Foreword by Tony Whitten, The World Bank	ix
Preface	xi
Acknowledgements	xiv
1 Biogeography: the nature of the subject, its history and its applications	1
1.1 Introduction	1
1.2 An introduction to plants, animals and other organisms	3
1.3 A history of biogeography	6
1.4 Ecology and biogeography	14
1.5 Applications of biogeography	15
1.6 Last frontiers for human exploration	20
1.7 Structure of the book	21
1.8 References	22
References	22
2 Patterns of distribution and biogeographical classifications	24
2.1 Introduction	24
2.2 A history of classification systems	25
2.3 Biogeographical classification at different spatial scales	36
2.4 Applied aspects	40
2.5 Gap analysis	44
References	47

Ian F. Spellerberg and John W. D. Sawyer

Table of Contents

[More information](#)

vi Contents

3 Islands	49
3.1 Introduction	49
3.2 Islands and island biogeography	50
3.3 Historically important studies	51
3.4 Island biology	59
3.5 Island biogeography: patterns	64
3.6 Island biogeography: the theories	68
3.7 Field studies of island biogeography	71
3.8 Conservation and restoration of island biota	73
References	74
4 Geological, evolutionary and human impacts on biogeography	76
4.1 Introduction	76
4.2 Clues to past events	77
4.3 Palaeoecology	81
4.4 Shifting continents	88
4.5 Land bridges and filters	89
4.6 Human impacts on biogeography	92
4.7 Ethnobotanical studies	93
4.8 Cultural impacts on biogeography	97
4.9 The influence of species distribution on society and culture	105
References	106
5 Ecological patterns and types of species distribution	108
5.1 Introduction	108
5.2 Patterns in the distribution of species and other taxonomic groups	110
5.3 Distributions of species or other taxa that have changed	112
5.4 Patterns in distribution of species abundance in space and time	114
5.5 Patterns in distribution of other levels of biological organisation	115
5.6 Patterns of species distributions in relation to abiotic and biotic factors	115
5.7 Applications	125
References	132
6 Biogeographical information: collection, retrieval and application	133
6.1 Introduction	133
6.2 Collecting information direct from biota	135
6.3 Information retrieval	138

Cambridge University Press

Ian F. Spellerberg and John W. D. Sawyer

Table of Contents

[More information](#)

Contents vii

6.4	Limitations of existing sources of information	148
6.5	How 'real' is the distribution?	149
6.6	How to present information about a species distribution	150
6.7	Some modern methods for mapping species distributions	152
6.8	Open access to information	155
6.9	How to maintain up-to-date biogeographical data	156
	References	156
7	Habitat fragmentation	157
7.1	Introduction	157
7.2	Biogeography of fragmented habitats	159
7.3	Heathland islands or heathland fragments?	163
7.4	What is the optimal area for a woodland nature reserve for birds?	167
7.5	What was the question again?	168
7.6	Selecting areas for protection	170
7.7	Biogeographical analysis of habitat fragmentation	174
	References	179
8	Biogeography of linear landscape features	181
8.1	Introduction	181
8.2	Linear features as wildlife corridors	182
8.3	Linear features as barriers	186
8.4	Linear habitats for wildlife	186
8.5	Establishment of linear wildlife habitats in agricultural ecosystems	189
8.6	Ecotones	192
8.7	Wildlife as incidental to the management and construction of linear landscape features	196
8.8	Applications of the biogeography of wildlife habitats and wildlife corridors	200
	References	205
9	Future developments	206
9.1	Introduction	206
9.2	What is climate change and what are the implications?	207
9.3	What causes climate change?	207
9.4	Evidence for climate change	208
9.5	The effect of climate change on species	208

Cambridge University Press

978-0-521-45712-5 - An Introduction to Applied Biogeography

Table of Contents

[More information](#)

viii Contents

9.6	The effect of climate change on various levels of biological diversity	211
9.7	What is the role of biogeography?	215
9.8	Models in biogeography and their uses	221
9.9	GIS modelling of species distributions	224
9.10	Where will biogeography be in 2020?	225
9.11	Other perspectives	227
	References	228
	Appendix I: Glossary	230
	Appendix II: Addresses of relevant organisations	238
	Index	241
