Blaschke product approach 365  
critical points and minimum points 363  
generalisations 367  
proof for critical points on circle 361–2  
proof for degrees 2, 3, 4 359–60  
real critical points 368  
Smith, W. 306  
solving algebraic equations 20  
sphere 80  
starlike, of order 1/2 275  
starlike approximation lemma 276, 283  
starlike domain 33  
starlike function condition 275  
step function 378  
and convex curve 392  
stereographic projection 38, 80  
strictly positive operator 138  
strongly real meromorphic function 327  
inequality 332  
representation theorem 327  
strongly real rational function 319  
critical point 321  
example 321  
positive or negative type 321  
strongly real interpolation theorem 320  
subordination 168  
subordination inequality 239  
subordination principle 234  
successive derivatives 413  
Szegő’s theorem 407  
extension 413  
Suffridge, T.J. 241  
Suffridge class 253  
coefficient bound 260  
duality condition 253  
Suffridge univalence criterion 243  
Suffridge’s convolution theorem 254, 261  
Suffridge’s extremal polynomials 251  
limits 238  
Suffridge’s theorem  
condition for proving containment 257  
proof of part (c) 255  
summability theory 145  
surface classification theorem 121  
surjectivity, failure of Pinchuk mapping 100  
Sylvester determinant 5  
Sylvester matrix 10  
Sylvester resultant  
evaluation 11  
extact degree 11  
of $P = w 11$  
Sylvester’s method of elimination 5  
Sylvester’s theorem 165  
symmetric linear form 181  
Smale’s conjecture 359  
Walsh’s theorem 182  
Szegő’s inequality 155  
$T(1, 1)$ class 271  
$T(1, \beta)$ classification 273–5  
$T(2, 2)$ class 302  
$T(\alpha, \beta)$ class 269, 289  
$T(m, \beta)$ class 282  
$T(\alpha, \beta)$ class 289  
tangent and argument of curve 387–90  
tangent vector, Jacobian conjecture 89  
Tochler, D. 360  
Topelitz theorem 131  
topological argument principle 44  
topology of mapping, Jacobian problem 89  
total variation of argument of curve 389  
trigonometric polynomial 3, 50, 144  
trigonometric series 125  
two circles theorem 188  
uniqueness theorem 2  
unit disc, zeros 373  
unit disc homeomorphisms 60  
unit element 127, 128  
univalence  
and angular separation of critical points 243  
and bounded boundary rotation 389  
univalence region 197  
univalence sector 200  
univalent polynomials 241  
variation 66, 72, 84  
vitushkin, A.G. 118
