Econometric Society Monographs

Editors:

Jean-Michel Grandmont *Centre d'Études Prospectives
d'Économie Mathématique Appliquées à la Planification,
Paris*

Charles F. Manski *University of Wisconsin, Madison*

The Econometric Society is an international society for the advancement of economic theory in relation to statistics and mathematics. The Econometric Society Monograph Series is designed to promote the publication of original research contributions of high quality in mathematical economics and theoretical and applied econometrics.

Other titles in the series:

Werner Hildenbrand, Editor *Advances in economic theory*

Werner Hildenbrand, Editor *Advances in econometrics*

G. S. Maddala *Limited-dependent and qualitative variables in econometrics*

Gerard Debreu *Mathematical economics*

Jean-Michel Grandmont *Money and value*

Franklin M. Fisher *Disequilibrium foundations of equilibrium economics*

Bezalel Peleg *Game theoretic analysis of voting in committees*

Roger Bowden and Darrell Turkington *Instrumental variables*

Andreu Mas-Colell *The theory of general economic equilibrium*

James J. Heckman and Burton Singer *Longitudinal analysis of labor market data*

Cheng Hsiao *Analysis of panel data*

Truman F. Bewley, Editor *Advances in economic theory—Fifth World Congress*

Truman F. Bewley, Editor *Advances in econometrics—Fifth World Congress (Volume I)*

Truman F. Bewley, Editor *Advances in econometrics—Fifth World Congress (Volume II)*

Hervé Moulin *Axioms of cooperative decision making*

Contents

| | |
|---|----------------|
| Acknowledgments | <i>page xi</i> |
| Chapter 1. Introduction: Disequilibrium analysis and the theory of value | 1 |
| 1.1 Introduction | 1 |
| 1.2 The importance of disequilibrium analysis | 3 |
| 1.3 An alternative possibility: Always-clearing markets | 5 |
| 1.4 Why study the stability of general equilibrium? | 7 |
| 1.5 Toward a satisfactory dynamic theory | 9 |
| 1.6 Path-dependence, hysteresis, and comparative statics | 14 |
| PART I. METHODS AND PROBLEMS OF THE GENERAL EQUILIBRIUM STABILITY LITERATURE | |
| Chapter 2. The development of the stability literature | 19 |
| 2.1 Introduction | 19 |
| 2.2 Tâtonnement: Local stability | 19 |
| 2.3 Tâtonnement: Global stability | 24 |
| 2.4 Trading processes: Pure exchange | 27 |
| 2.5 The Hahn Process | 31 |
| 2.6 Firms (but no production) in the Hahn Process | 36 |
| 2.7 Consumption and production out of equilibrium: Commodity dating, nonperformance, and the Present Action Postulate | 41 |
| 2.8 Individual price adjustment | 47 |
| Chapter 3.* Hahn Process models: Formal treatment | 51 |
| 3.1 Introduction | 51 |

* Contains technical material and may be omitted without loss of continuity.

|------|---|------------|
| viii | Contents | |
| 3.2 | Pure exchange and no money: Notation and model | 52 |
| 3.3 | The behavior of target utilities | 55 |
| 3.4 | Compactness | 56 |
| 3.5 | Global stability | 58 |
| 3.6 | Firms (but no production) | 62 |
| 3.7 | Households, money, and firm ownership | 65 |
| 3.8 | Walras' Law and equilibrium | 66 |
| 3.9 | The dynamics of the model: Money and trade | 68 |
| 3.10 | Target profits, target utilities, and quasi-stability | 70 |
| 3.11 | Compactness again | 73 |
| 3.12 | Global stability again | 78 |
| | PART II. A MODEL OF DISEQUILIBRIUM WITH ARBITRAGING AGENTS | |
| | Chapter 4. Allowing disequilibrium awareness | 85 |
| 4.1 | Toward a more sensible model | 85 |
| 4.2 | The appearance of new opportunities: No Favorable Surprise | 86 |
| 4.3 | The timing of optimal programs | 94 |
| 4.4 | The Dated Commodities problem and individual price adjustment | 97 |
| 4.5 | Nonperformance and bankruptcy | 98 |
| 4.6 | The nature of equilibrium and the role of money | 100 |
| | Chapter 5. The theory of the individual agent | 102 |
| 5.1 | Introduction | 102 |
| 5.2 | Money, bonds, and relative prices | 103 |
| 5.3* | Instantaneous discount rates and topology | 105 |
| 5.4 | The arbitrating firm: Assumptions | 109 |
| 5.5 | The arbitrating firm: Optimal production and optimal arbitrage | 112 |
| 5.6* | The arbitrating firm: Formal treatment | 116 |
| 5.7 | The arbitrating household: Assumptions | 123 |
| 5.8 | The arbitrating household: Results | 126 |
| 5.9* | The arbitrating household: Formal treatment | 129 |
| | Chapter 6. Transaction difficulties, individual price offers, and monopoly power | 138 |
| 6.1 | Introduction | 138 |
| 6.2 | Smooth transaction costs | 140 |
| 6.3* | Smooth transaction costs: Formal treatment | 148 |
| 6.4 | Transaction constraints and individual price offers | 151 |
| 6.5* | Transaction constraints: Formal analysis | 156 |
| | Chapter 7. Walras' Law and the properties of equilibrium | 158 |
| 7.1 | Walras' Law | 158 |

Acknowledgments

This book was written during my tenure as a John Simon Guggenheim Memorial Fellow in 1981–2. It was begun and later revised during visits to the Institute for Mathematical Studies in the Social Sciences at Stanford, but was largely written while visiting Harvard University. It reflects, however, many years of teaching and writing about these subjects at my home institution, M.I.T.

I am indebted to a number of people for discussions on this subject; some of them are thanked in my earlier papers, upon which the present work is based, and I trust I may be forgiven for not repeating those acknowledgments here. I do wish, however, to thank those who helped directly with this book, while absolving them of responsibility. Richard Ericson, Andrei Schleifer, and Suzanne Scotchmer regularly attended my lectures while I was writing the book and provided a most encouraging sense of excitement as well as a number of very insightful discussions. Fernando M. C. B. Saldanha and Robert M. Solow read the manuscript and gave me very helpful comments.

Frank Hahn also read and commented extensively on the book. It was he who suggested that I write it – a suggestion that I was extremely pleased to accept and that I trust he does not now regret. My intellectual debt to him is very great and is evident throughout the work.
