Adler consistency condition 133
Adler–Weisberger relation 131
algebra of currents 129
annihilation operator 24, 69, 80, 91, 258
anomaly 124, 131, 132, 136, 162, 164–6, 208
anticommutation rule 83, 84, 95, 167, 224–31, 257, 275

Bjorken–Drell metric 273–81
bound states 34, 35, 62–7, 124, 125, 174

Cabibbo angle 101–5, 108, 119, 123, 126, 130, 255
Cabibbo–Kobayashi–Maskawa matrix 105, 158, 254, 268
Campbell–Baker–Hausdorff equation 8, 9, 73, 220
causality 54, 81, 184
charge conjugation 78, 79, 210
charge renormalization 157
Chisholm identities 229
colour 158, 168, 249, 250, 256, 257, 269
compact group 3, 69
CPT transformation 79
creation operator 24, 80, 91, 251
cross section 32, 55–60, 62, 63, 94, 96, 98–101, 134, 138, 244
cutting equation 187–97, 199, 202, 204
cutting rules 207

decay
  muon 108–17
  neutron and hyperon 117–24
  neutral pion 131–6
  vector boson 105–8
  η 136
  π 101–5
  σ 61–2
decay rate 60, 61, 62, 104, 107, 110, 118, 121, 122, 123, 124, 127, 132, 134, 194, 196, 243, 244
dimensional regularization 116, 144, 145, 155, 156, 159, 192, 233–42
Dirac equation 76–9, 93, 104, 120, 128, 129, 162–6, 208, 210
dispersion relation 196, 200–4

electromagnetic (E.M.) field 10–12, 85–6, 169, 172, 173, 183
energy density 11

Fermi constant G_F 108–16
Feynman–'t Hooft gauge 249
Feynman rules
  for quantum electrodynamics 88
  for the Standard Model 258–72
  for the $\sigma\pi\pi$ model 46–54
Fiertz transformation 108–17
Fourier representation
  δ-function 52
  θ-function 50
Furry's theorem 210

gauge invariance 10, 12, 133, 134, 153, 172, 173, 179, 181, 183, 198
generalized Ward identities 180
Goldberger–Treiman relation 131

Higgs 157, 158, 162, 249, 250, 253, 254, 258, 259, 262, 265, 267

in- and out-states and fields 33–47

More information

interpolating fields 39–46
irreducible diagrams 147, 152
isospin 132, 136, 162, 220

Källén–Lehmann representation 196, 200–4
Klein–Gordon equation 18, 20, 29, 38, 39, 42

Lamb shift 154–7, 162
largest time equation 184, 185–8, 196, 197, 198
left handed photons 180–2, 205
Lehmann–Symanzik–Zimmermann formalism 32
leptons 119
lifetime 60–2, 104, 108, 110, 115, 127, 132, 244
light cone 13, 14, 23, 25, 26, 28, 81, 84, 85
Lippmann–Schwinger equation 66
locality 22, 23, 81, 91, 184
Lorentz condition 87, 183
low energy limit 19

Mandelstam variables 53
mass-shell 13, 28, 29, 35, 54, 55, 127, 178, 180, 181, 192, 202, 206, 211
Maxwell equations 10–12
Michel parameter 114, 115
$\overline{MS}$ subtraction scheme 144, 235
multiple commutators 8, 9, 220, 221, 223
muon decay 108–17

neutron decay 117–24
neutral pion decay 131–6
non-abelian 211
non-compact group 3, 69
normalization of polarization vectors 86, 171, 246
normalization of spinors 78
normalization of wave functions 18–20

overlapping divergencies 151

P-product 90
parameters
  free 147, 152, 153
  of the Lorentz group 3–7
  ρ 114, 157–62
parity 78, 125, 126
partially conserved axial current (PCAC) 124–36, 162, 163, 168, 208
Pauli metric 273–81
Pauli spin matrices 22, 230, 256
phase space 102, 109, 118, 120, 121, 132, 192, 197
pion decay
  charged 101–5
  neutral 131–6
Pion–nucleon coupling 119, 130, 131, 133
Planck–Einstein relation 15
plane wave 15, 16, 19, 54, 56
Poincaré invariance 1–14
power counting 144, 148–51, 154
probability current 19
probability density 18, 19
propagator 245–6
  for a scalar field 53
  for a spinor field 88
  for a vector field 88

quarks 105, 119, 125, 127, 129, 155, 158, 161, 163, 257, 268

radiative corrections
  Lamb shift 154–7, 162
  to ρ-parameter 157–62
reducible diagrams 147
renormalizable theories 147, 152, 154, 179, 262
Rutherford formula 57, 59, 63, 92, 93, 94, 97

Schrödinger equation 18, 60, 62–7
self-energy 92, 139, 145–55, 157, 159–61, 186–8, 190–3, 199, 200, 238, 247, 248, 251, 277
space reflection 2, 78, 125, 207
Standard Model 249–72
structure constants 9, 10, 220, 257, 272

tadpole diagram 90, 147, 149, 151, 248
time-ordered product 44, 88, 90, 91, 137, 181, 247
time reversal 2, 78, 79, 119
two body phase space 101–5, 194, 195
