Preface *page* xi

PART I. Model Building

Chapter 1. Some Basic Results 3
1 Introduction 3
2 The Hazard Function 6
3 A Look at Some Data 14
4 The Exponential Distribution 17

Chapter 2. Covariates and the Hazard Function 21
1 Introduction 21
2 Time-Invariant Covariates 21
3 Time-Varying Covariates 23
Note 31

Chapter 3. Parametric Families of Duration Distributions 33
1 Introduction and Overview 33
2 Generalising the Error Distribution 35
3 Direct Specification of the Hazard 41
4 Some Other Models 47
5 The Concentration of Duration Distributions 50
6 Time-Varying Regressors 55
7 Concluding Remarks about Parametric Models 56
Note 57

Chapter 4. Mixture Models 58
1 Introduction 58
2 Some Arguments Leading to Mixture Models 59
3 Some Algebra of Mixtures 62
4 Local Mixtures 72

Table of Contents
More information

5 Generalised F 73
6 Joint Duration Distributions Generated by Mixing 75
Note 81

Chapter 5. Some Important Processes 83
1 Introduction and Overview 83
2 Poisson Processes 85
3 Renewal Processes 88
4 Alternating Renewal Processes 97
5 Multiple Destinations 99
6 Multiple Cycles and Multiple Destinations 108
7 The Wiener Process as a Duration Model 118
Note 121

Chapter 6. Some Structural Transition Models 122
1 Introduction 122
2 A Two-State Model of Optimal Job Search 123
3 A Three-State Model of Optimal Participation and Search 128
4 A Non-Stationary Model 132
5 A Non-Stationary Model with Learning 136
Note 142

PART II. Inference

Chapter 7. Identifiability Issues 145
1 Introduction 145
2 The Information in the Mixture Distribution 147
3 Identifiability with Proportional Hazards 148
4 A Functional Form for the Conditional Hazard 152
5 Identification with Multiple Destinations 154
6 The Finite Mean Assumption 155
7 Concluding Remarks on Identification 157
Note 158

Chapter 8. Fully Parametric Inference 159
1 Introduction and Overview 159
2 Single-Cycle/Flow Data 162
3 Other Single-Cycle Sampling Schemes 182
4 Unmeasured Heterogeneity in Single-Cycle Data 194
5 Multiple Cycle/Flow Data 208
6 Other Multiple-Cycle Sampling Schemes 215
7 Unmeasured Heterogeneity in Multiple-Cycle Data 217
8 Least Squares Estimators 219

Table of Contents
More information

9 Inference about Structural Models 222
Note 231

Chapter 9. Limited Information Inference 233
1 Introduction and Overview 233
2 Partial Likelihood 234
3 Other Limited Information Likelihoods 274
4 Some Non-Parametric Estimators 277
Note 293

Chapter 10. Misspecification Analysis 294
1 Introduction 294
2 Consequences of Misspecification 294
3 Local Misspecification 302
4 Some Other Misspecification Results 304
Note 305

Chapter 11. Residual Analysis 306
1 Introduction 306
2 Errors and Residuals 307
3 Multiple Destinations 313
4 Limited Information Residuals 317
5 Multiple Cycles 320
6 Miscellaneous Tests 322
Note 326

Appendix 1. The Gamma Function and Distribution 327
Appendix 2. Some Properties of the Laplace Transform 330
