- Environmental assumptions, 4–6, 10, 153
 free disposals
 defined, 5
 effects of, 8, 9, 29–30, 31, 36, 42–3, 84–5
 free gifts
 defined, 5
 effects of, 8, 9, 23–8, 31, 42–3, 84
 Environmental bonds, 164–6
 Environmental chains, 33–4, 44–6, 89–90, 111, 116, 119, 121
 Environmental long period, 116–17
 Environmental (natural) resources, 11, 151; *see also* Depletion
 common property principle, 161–2
 durable, 36–41
 exhaustible, 40, 125
 nondurable, 41–2
 renewable, 39–40, 125
 Environmental short period, 116
 Environmental strategies
 the market solution
 environmental external effects and, 2
 intertemporal efficiency, 130–2, 150–2
 optimal depletion, 48–9, 136–8
 Pigouvian taxes and, 132, 138
 property rights and, 82–3, 130–2
 rate of time preference and, 12, 128, 138–40, 150–2
 quiescent
 environmental external effects, 145, 147
 in primitive societies, 144–7
 rate of time preference and, 150–2
 the stationary state and, 141–4, 148–50
 sustainable
 common property principle, 160–3
 private accountability principle, 163–7
 Exactions; *see* Depletion
 Exhaustible resources; *see* Depletion, Environmental resources
 External effects
 direct and indirect, 1–2, 86, 87–90, 111, 116
 in economic theory, 1–3, 6, 83–6
 environmental
 distributional conflict and, 103–7
 environmental chain and, 111, 116, 163–7
 property rights and, 83, 88–91, 93–4
 qualitative and quantitative, 85
 technological change and, 11, 111–12
 time preference and, 116–24, 119–21, 122–4, 163–7
 internalization of, 131–2, 163–4
 Factors of production; *see* Distribution
