

Contents

<i>Preface</i>	xi
1 The carbohydrates of glycoproteins	1
History	3
Microheterogeneity of bound carbohydrates	6
Function of bound carbohydrates	8
Inducible changes in bound carbohydrates	13
Programed changes in bound carbohydrates	17
A possible role for bound carbohydrates	19
2 Derivatives of neuraminic acid	23
Sialic acids	23
Distribution of sialic acids in nature	25
The state of sialic acids in nature	27
The metabolism of hexosamines and sialic acids	28
Metabolic control of hexosamines and sialic acids	37
Asparagine <i>N</i> -glycosylation	41
Processing of lysosomal enzymes	49
Biosynthesis of <i>O</i> -linked oligosaccharides	50
Modification of sialic acids	52
Sialidases (neuraminidases)	53
Genetic metabolic disorders involving sialic acids	57
Glycosidases	58
Bound carbohydrates in malignancy	61
3 Multidrug resistance	71
Properties of P-glycoprotein	72
Lysosomes and multidrug resistance	75
Kinetics of influx and efflux of drugs	79
Modulation of multidrug resistance	84

x	<i>Contents</i>	
	The role of lipids in the accumulation of drugs by MDR cells	86
	P-170 and membrane lipids	93
	Overview	99
	<i>References</i>	102
	<i>Index</i>	110
