<i>Preface</i>	ix
Introduction	I
1 Does life on earth have a purpose?	4
1 A quest for meaning	4
2 Planned approach	7
2 Creationism, Intelligent Design, and Augustine’s idea of time	9
1 Creation and creationism	9
2 Life based on an intelligent design?	12
3 A bridge between science and faith?	20
4 Creation stories and their practical intent	28
5 Augustine: time is a creature of God	32
3 Darwin, neo-Darwinism, and the naturalistic continuity claim	37
1 Darwin’s theory of evolution: the CVST algorithm	37
2 Evolution theory and evolutionism	41
3 The ambiguity of naturalism	44
4 Continuity and reducibility?	46
4 Miller’s pre-biotic broth and the premises of evolutionism	53
1 Origin of life: a category mistake	53
2 Survival of the fittest: a tautology	59
3 Evolution of science: a performative contradiction	65
5 A cold shudder along Darwin’s back	71
1 The durability of biological species	73
2 Gradualism and punctuated equilibria	75

vi	<i>Contents</i>	
	3 The ancient lithographic bird	77
	4 God, time, and taxonomy	84
6	The emergence theory of Morgan and Alexander	90
1	Emergence according to Morgan and Alexander	91
2	The intentionality of human consciousness	94
3	Metaphysics and the standpoint of experience	97
7	<i>Luctor et emergo</i> : what is emergent evolution?	103
1	Mozart and “Twinkle, Twinkle, Little Star”	103
2	Organizational levels in nature	106
3	Entities and modalities	115
4	Supervenience, correlation, and idionomy	118
5	Chimpanzees and the HIV virus	125
6	Michael Behe and his mousetrap	128
8	Toward a general theory of emergent evolution	139
1	John Searle and the mystery of consciousness	140
2	Peter Checkland and the structures of society	146
3	Ontological stratification	153
9	Hominization and the philosophy of mind	160
1	Emergent evolution as a conceptual scheme	160
2	The human person and the mask	164
3	The anthropic principle	172
4	Biological constants? Conway Morris	176
5	Methodological naturalism	181
6	The problem of David Chalmers	185
10	Augustinian faith and evolutionary science	191
1	The creation account and the story of becoming	191
2	<i>Fides quaerit intellectum</i> : a hermeneutic horizon	195
3	Pakicetus, the swimming ungulate	203
4	Personal experiences	208
11	The organism is a whole. The world is a habitat	211
1	J.C. Smuts, holism, and evolution	212
2	Enzymes, neurons, and emotions	213
3	The life-world	220
4	From biosphere to noosphere	225
5	New Age and Brahman	230
12	The slumbering temptation of essentialism	234
1	Is there a creation order? Herman Dooyeweerd	235
2	The standpoint of experience and metaphysics	239

<i>Contents</i>		vii
3	The reflective-empirical method	242
4	The reflective-empirical method and living nature	246
5	Type laws: an essentialist error	248
6	Escaping essentialism	254
13	Questions surrounding the emergence process	259
1	Hidden configurations in nature: prions	259
2	John Paul II on the evolution problem	264
3	Ontological profile and evolutionary process: Neanderthals	268
4	The last great narrative	272
14	Enkapsis in nature. Is there an Omega point?	275
1	Self-subordination in Baja California	276
2	“Desert storm” and other miracles	278
3	The kingdom of God as final stage? Teilhard and Laszlo	281
4	Human experiences are ambiguous	287
