CONTENTS

<i>Foreword</i> by Mary Warnock	ix
<i>Preface</i>	xi
1 Why did I write this book?	xi
2 Methodology	xiii
3 Outline of treatment	xiii
4 Acknowledgements	xviii
1 Introduction	1
1 Interest in the beginning of the human individual: the purpose of this book	1
2 Moral status of the human embryo in government reports	4
3 Problems of language	7
4 Considerations of method	12
(i) A case for philosophical induction	12
(ii) Philosophical conclusions to be based on scientific embryology	14
(iii) An inter-disciplinary task and its challenges	15
2 Historical influence of Aristotle on the theory of human reproduction	19
1 Why a return to Aristotle?	19
2 Philosophical underpinnings of Aristotle's theory of human reproduction	21
3 Aristotle's biology of human reproduction	25
4 Aristotle's philosophical theory of human reproduction	28
5 Aristotle's heritage and its unanswered questions	36
6 Aristotle's influence on Aquinas and Christendom	39
7 Harvey's refutation of Aristotle's biology of human reproduction	43

Table of Contents

[More information](#)

vi	<i>Contents</i>	
8	Decline of Aristotle's theory of human reproduction	47
9	Revival of Aquinas' version of Aristotle's theory of human reproduction	51
10	The Bible and the question of when a human being begins	52
11	The Catholic position on when a human being begins	57
12	Conclusion	64
3	Criteria for being a human individual	65
1	Ordinary knowledge of human individuals	65
2	Personalist understanding of the human individual	68
3	Metaphysical understanding of the human individual	72
4	The same human individual as an adult or infant person	75
5	The human individual prior to birth	79
6	The traditional concept of person	84
7	Criteria for the presence of a human individual	84
8	The concept of an ontological individual	86
9	The concept of a living ontological individual	91
10	A potential person	96
11	The task ahead	99
4	Fertilization and the beginning of a human individual	102
1	Fertilization	102
2	The case for a human individual beginning at fertilization	108
3	The case against a human individual beginning at fertilization	116
	(i) Genetic and ontological individuality	117
	(ii) Identical twinning in the zygote	119
	(iii) The zygote as a human individual in potency	122
	(iv) The life process of the zygote and personhood	124
	(v) Biological human nature and ontological human individuation	126
	(vi) Philosophical theories and biological facts	129
5	Implantation and the beginning of the human individual	132
1	The human individual not present during the early cleavage stage	132
	(i) Possibility of identical twinning during the early cleavage stage	132
	(ii) Lack of unity in the early human embryo	137
	(iii) Animal experiments suggest absence of unity and actual determination for the ontological human individual in the early embryo	139
2	The human individual not present during the morula stage	146
3	Parthenogenesis and the human individual	149
4	The human individual not present before completion of implantation	151
	(i) Biological facts of the blastocyst stage	151

Table of Contents

[More information](#)

<i>Contents</i>	vii
(ii) A distinct individual not formed prior to early differentiation of the blastocyst	156
(iii) Animal experiments show insufficient actual determination of the late blastocyst to be a distinct individual	158
6 The human individual begins after implantation	164
1 Distinctive development of Eutherian mammalian embryos	164
2 The human individual formed by the stage of gastrulation	168
3 The human individual begins at the primitive-streak stage	170
4 Significance of government reports	177
5 Relevance of natural pregnancy losses	180
6 Conclusion	181
<i>Appendixes</i>	183
I Timetable of human prenatal development up to the end of week 2	184
II Timetable of human prenatal development: weeks 3 to 6	185
III Timetable of human prenatal development: weeks 7 to 10	186
<i>Notes</i>	187
<i>Glossary</i>	210
<i>Index</i>	214
