	<i>Editor's preface</i>	x
	<i>General introduction</i> by Eric Watkins	xiii
1		
	<i>Thoughts on the true estimation of living forces and assessment of the demonstrations that Leibniz and other scholars of mechanics have made use of in this controversial subject, together with some prefatory considerations pertaining to the force of bodies in general (1746–1749)</i>	I
	Translated by Jeffrey B. Edwards and Martin Schönfeld	
2		
	<i>Examination of the question whether the rotation of the Earth on its axis by which it brings about the alternation of day and night has undergone any change since its origin and how one can be certain of this, which [question] was set by the Royal Academy of Sciences in Berlin as the prize question for the current year (1754)</i>	156
	Translated by Olaf Reinhardt	
3		
	<i>The question, whether the Earth is ageing, considered from a physical point of view (1754)</i>	165
	Translated by Olaf Reinhardt	
4		
	<i>Universal natural history and theory of the heavens or essay on the constitution and the mechanical origin of the whole universe according to Newtonian principles (1755)</i>	182
	Translated by Olaf Reinhardt	
5		
	<i>Succinct exposition of some meditations on fire (1755)</i>	309
	Translated by Lewis White Beck	
6		
	<i>On the causes of earthquakes on the occasion of the calamity that befell the western countries of Europe towards the end of last year (1756)</i>	327
	Translated by Olaf Reinhardt	
7		
	<i>History and natural description of the most noteworthy occurrences of the earthquake that struck a large part of the Earth at the end of the year 1755 (1756)</i>	337
	Translated by Olaf Reinhardt	

Contents

8	<i>Continued observations on the earthquakes that have been experienced for some time</i> (1756) Translated by Olaf Reinhardt	365
9	<i>New notes to explain the theory of the winds, in which, at the same time, he invites attendance at his lectures</i> (1756) Translated by Olaf Reinhardt	374
10	<i>Plan and announcement of a series of lectures on physical geography with an appendix containing a brief consideration of the question: Whether the West winds in our regions are moist because they travel over a great sea</i> (1757) Translated by Olaf Reinhardt	386
11	<i>New doctrine of motion and rest and the conclusions associated with it in the fundamental principles of natural science while at the same time his lectures for this half-year are announced</i> (1758) Translated by Olaf Reinhardt	396
12	<i>Review of Silberschlag's work: Theory of the fireball that appeared on 23 July 1762</i> (1764) Translated by Eric Watkins	409
13	<i>Notice of Lambert's correspondence</i> (1782) Translated by Eric Watkins	414
14	<i>On the volcanoes on the Moon</i> (1785) Translated by Olaf Reinhardt	418
15	<i>Something concerning the influence of the Moon on the weather</i> (1794) Translated by Olaf Reinhardt	426
16	<i>Physical geography</i> (1802) Translated by Olaf Reinhardt	434
