SUBJECT INDEX

Acceleration potential 111
Acoustical
  equation 27, 30, 114
  theory 2, 10, 12, 14
Advancing wave 9
Aerodynamic
  damping 39, 53, 61, 89, 125
  forces (*see* generalized aerodynamic forces)
  stability derivatives 8, 37, 38, 53, 61, 125
Aileron buzz (*see* control surface buzz)
Airfoils (*see* two-dimensional flow)
Apex, solution near apex of delta wing 95
Approximate solutions
  for low aspect ratio delta type wings 32, 51, 96
  for low aspect ratio rectangular wings 41
  for low aspect ratio wing–body combinations 55
  for high aspect ratio rectangular wings 73, 85
  for flow with shock waves 110
  for wings of arbitrary planforms 107
Arbitrary aspect ratio
  delta wings 91
  rectangular wings 76

Bernouilli equation 2
Body, effect on damping in pitch 61
Boundary conditions 5
Boundary layer separation, effect of 120

Concave leading edge, effect on damping in pitch 39
  polygonal planforms 104
Conformal transformation, use of 56
Continuity equation 1
Control surface
  buzz 110
  solution for rectangular control surface 86
Convergence
  of series solution for delta wing 94
  of series solution for rectangular wing 78
  of Fourier integral 22
Convex
  leading edge, effect on damping in pitch 39
  polygonal planforms 99

Cropped delta wing 51
Cut-off delta wing 96

Damping derivatives 8, 17, 37, 53, 61, 89, 125
Damping in pitch 17, 37, 39, 54, 62, 125
Dampometer 124
Delta wing
  of arbitrary aspect ratio 91
  of low aspect ratio 32
  stability derivatives for 37
Dimensionless parameters 5

Equations of motion 1
Equivalence law, transonic x, 7
Experimental
  results 124
  methods for determining air forces 124
Exponential terms
  in solution for low aspect ratio delta wings 27
  in solution for low aspect ratio rectangular wings 50
  in solution for a cropped delta wing 52

Flutter vii, ix, 90
Forces (*see* generalized aerodynamic forces)
  Fourier transform 21, 24, 32, 41, 63, 76, 95, 101

Generalized aerodynamic forces 15, 36, 48, 86
Green's
  formula, use of 77
  function 78
Glauert
  series 48
  variables 42

Harmonic oscillations 5, 15
Hinge
  moment 16, 88
  moment damping 89, 110, 120, 121

Index
More information

Influence region (*see also* upstream influence) 12
Interference
  between side edges 73, 89
  between wing and body 35, 62
  wind tunnel wall interference 123
Isentropic flow 2

Kernel-function method 107
Kirchhoff's approximation 28, 77, 89
Kutta condition 11, 21, 99, 113, 116

Lift distribution 72, 73, 74, 83, 89
Linearization
  of equations of motion 7
  of tangency condition 6
Low aspect ratio
  delta wings 20, 32, 96, 124
  rectangular wings 41
  wing–body combinations 55, 125

Mach number, influence of 11, 13, 18, 26, 27, 30, 90, 111, 125

Non-linear
  effects 14, 125
  equations of motion 2

Oscillating shock waves (*see also* shock waves) 110

Planar wings 6
Planform, influence on damping in pitch 39
Pressure coefficient 10, 15, 27, 28, 99, 105, 116

Quasi-steady stability derivatives 8, 38, 53, 61, 127

Radiation condition 113
Rankine–Hugoniot conditions for shock wave 112
Receding wave 9, 19, 30, 127
Rectangular wing
  of arbitrary aspect ratio with control surface 76
  of low aspect ratio 41
  of high aspect ratio 73
  semi-infinite 63
Reduced frequency, definition of 5
Rounded planform, effect on damping in pitch 39

Semi-infinite rectangular wing 63
Shock induced separation 120
Shock waves 2, 11, 110
Side edge effects 72, 88
Similarity law for unsteady transonic flow 18
Stability derivatives (*see* aerodynamic stability derivatives)
Strip theory ix, 73, 86, 90
  correction coefficients 15, 72, 74
  for slightly subsonic flow 27
  for slightly supersonic flow 26
  for sonic flow 24
  for swept wings 30
Swept
  leading edges x, 20, 25, 30, 100
  trailing edges 21, 100, 107

Tangency condition 55
Transformations of the equations of motion 21
Two-dimensional flow (*see also* strip theory) 9, 11, 24, 111

Upstream influence 14, 16, 26, 86

Velocity potential, definition of 2

Wake 21, 29, 99, 104, 113
Wind tunnel
  measurements 123, 124
  wall interference 123
Wing–body combinations 55, 125
