Contents

List of contributors  ix

1 Down’s syndrome epidemiology and biochemical screening  1
   Ernest B. Hook

2 Perception of risk  Mary C.M. Macintosh  19

3 Risk estimation in Down’s syndrome screening policy and practice  Howard S. Cuckle  31

4 Screening by test combination: a statistical overview  T.M. Reynolds  47

5 Measurement of human chorionic gonadotrophin (hCG) as a screening test for Down’s syndrome  T. Chard and Ray Iles  73

6 The measurement of hCG subunits in screening for Down’s syndrome  Kevin Spencer  85

7 The measurement of free β-hCG in screening for Down’s syndrome  James N. Macri  101

8 Multiple hCG-related molecules  Laurence A. Cole  119

9 Is the measurement of unconjugated oestriol of value in screening for Down’s syndrome  Kevin Spencer  141

10 Inhibin and CA 125 in Down’s syndrome screening  Jan M.M. van Lith  163

11 Schwangerschafts protein 1 (SP1) and biochemical screening for Down’s syndrome  Mary C.M. Macintosh  171

12 Ultrasound and Down’s syndrome  Moshe Bronshtein and Zeev Blumenfeld  181

13 Prenatal diagnosis using fetal cells isolated from maternal blood  Sherman Elias and Joe Leigh Simpson  193
