0521455154 - Independent Random Variables and Rearrangement Invariant Spaces

Michael Sh. Braverman

Table of Contents

[More information](#)

CONTENTS

Preface	vii
Chapter I. Preliminaries	1
1. Rearrangement invariant spaces	1
2. The function of dilatation and Boyd indices	4
3. Independent random variables	5
4. Probability inequalities	7
5. Disjoint random variables	8
6. The Kruglov property	10
7. Bases and sequence spaces	17
8. Stable distributions	19
Chapter II. Inequalities for sums of independent random variables in rearrangement invariant spaces	21
1. Rosenthal's inequality and a characterization of the spaces L_p	21
2. Estimates of von Bahr—Esseen type	33
3. Upper estimates of the Rosenthal type	38
4. Estimates in exponential Orlicz spaces	42
Chapter III. Linear combinations of independent random variables in rearrangement invariant spaces	50
1. l_q -estimates ($q \neq 2$)	50
2. l_2 -estimates	70
3. Stable random variables with different exponents	77
4. Equidistributed random variables in exponential Orlicz spaces	83
Chapter IV. Complementability of subspaces generated by independent random variables	88
1. Subspaces generated by bounded random variables	88
2. Subspaces generated by equidistributed random variables	104
References	113
Index	116
