CONTENTS

Preface	<i>page xi</i>
Preface to first edition	xxv
 Part I: What you always wanted to know about the philosophy of science but were afraid to ask	
1 From the received view to the views of Popper	3
The received view • The hypothetico-deductive model • The symmetry thesis • Norms versus actual practice • Popper's falsificationism • A logical fallacy • The problem of induction • Immunizing stratagems • Statistical inference • Degrees of corroboration • A central conclusion	
2 From Popper to the new heterodoxy	27
Kuhn's paradigms • Methodology versus history • Scientific research programs • Feyerabend's anarchism • Back to first principles • The case for methodological monism	
 Part II: The history of economic methodology	
3 The verificationists, a largely nineteenth-century story	51
The prehistory of economic methodology • Mill's essay • Tendency laws • Mill's <i>Logic</i> • Mill's economics in practice • Cairnes's <i>Logical Method</i> • John Neville Keynes sums up • Robbins's <i>Essay</i> • Modern Austrians	
4 The falsificationists, a wholly twentieth-century story	83
Ultraempiricism? • Apriorism once again • Operationalism • The irrelevance-of-assumptions thesis • The <i>F</i> -twist • The Darwinian survival mechanism • Naive versus sophisticated falsification-
