---

- Abelson, Robert P., 90, 101  
 Aggregated data, 15  
 Aggregation procedures, 71–72  
 American Psychological Association, 74, 101  
 Archer, Dane, 40, 102  
 Arithmetic mean, 18  
 Armor, David J., 77, 101
- Balaam, L. N., 46, 101  
 Battig, William F., 23, 101  
 Between-subjects, 66–67  
 Bonferroni approach, 45–46  
 Box, George E. P., 46, 101
- Campbell, Donald T., 90, 103  
 Cochran, William G., 11, 45–46, 49, 101, 103  
 Cohen, Jacob, 101  
 Column contrast weights, 28–30  
 Column effects, 6–9, 28–30, 32, 34, 36–38, 40, 69–70  
 Combining columns, 36  
 Companionship study example, 29–39  
 Comparing treatment means, 3  
 Comparisons, 3–4
  - incidental, 3
  - planned, 3, 9
  - post-hoc, 3, 9
  - of treatment means, 3
 Computing contrasts, 52–56  
 Consensus tests, 72–73
- Contrast weights, 18–19  
 Converse, John, Jr., 23, 101  
 Cooper, Joel L., 23, 101  
 Couch, Arthur S., 77, 101  
 Crossed contrasts, 28–36  
 Cubic polynomial, 19–20  
 Cubic trend, 60–62
- D'Agostino, Ralph B., 49, 101  
 Data-Text, 77, 79  
 Depression study example, 24–39, 41–42  
 Diagnosis of effects, 70–71  
 DiMatteo, M. Robin, 40, 102  
 Dobrian, Louise, 100  
 Dusek, Jerome B., 102
- Eagly, Alice H., 23, 101  
 Edwards, Allen L., 49, 101  
 Effect size, 9–10, 14, 62–64, 73  
 Eta, 14  
 Evaluation apprehension study example, 43–44  
 Expectancy, interpersonal, 43–44  
*F*, extended table of, 97–100  
*F* ratios, 74–77  
*F* test, 11–13  
 Federighi, Enrico T., 96  
 Focused test, 1
- Grant, David A., 23, 101  
 Green, Bert F., 71, 101

Index

[More information](#)106 *Index*

- Hall, Judith A., 40, 102  
Hall, Vernon C., 102  
Harmonic mean, 17–18  
Harris, Richard J., 45  
Hays, William L., 3, 45–46, 102  
Homogeneity of covariances, 64–65  
Hospitalization study example, 29–39
- Incidental comparisons, 3  
Inconsistent tests, 73  
Individual contrast scores, 56–62  
Interaction contrasts (*See* crossed contrasts)  
Interaction effects, 6–8, 38–40  
Interpretation of contrasts, 34–35
- Jacobson, Lenore, 43, 102
- $\lambda$  Lambda weights (*See* weights)  
Levin, Smadar, 48, 102  
Lindquist, E. F., 100  
Linear polynomials, 19–20  
Linear trend, 27, 54–62, 67–68  
Linear relationship, 23  
Linear results, 19  
Luchins, Abraham S., 23, 102  
Luchins, E. H., 23, 102  
Lunney, Gerald H., 49, 102
- MPBS (Maximum possible benefit score), 86–87  
MPC-F (Maximum possible contrast F), 74–84  
McGuire, William J., 23, 102  
Main effects, contrasts for, 24–28  
Malmo, Robert B., 23, 102  
Maximum possible benefit score (MPBS), 86–87  
Maximum possible contrast *F* (MPC-F), 74–84  
Mean opinion scores, 6, 8  
Mean polish, 36  
Medication study example, 41–42  
Meyer, William J., 102
- Morrison, Donald F., 45, 102  
Multiple error terms, 82–83  
Myers, Jerome L., 45
- NCBM (Net contrast benefit measure), 86–87  
Net contrast benefit measure (NCBM), 86–87  
Net information per contrast *df*, 86  
Nonlinear relationships, 23  
Nonlinear results, 19  
Nonorthogonal contrasts, 21–23  
Nonverbal sensitivity study example, 43–44
- Obsessive-compulsive patients study example, 41–42  
Omnibus test, 1–4, 9  
Orthogonal contrasts, 18–19  
Orthogonal polynomial-based contrasts, weights for, 92  
Orthogonal polynomials, 19–21, 27
- POPBS (Proportion of possible benefit score), 87  
Partial aggregation, 72  
Pavlov, Ivan P., 102  
Pfungst, Oskar, 102  
Planned comparisons, 3, 9  
Planned contrasts, 45–47  
Polynomials:  
    cubic, 19–20  
    linear, 19–20  
    quadratic, 19–20  
Population variance, 64  
Post-hoc comparisons, 3, 9  
Pre-analysis, 43–44  
Proportion of possible benefit score (POPBS), 87  
Proportions, contrasts in, 47–49  
Psychotherapy study example, 29–39  
Pygmalion, 102
- Quadratic polynomials, 19–20, 27  
Quadratic trend, 54–62, 67–68

- r*, 9–10, 14–15  
 Repeated-measures, 50–51  
 Residuals, 36  
 Rogers, Peter L., 40, 102  
 Rosenthal, Robert, 9–10, 17, 32, 40, 43, 45, 49, 73–74, 92, 102  
 Rosnow, Ralph L., 4–5, 9, 17, 23, 32, 49, 92, 102–103  
 Row contrast weights, 28–30  
 Row effects, 6–9, 28–30, 32, 34–38, 40  
 Rubin, Donald B., 10, 43, 45, 48, 73, 102  
  
 Scheffé test, 46–47  
 Schultz, Duane P., 23, 103  
 Schwartz, Richard D., 90, 103  
 Sebeok, Thomas A., 102  
 Sechrest, Lee, 90, 103  
 Siegel, Sidney, 93  
 Significance, 9, 14  
 Significance tests, 1, 9–10  
 Size of effect, 9–10, 14, 62–64, 73  
 Size of study, 9–10  
 Snedecor, George W., 11, 45–46, 49, 103  
  
 Spear-Man study, 1  
 Standard normal deviates, table of, 93  
 Standardized contrast scores, 54  
  
*t*, extended table of, 94–96  
*t* test, 10, 16–17  
 tests of significance, 1, 9–10  
 Thorndike, Edward L., 23, 103  
 Total aggregation, 72  
 Tukey, John W., 71, 101  
  
 Unequal *n* per condition, 17  
 Unplanned contrasts, 45–47  
 Unweighted means, 17–18  
  
 Webb, Eugene J., 90, 103  
 Weights, lambda ( $\lambda$ ), 3, 11–13, 15–19, 20–22, 25–27, 67–71  
*Who's Who in America*, 48  
 Winer, B. J., 46, 49, 103  
 Wired-in contrasts, 40–42  
 Within-subjects, 50–51, 66–67
