principles 87

The elementary notion of conservation laws, p. 87. How conservation laws follow from a variational principle in classical (pre-relativistic) theories, p. 91. Conservation laws in general relativity, p. 93. Einstein's variational principle, p. 97. Non-invariant form of the conservation laws, p. 99.

XII Generalizations of Einstein's Theory *page* 106

An alternative derivation of Einstein's field equations, p. 106. The Einstein-Straus-theory, p. 108. The purely affine theory, p. 112. Discussion of the preceding theories, p. 115. Mathematical appendix to Chapter XII, p. 116.
