

## Contents

Foreword	vii
List of participants	viii
Stochastic differential equations with boundary conditions and the change of measure method	1
<i>Aureli Alabert</i>	
The Martin boundary of the Brownian sheet	22
<i>Oliver Brockhaus</i>	
Neocompact sets and stochastic Navier-Stokes equations	31
<i>Nigel Cutland &amp; H. Jerome Keisler</i>	
Numerical experiments with S(P)DE's	55
<i>J. G. Gaines</i>	
Contour processes of random trees	72
<i>J. J. Geiger</i>	
On a class of quasilinear stochastic differential equations of parabolic type: regular dependence of solutions on initial data	97
<i>N. Yu. Goncharuk</i>	
Fluctuations of a two-level critical branching system	120
<i>Luis G. Gorostiza</i>	
Non-persistence of two-level branching particle systems in low dimensions	126
<i>Kenneth J. Hochberg &amp; Anton Wakolbinger</i>	
The stochastic Wick-type Burgers equation	141
<i>H. Holden, T. Lindstrøm, B. Øksendal, J. Ubøe &amp; T.-S. Zhang</i>	
A weak interaction epidemic among diffusing particles	162
<i>Ingemar Kaj</i>	
Noise and dynamic transitions	181
<i>G. D. Lythe</i>	
Backward stochastic differential equations and quasilinear partial differential equations	189
<i>Xuerong Mao</i>	

vi	<i>Contents</i>	
	Path integrals and finite dimensional filters <i>Steve Maybank</i>	209
	A skew-product representation for the generator of a two sex population model <i>Joachim Rebbholz</i>	230
	A nonlinear hyperbolic SPDE: approximations and support <i>C. Rovira &amp; M. Sanz-Solé</i>	241
	Statistical dynamics with thermal noise <i>R.F. Streater</i>	262
	Stochastic Hamilton-Jacobi equations <i>A. Truman &amp; H. Zhao</i>	287
	On backward filtering equations for SDE systems (direct approach) <i>A.Y. Veretennikov</i>	304
	Ergodicity of Markov semigroups <i>B. Zegarlinski</i>	312
