<i>List of Contributors</i>	<i>page</i> xi
<i>Preface</i>	xiii
<b>1 A BRIEF HISTORY OF SOLAR-TERRESTRIAL PHYSICS</b>	
C. T. Russell	1
1.1 Ancient Auroral Sightings	1
1.2 Early Measurements of the Geomagnetic Field	3
1.3 The Emergence of a Scientific Discipline	5
1.4 The Ionosphere and Magnetosphere	9
1.5 The Solar Wind	13
1.6 Magnetospheric Exploration	15
1.7 Planetary and Interplanetary Exploration	21
1.8 Concluding Remarks	26
<i>Additional Reading</i>	26
<i>Problems</i>	26
<b>2 PHYSICS OF SPACE PLASMAS</b>	
M. G. Kivelson	27
2.1 Introduction	27
2.2 Single-Particle Motion	27
2.3 Collections of Particles	34
2.4 The Plasma State	38
2.5 The Fluid Description of a Plasma	41
2.6 Two Applications of the MHD Equations	50
2.7 Conclusion	53
<i>Appendix 2A: Some Properties of Nonrelativistic Charged Particles in Magnetic Fields</i>	53
<i>Additional Reading</i>	54
<i>Problems</i>	55
<b>3 THE SUN AND ITS MAGNETOHYDRODYNAMICS</b>	
E. R. Priest	58
3.1 Introduction	58
3.2 The New Sun	62
3.3 The Role of the Magnetic Field	65
3.4 MHD Equilibria, Waves, and Instabilities	69

Cambridge University Press

0521457149 - Introduction to Space Physics

Edited by Margaret G. Kivelson and Christopher T. Russell

Table of Contents

---

 vi CONTENTS 

---

<b>3.5</b>	Solar Activity	70
<b>3.6</b>	Prominences	74
<b>3.7</b>	Coronal Heating	79
<b>3.8</b>	Solar Flares	82
<b>3.9</b>	Conclusion	88
	<i>Additional Reading</i>	88
	<i>Problems</i>	89
<b>4 THE SOLAR WIND</b>		
<b>A. J. Hundhausen</b>		91
<b>4.1</b>	Introduction	91
<b>4.2</b>	A Quick Survey of Solar-Wind Properties	92
<b>4.3</b>	The Basic Concept of Solar-Wind Formation in the Solar Corona	96
<b>4.4</b>	The Magnetic Structure of the Corona and Solar Wind	110
<b>4.5</b>	The Major Time-Dependent Disturbances of the Solar Wind	124
	<i>Additional Reading</i>	128
	<i>Problems</i>	128
<b>5 COLLISIONLESS SHOCKS</b>		
<b>D. Burgess</b>		129
<b>5.1</b>	Introduction	129
<b>5.2</b>	Shocks without Collisions	134
<b>5.3</b>	Shock Structure: How Shocking?	145
<b>5.4</b>	Things That Haven't Been Mentioned	155
	<b>Appendix 5A:</b> The de Hoffman-Teller Frame	156
	<b>Appendix 5B:</b> Energetic Particles and Foreshocks	158
	<b>Appendix 5C:</b> Determining the Shock-Normal Direction	161
	<i>Additional Reading</i>	163
	<i>Problems</i>	163
<b>6 SOLAR-WIND INTERACTIONS WITH MAGNETIZED PLANETS</b>		
<b>R. J. Walker and C. T. Russell</b>		164
<b>6.1</b>	Introduction	164
<b>6.2</b>	Planetary Magnetic Fields	164
<b>6.3</b>	Size of the Magnetospheric Cavity	168
<b>6.4</b>	Shape of the Magnetospheric Cavity	172
<b>6.5</b>	Self-Consistent Models	174
<b>6.6</b>	Flow around the Magnetosphere	177
<b>6.7</b>	Concluding Remarks	180
	<i>Additional Reading</i>	181
	<i>Problems</i>	181

CONTENTS **vii****7 IONOSPHERES**

J. G. Luhmann	183
7.1 Introduction	183
7.2 Ion Production	184
7.3 Ion Loss	192
7.4 Determining Ionospheric Density from Production and Loss Rates	193
7.5 An Example: The Earth's Ionosphere	196
7.6 Other Considerations Relating to Ionospheres	199
7.7 Final Notes	202
<i>Additional Reading</i>	202
<i>Problems</i>	202

**8 PLASMA INTERACTIONS WITH UNMAGNETIZED  
BODIES**

J. G. Luhmann	203
8.1 Introduction	203
8.2 Plasma Interactions with Moonlike Bodies	203
8.3 Plasma Interactions with Bodies with Atmospheres	207
8.4 Concluding Remarks	224
<i>Additional Reading</i>	225
<i>Problems</i>	225

**9 THE MAGNETOPAUSE, MAGNETOTAIL, AND  
MAGNETIC RECONNECTION**

W. J. Hughes	227
9.1 Introduction	227
9.2 The Magnetopause	228
9.3 The Geomagnetic Tail	232
9.4 Magnetic Reconnection	236
9.5 Reconnection at the Magnetopause	259
9.6 Reconnection and the Plasma-Sheet Boundary Layer	276
9.7 Is Steady-State Convection Possible in the Tail?	283
9.8 Conclusion	284
<i>Additional Reading</i>	284
<i>Problems</i>	285

**10 MAGNETOSPHERIC CONFIGURATION**

R. A. Wolf	288
10.1 Introduction	288
10.2 Magnetic-Field Configuration of the Earth's Magnetosphere	288
10.3 Plasma in the Earth's Middle and Inner Magnetosphere	290

---

viii CONTENTS

---

<b>10.4</b>	Electric Fields and Magnetospheric Convection	300
<b>10.5</b>	Adiabatic Invariants and Particle Drifts	304
<b>10.6</b>	Ionosphere–Magnetosphere Coupling	320
<b>10.7</b>	Ionospheric Currents	323
<b>10.8</b>	Magnetic-Field-Aligned Potential Drops	324
<b>10.9</b>	Loss of Magnetospheric Particles into the Earth's Atmosphere	325
<b>10.10</b>	Concluding Comment	327
	<i>Additional Reading</i>	327
	<i>Problems</i>	328
<b>11</b>	<b>PULSATIONS AND MAGNETOHYDRODYNAMIC WAVES</b>	
	M. G. Kivelson	330
<b>11.1</b>	Introduction	330
<b>11.2</b>	Basic Equations	332
<b>11.3</b>	Equations for Linear Waves	334
<b>11.4</b>	Waves in Cold Plasmas	335
<b>11.5</b>	Waves in Warm Plasmas	340
<b>11.6</b>	Ionospheric Boundary Conditions	343
<b>11.7</b>	MHD Waves in a Dipolar Magnetic Field	345
<b>11.8</b>	Sources of Wave Energy	349
<b>11.9</b>	Instabilities	350
<b>11.10</b>	Waves in Planetary Magnetospheres and Elsewhere	352
	<i>Additional Reading</i>	353
	<i>Problems</i>	353
<b>12</b>	<b>PLASMA WAVES</b>	
	C. K. Goertz and R. J. Strangeway	356
<b>12.1</b>	Introduction	356
<b>12.2</b>	Waves in a Two-Fluid Plasma	356
<b>12.3</b>	Waves in an Unmagnetized Plasma	360
<b>12.4</b>	Waves in a Magnetized Plasma	375
<b>12.5</b>	Kinetic Theory and Wave Instabilities	392
	<i>Additional Reading</i>	398
	<i>Problems</i>	398
<b>13</b>	<b>MAGNETOSPHERIC DYNAMICS</b>	
	R. L. McPherron	400
<b>13.1</b>	Introduction	400
<b>13.2</b>	Types of Magnetic Activity	402
<b>13.3</b>	Measures of Magnetic Activity: Geomagnetic Indices	408
<b>13.4</b>	Solar-Wind Control of Geomagnetic Activity	410
<b>13.5</b>	Magnetospheric Control of Geomagnetic Activity	420
<b>13.6</b>	Phenomenological Models of Substorms	430

CONTENTS **ix**

<b>13.7 Conclusions</b>	441
<b>Appendix 13A: Instruments for Measuring Magnetic Fields</b>	443
<b>Appendix 13B: Standard Indices of Geomagnetic Activity</b>	451
<i>Additional Reading</i>	457
<b>14 THE AURORA AND THE AURORAL IONOSPHERE</b>	
H. C. Carlson, Jr., and A. Egeland	459
<b>14.1 Introduction</b>	459
<b>14.2 Auroral-Particle Precipitation: The Auroral Spectrum</b>	463
<b>14.3 Auroral Distribution in Space and Time</b>	476
<b>14.4 The Auroral Substorm</b>	486
<b>14.5 The Auroral Ionosphere</b>	489
<b>14.6 Auroral Effects on Radio Waves</b>	493
<b>14.7 Energy Transfer to the Ionosphere</b>	494
<b>14.8 Relation to Boundaries and Physical Processes in the Magnetosphere–Ionosphere–Thermosphere</b>	497
<b>14.9 Stable Sun-Aligned Arc: Energetics and Thermal Balance</b>	498
<i>Additional Reading</i>	500
<i>Problems</i>	500
<b>15 THE MAGNETOSPHERES OF THE OUTER PLANETS</b>	
C. T. Russell and R. J. Walker	503
<b>15.1 Introduction</b>	503
<b>15.2 The Variation in the Solar-Wind Properties</b>	504
<b>15.3 Magnetospheric Size</b>	507
<b>15.4 The Role of Reconnection</b>	511
<b>15.5 Interaction of Moons with their Magnetospheres</b>	512
<b>15.6 Radiation Belts</b>	514
<b>15.7 Waves and Instabilities</b>	515
<b>15.8 Radio Emissions</b>	517
<b>15.9 Concluding Remarks</b>	519
<i>Additional Reading</i>	519
<i>Problems</i>	519
<b>Appendix 1: Notation, Vector Identities, and Differential Operators</b>	521
<b>Appendix 2: Fundamental Constants and Plasma Parameters of Space Physics</b>	529
<b>Appendix 3: Geophysical Coordinate Transformations</b>	531
<b>References</b>	545
<b>Index</b>	563
