Subject Index

- ability: economic mobility and, 562n67;
entitlements and differences in, 611–12;
optimal income tax and revelation of, 688–90,
729–30; taxation based on, 672–3
- ability-to-pay principle: identification of
taxpayers and, 269; international diversity in
application of, 194; locational choice and, 196;
socially just taxation and, 679; taxes and, 193,
674–5; voting and Lindahl consensus and,
412n1
- abstention, candidates responses to, 444;
expressive voters and, 443
- accountability: in bureaucracies, 102; excess
burden of taxation and, 259; of government,
760; through user prices, 193
- addiction: paternalistic public policy and effects
of, 369–70, 373; taxes on, 259
- administrative costs: of insurance, 497n6; of
taxation, 256; of taxation with fiscal
federalism, 254
- adoption, illegal market for, 371
- ad valorem taxes, Ramsay rule for taxation
efficiency and, 668n1
- adverse selection: moral hazard and, 533;
private schools and, 604–5; time
inconsistency and, 525–7; unemployment
insurance, 615–16
- affirmative action, as social policy, 611
- agenda, voting and control of, 425–6
- aggregate information, defined, 20
- aging, growth of government and, 747;
retirement entitlements and, 627–44
- AIDS, global social insurance and, 567–8
- alcohol consumption: paternalistic public policy
and effects of, 369–70, 373; Prohibition and,
382n58, 382n59
- Allais paradox, 382, 382n59, 383n60, 385n62,
386; summary of, 398
- all-pay auctions, rent creation and rent seeking,
91–2
- altruism: benefits of, 142n5; norms of fairness
and, 554–62; pleasure from giving and, 548–9;
public goods and, 142; social justice and,
543–54
- American Revolution, 168n34, 283, 283n36
- anarchy: Hobbes’s view of, 763; honest people
and, 52–4; Nietzschean anarchy and rule of
law, 45–52; prisoner’s dilemma and public
goods, 153n10; property rights and avoidance
of, 38; rent seeking and, 98; rule of law and
prisoners’ dilemma and, 39; voluntary
cooperation and, 764–5; weak vs. strong and,
45–6t, 46n40
- anonymity: dictatorship game model and, 559,
559n62, 560; in competitive markets,
economic freedom and, 17; cooperative and
opportunistic societies, 768–9; market
transactions, 769; reciprocity and government
institutions, 765; social welfare function and,
501, 501n8, 503n9; voluntary cooperation and,
763n16, 764–5
- anti-discrimination laws, externalities and, 336
- anti-monopoly/anti-trust agencies, competition
as responsibility of, 18n17
- appeasement: battered-wife syndrome and,
178n44; historical examples of, 177n43;
terrorism and, 177–8
- approval voting, 460–1
- Arrow impossibility theorem, 437n18; social
aggregation and, 575–6; social welfare
function and, 501–2
- asset markets, property rights and, 37
- asset transfer, capital income taxation and, 695
- assortative mating, economic mobility and, 564
- asymmetric information: adverse selection and,
527; in bureaucracies, 101; bureaucratic
output measurement and, 103; Clarke tax and,
180–5; consensus voting and, 409–13; diverse
populations and adverse selection and, 533;
efficiency losses and, 19; externalities and,
314–15; failure of Coase theorem and, 327–8;
government agencies’ difficulty with, 19–22,
64–5; government role in public goods
contributions and, 227–8; hyperbolic
discounting, public policy, and 379; Laffer
curve and, 267–8; limits on voters information
as, 75; majority voting and, 413–18; moral
hazard and, 528; objective verification of
outcomes and, 540; principal–agent problem
and, 74–7, 125; public financing of public

- asymmetric information (*cont.*)
 goods and, 245–6; public goods and fiscal federalism and, 710–11; public goods and problem of, 178–208; Ramsey rule of efficient taxation and, 672; single-jurisdiction cost sharing and locational choice, 200; Tiebout locational choice mechanism and, 195–208; under-supply of public goods and, 147–8; user prices for public goods and, 192–4; voters' and taxpayers' sources of, 77
- asymmetric warfare, defense against terror and, 171, 172n37, 177
- auctioning of emission quotas, public policy and, 346–7
- bargaining: Coase bargaining, regulations prohibiting, 329, 329n15; cost sharing for public goods and, 208, 208n66, 208n67; Nash bargaining solution, 208, 353n33; regulation as deterrent to, 344–5; sharing of gains and, 324
- Basel Convention, hazardous waste transport and, 365, 365n45
- battered-wife syndrome, appeasement and, 178n44
- beauty, taxation of, 673
- behavioral economics, 4, 33n28. *See also*
 ethical behavior; personal behavior; absence of moral hazard and, 532–3; aversion to inequality and, 34; bounded rationality, 382; changes in cultural norms and, 536; community values and locational choice and, 386–8; diverse population and norms of, 533; earned and unearned money and, 560–1; envy and, 34; hyperbolic market discounting and, 373–80; framing, loss aversion, 382; loss aversion, 522; market aversion, Coase theorem failure and, 328; norms of fairness and, 554–62; origins of envy and, 693; procrastination, hyperbolic market discounting and, 377; prospect theory and, 521–2; regret and, 522
- beneficial externalities, 312–14
- benefit principle of payment: bond financing and, 289–91; discount rate and public project selection, 215n70, 218n74; incentives as revelation of, 198–9; locational choice and, 196; prices and politics in locational choice and, 204–5; taxation and, 259–60; user prices and, 186; voting and Lindahl consensus and, 412n1
- benefits: designated retirement benefits, 631–2; distribution, majority voting and, 419–20; from public good, 138; truthful self-reporting concerning, 180–5; understatement of, for public goods, 147–8; volunteer-type public goods, 165, 165n25, 165n28, 167; weakest-link public goods, 160n17, 161n18
- Bentham social welfare function, 507, 507n17, 508; choice of social insurance contract and, 515–21; decentralized government and, 726–7; deviation from objective probability and, 521–2; efficiency costs of distribution and, 517n29; expected utility and, 516n27, 517; ex-post equality vs. efficiency and, 519; gender difference and, 561–2; income inequality measurement and, 574–5; incomplete insurance and, 541–3; Laffer curve and, 514; leaky bucket of redistribution and, 773; as limiting case, 510, 511n21, 512, 512n22; lottery through incomplete insurance and, 517–19; Mirrlees problem in optimal income taxation and, 687, 689–90; optimal income taxation and, 682–90; prospect theory and, 521–2; regret and, 522; rule of law and, 525; social insurance and work ethic and, 523–4; summary of, 581; utility and income-earning abilities and, 707n46
- Beria, Lavrentiy Pavlovich, 108–9
- “best shot” public goods, 164n23
- bias, political contribution regulations as source of, 83
- binary decision making: group size and voluntary payment for public goods, 185–217; income support contingent on work, 620; prisoners' dilemma and public goods, 152, 155t
- biodiversity, global externalities and, 356–7
- biometric risk, pooled savings and, 639–40
- birth control, paternalistic public policy and, 390
- birth weight, earnings tied to, 607, 607n22
- blood supply, illegal markets in, 370–1
- bond financing, 289n41, 301–2. *See also*
 government borrowing; benefit principle of taxation and, 289–91; budgetary surplus and, 295; constitutional restraints on, 294–5; corporate profits taxes and, 700, 700n39; financial repression and, 706n44, 707n45; fiscal illusion and, 273, 294; foreign sale of bonds, 291; future taxpayer preferences and, 293–4; government default on, 291; personal voluntary provision for retirement and, 637–8; for present generation, benefits of, 292; public spending and, 290t; Ricardian equivalence and, 292–3; for transition from intergenerational income transfers, 642
- bounded rationality, 386n65; paternalistic public policy and, 385–6, 386n66
- Bowling Alone*, 771
- breach of contract, by government, 55–6, 67
- bribes: capture and, 119; cost-benefit analysis of public goods and, 211

- bundled public spending, for public goods, 435
- bundling, of public and private good, 242
- bureaucracy. *See also* government agencies and institutions: accountability and, 102; demand creation by, 102–3, 127; as governing component, 101; government growth and size of, 749–50; incentives and behavior in, 101–2; literature notes on, 132; output measurement, 103; principal–agent problems and, 103–7; rules vs. discretion and charitable mediation, 552; summary of, 127–9
- campaign contributions: endorsements, monetary value of, 82–3; legal entities as funnels for, 82; Nash equilibrium and, 78n2; policy convergence and, 442n22; political spending paradox, 81; public finance subsidy of, 78–9; public financing for, 78; regulation of, 82, 83, 125; as rent extraction, 99, 99n10
- candidates: ideology and principle of, 451; personal accountability of, 457; political competition and number of, 446
- capital: Coase theorem and capital markets, 330–1; home bias in investment and taxation of, 694; immobile capital, 716n55; income taxation on, 694, 694n33, 696, 730; portfolio investment and real assets, taxation of, 695; resource allocation and capital markets, 57–8; rule of law and capital markets, 37–8; social justice of income tax on, 694–5; as tax base, 694–708
- capital gains taxes, 699, 699n38, 730–1
- capture theory: central and local government institutions, 725; natural monopolies and, 119; subsidies and, 343n25
- cartels: anti-monopoly/anti-trust agencies and, 18n17; efficiency losses in, 17n16
- Castro, Fidel, 168n33
- catastrophe insurance, intergenerational risk sharing and, 644–52
- censorship, paternalistic public policy and, 386, 388–92
- centralized decision making: fiscal federalism and, 725, 727n61; ideology and, 23; market allocations and, 22; post-tax benefits and, 726–7
- certainty-equivalent income, 496, 575
- Chamberlain, Neville, 177n43
- charity: degrees of, 552–3, 553n55; exploitation of charitable intentions, 549, 550n53, 552; misrepresentation of donor preferences and, 551–2; norms of fairness and, 554–62; pleasure from giving and, 548–9; private charity and public assistance, 554; rules vs. discretion and, 552; social justice and, 543–54; social status and, 553–4
- “cheap talk” principle: defense spending and, 169; weakest-link public goods and, 162, 162n21
- checks and balances: fiscal-federal systems, 435; majority voting and, 434–7; secession and personal exit as alternatives to, 436; voting and, 479
- children: child labor declines and government growth, 747n3, 785; as non-monetized cost, 635n53; pay-as-you-go income transfers and impact of, 633–4, 634n51; privatization of retirement entitlements and, 634
- choice. *See also* locational choice: Allais paradox and, 382, 382n59, 383n60, 385n62, 386; of effort, subsidies, and minimization of, 118; health care entitlements and role of, 651–2; hyperbolic discounting and role of, 367–82; income distribution and, 601; income support contingent on work, 619–25; Locke’s view of, 763; moral hazard and role of, 528–9; optimal income taxation and social welfare function, 685–6; of public goods, voting and, 424, 424n7, 425, 425n8; of public projects, discount rate and, 215–16; rejection of government schools and, 598, 598n13, 599n14, 602; role in economics of, 14–15; social insurance, veil of ignorance concerning, 507–25; in social insurance contract, 515–21; social welfare function, 561–2; Tiebout locational choice mechanism and public goods, 195–208; utility maximizing choice, voluntary payment for public goods, 217–19; voting systems and Condorcet winner and, 453

- equality: aversion to inequality and, 34; communism and, 110; discrimination and equal opportunity, 606, 606n20, 607, 607n21; efficiency and social justice through insurance and, 498; entitlements and equal opportunity, 589–612; envy and, 111–12; labor self-management and, 122–3; of opportunity, failures of, 605–12; retirement entitlements and, 627–44; social justice as, 30–1, 65
- equality of opportunity. *See* ex-ante equality
- equal-sacrifice principle: choice of taxation and, 691n31, 692n31; marginal utility of, 681; proportional taxation and, 680n13; regressive taxation and, 681n17, 682n18; risk aversion and, 681, 682n19, 685; socially just taxation and, 673–81; summary of, 729
- equilibrium. *See also* Nash equilibrium:
 - environmental taxes and, 341n24; goods production and, 58–9; ideology and principle as basis for, 451; incentives and factor supplies, 61; income distribution and, 61f; international trade and, 61–2; majority voting and, 413–18, 425; market efficiency in, 56–62; market quantity, 11n9, 12, 12n10, 16n13; multiple-issue voting and public spending and, 450–1; prices, markets, and absence of, 392–4; resource allocation, 57–8
- estate taxes, 704–5, 705n42, 731
- ethical behavior: aversion to inequality and, 34; benefits and costs of, 52t; compensation dilemma and, 27; envy and, 34; externality resolution and, 331–4; intergenerational social contract and, 629; mixed populations and, 53–4; moral philosophy and, 4; outcomes of, 52–3; Pareto efficiency and ex-post equality, 31; rule of law and, 38; terrorism and, 177; voluntary cooperation and, 766
- eugenics, paternalistic public policy and, 390, 390n71, 392, 393n73
- European Union: creation of, 720n58; value-added taxes in, 253
- ex-ante equality: cultural norms and failure of, 607; economic mobility and, 562–6;
- educational under-representation of poor households and, 609; higher education and, 609–12; income distribution and, 496; of in-kind transfers, 593–4, 652–4; lottery as example of, 31–2, 32n25, 32n26; meritocracy and, 612; popular bias in favor of, 65; rejection of vouchers and, 596–605; social identity and, 608–9, 609n25; social justice and, 30; spending preferences and, 602n17; student loans and, 610n28
- excess burden of taxation: absence of revenue and, 271; basic principles, 247–8, 299; elasticity of labor supply and, 249–50; empirical estimates, diversity in, 263, 263n18, 264; formula for, 250, 250n9, 251; health insurance and, 268n25, 272n26; identification of payers and, 273–4; import tariffs, 257, 275–6; income and substitution effects, 248; in-kind transfers and, 591–3; labor markets and, 262–3; majority voting and income distribution and, 467–8; marginal excess burden of tax-financed public spending, 256–8; market links to, 251–2, 262; optimal income taxation and, 682–90; pay-as-you-go income transfers and, 642, 642n54; personal costs of, 249; private insurance and, 504n11; Ramsay rule for efficiency and minimization of, 667–73; sharing of, 270; size of, 261–4; social experiments and, 264; on spent income, 252f; substitution and income effects, 295–8; tax avoidance with, 296–8; as tax compensation, 298; Tiebout locational choice and, 259–60; of younger generation, 632–3; younger generation’s tax burden and, 632n47
- excise tax: as government revenue, 743; public financing and, 255
- exclusion, from public goods, 142–3, 233; demand function of user prices and, 190; inefficiency of, 193–4; user prices and, 185–94
- exit, voice, and loyalty: and choice among governments, 709
- expected utility: Bentham social welfare function and, 516n27, 517, 518n31; of income, 495, 495n3; moral hazard and voluntary insurance and, 532, 532n43
- expenditure tax, 701–4, 731
- ex-post equality/inequality: complete insurance and, 497; efficiency trade-off with, 519; envy and, 34; income distribution and, 496; leaky bucket of income distribution and, 511, 511n21, 512, 512n22; Mirrlees problem in optimal income taxation and, 687; Pareto-efficiency and, 30; popular bias in favor of, 33; Rawls’ vs. Bentham’s social welfare function, 518n32; social justice and, 65; voting and, 34

- expressive behavior, cooperative behavior in experiments and, 156; cooperation and, 765; declarations of the need to assist deprived people and, 162; defense against terror and, 556; dictatorship game and, 558; high-income people and voting, 472; libertarian views as, 379; normative statements as, 333; payment of taxes as, 280; personal pro-environmental spending and, 332; personal support for gun control and, 333; political parties and, 35; user prices for prisons, and, 376; work ethic and, 535
- expressive voting, abstention and, 444–6; direct democracy and, 437; multiple policy issues and, 453; policy duplication and, 442; Director's law and, 475; voting for voluntary redistribution, 547–8
- external financing, corporate profits taxes and, 700
- externalities: absence of intent, 312; attributes of, 309–15; beneficial externalities, 312; Coase theorem and, 322–31; collective action and, 328–9; consumer involvement in, 311–12; corporate tax policies and, 698, 698n37; cost-benefit analysis, 335, 335n17; crime and self-defense and, 332–4; demand for government growth and, 746–7; discrimination and, 336, 336n18; education as, 343–4; efficiency gains from resolution of, 310f; efficiency losses and, 19; entitlements and, 601–2; environmental policy and, 351–6, 366; fiscal federalism and, 711, 712n52, 714; global externalities and international agreements, 356–66; government role in, 335–7, 395–7; human interaction and, 314; implementation of public policy and, 337–9; inframarginal externalities, 312–14; inputs as adverse externalities, 341; market correction and, 351–95; missing markets and asymmetric information and, 314–15; non-convexities and, 340–9, 392–4; paternalistic public policy and, 388–92; personal freedom and, 336–7; political decision-making concerning, 335–6, 349–56; private property and, 315n5, 316n6; private resolution of, 309–34; public goods and, 311; public inputs and, 321; public policies and, 334–66; quotas as solution to, 346–9; reciprocal externalities, 318n8, 319, 319n10, 322, 345; regulation of, 344–5; social norms and, 331–2; synergies and, 321; tax revenue and, 340; tragedy of the commons and, 311, 315–22; user prices and, 316n6; voting on, 420, 427
- extinction, environmental costs of, 214–15, 215n69
- extortion, consensus voting rule and, 409; majority voting and, 429; private supply of law enforcement and security and, 141, 141n4
- fairness: earned and unearned money and, 560–1; equal-sacrifice principle of taxation and, 679–81; norms of, 554–62
- family structure: intergenerational economic mobility and, 563–4t; retirement as intergenerational social contract, 627–44; terrorism and penalties on, 175f
- fatal conceit, 109–10
- feasibility of compensation, 26
- feasible income redistribution, 505–6; Bentham social welfare function, 508
- financial repression, taxation through, 705–6, 706n44, 707n45, 731
- fiscal federalism: efficiency and, 710, 713n53, 714–24; entitlements and, 715–23; externalities and, 711, 712n52, 714; global government and, 728; income transfers and, 75n1; intergenerational income transfer and, 634–5; leviathan government and, 751–2f; moral hazard and, 723–4; natural monopoly for private goods and, 712–14; political behavior and, 720–30; political income redistribution and, 723–4; regional income pooling and, 714–15; rent seeking and, 724–5; social justice and, 710–24; summary of, 731–2; taxation and, 709–30; tax competition and, 715–18, 751–2; voting and, 725–28; value-added tax and, 253
- fiscal illusion: bond financing and, 294; growth of government and, 747, 748; property tax and, 749n4; tax incidence and, 272–3, 273n27; tax revenue and, 749, 785
- fixed costs: natural monopolies, 19, 117n27; user prices and, 188
- flat tax rate, optimal taxation and, 686
- folk theorem, of repeated games, 51n47
- framing effects, paternalistic public policy and, 385, 385n63, 386; international trade policy and, 750
- franchise voting rights: gender differences and, 470–1, 471n47; government growth and, 749; income distribution and, 470–1
- Franklin, Benjamin, 283
- free-riding incentives. *See also* incentives: defense spending and; fiscal federalism and public-good problems, 710–11; government participation in, 361–2; information and public goods and, 178; Lindahl consensus on public goods and, 151; locational choice and, 196; natural monopoly and cost sharing of locational choice and, 199; pay-as-you-go intergenerational transfers and, 629–30; public financing of public goods and, 245–6; taxation and, 234; tax evasion and, 280–3;

- free-riding incentives (*cont.*)
 - understating of public goods and, 148;
 - voluntary income transfers and, 546;
 - weakest-link public goods, 234
- free trade, efficiency of free international trade and, 62n54, 62n55, 750–1; trade liberalization and, 750–1
- French revolution, 168n33
- gambling, expected utility and fair gamble, 495
- game of chicken, volunteer-type public goods, 164–6
- game tree, in prisoners’ dilemma, 42n35, 43n36
- gender difference: entitlements and, 607–8;
 - franchise voting rights and, 471n48; higher education and, 609–10; persistent welfare dependence and, 619; social welfare function and, 561–2; taxation efficiency and, 671–2; ultimatum game and, 561
- generational accounting, retirement entitlements, 635
- genital mutilation, moral relativism concerning, 387n68
- Gini coefficient, income inequality
 - measurement and, 573, 573n81, 575, 575n82
- global capital markets, tax competition and, 718f
- global externalities: international agreements and, 356–66; nondemocratic governments and, 365–6
- global government, 728n63; fiscal federalism and, 728
- global social insurance: donor preferences and, 571–2; global government and, 572–3; moral hazard and, 569–71; veil of ignorance metaphor and, 494n1, 567–8; World Bank and, 568–71
- Gorbachev, Mikhail, 109n20
- governance: defined; government ownership of natural monopolies, 121, 121n30, 122
- government agencies and institutions. *See also* bureaucracy; communism; leviathan government; political decision making; totalitarian governments: accountability of, 760; adverse selection and insurance and, 526; asymmetric information and, 19–22, 64–5; Biblical view of, 758; breach of contract by, 55–6, 67; bureaucratic behavior, 101–7; capture by, 119; central and local government, 725; Clarke tax and, 180–5, 185n47; competition as responsibility of, 17, 18n17, 19, 65; constitutional restraints on, 294–5, 760–1; corrupt tax officials, 284; cost-benefit analysis and, 24–5; crime and suits against, 55; demand for growth of, 746–7; distrust of, social segmentation and, 768–70; entitlements from, rejection of, 597–8; environmental policy and, 366; ex-ante equality and, 30; excess burden of taxation and, 264; externalities and role of, 335–7, 395–7; federal-fiscal structure for public goods and, 710; financial checks and balances in, 435; free-riding behavior of, 361–2; global government and insurance, 571–3; growth of, 739–53, 780; Hobbes’s concept of, 780; human behavior and moral hazard and, 773–4; identification of taxpayers and, 268–74; ideological agreement on need for, 778–9; implementation of compensation and, 26; inflation and financial repression by, taxation through, 705–6; information and spontaneous order and, 20–3; information problem of public goods and, 178–80; information requirements for taxation and, 274; intergenerational income transfers and, 634; jurisdiction preferences and differences and, 195; Laffer curve and, 266–8; limits of, ideology concerning, 775–8; literature notes on, 132; local government principal–agent problems and yardstick competition, 721–3; Locke’s view of, 757–8, 780; marginal benefits of information for, 21–2; market choices of schools and rejection of, 598–602; monopolies, in addictive substances, 369–70; paradox of gain from coercion and, 44; performance monitoring of, 104, 104n15, 105, 105n17, 107; political decision making and, 22, 749–53; political economy and need for, 771–3; political ideology concerning reliance on, 774–8; prevention of private spending, 602; private protection vs., 55; public financing of public goods and, 245–6; public-goods financing and monopoly supplier, 141–2; public spending increases and growth of, 755–6; quota assignments and, 361; Ramsay rule for efficient taxation and, 671n6, 690n28; restraints on, 294–5, 759–1, 762; revenue sources for, 743, 747–9; roving and stationary bandits and, 51–2; rule of law and, 36–7, 38, 55–6, 66; shadow economy and behavior of, 286–7; social benefit of government growth and, 754–6; social capital and, 770; social insurance and, 498–9; social justice and absence of, 543–73, 579–81; student loan guarantees by, 609–10; as suppliers, user prices as alternative to, 193; taxation and budget constraints, 685; tax coordination policies, 720; tax enforcement by, 283–4; tax evasion and, 280–1; Thomas-à-Becket effect in, 105–6; Tiebout locational choice mechanism and, 195–208; trust and social norms concerning, 766–8; Ulysses and the sirens myth concerning, 762; unemployment insurance and, 616–18; voluntary cooperation

- and, 763–6, 780–1; weakest-link public goods and, 162; zero-based budgeting and, 762
- government borrowing, 301–2. *See also* bond financing; public spending; bond financing and benefit principle of payment, 289–91; constitutional restraint on, 294–5; government bonds, 291; financial repression and, 706, 706n44, 707n45; foreign sale of bonds, 291; future taxpayer preferences and, 293–4; intergenerational tax sharing and, 291–4; personal voluntary provision, 637–41; for retirement and, 637–8; public spending and, 288–95; Ricardian equivalence and, 292–3; for transition from intergenerational income transfers, 642
- government budget: components, 76t; constraints on, 104, 104n16; incomplete information on, 76; political decision making concerning, 75–6
- greenhouse gas emissions, 357–9
- group size: efficient contribution quantity and, 224, 224n79, 225; government role in public-goods contributions and, 227–8; Nash equilibrium quantity and, 225–7; trust and, 770; voluntary payment for public goods and, 158–228
- growth of government, demand for government services: political effects on, 749; openness and social insurance, 752

- incentive-compatibility, Mirrlees problem in optimal income taxation and, 687
- incentives. *See also* free-riding incentives: in bureaucracy, 101–2; Clarke tax and truthful self-reporting and, 180–5; Coase theorem and, 326; communism and, 109; entitlements and, 612–27; for exaggeration, in shadow economy, 286–7; excess tax burden and lack of, 264, 264n20; free-riding incentives, understating of public goods as, 148, 151; income support contingent on work, 619–25; for innovation, Pigovian taxes and subsidies and, 342; linear income tax and work incentives, 684; locational choice mechanism for public goods and, 198, 198n60, 199, 202n64; majority voting and income distribution and, 467–8; monitoring and, 123; moral hazard and voluntary insurance and, 532n43; optimal income taxation and, 682–90; persistent

incentives (*cont.*)

welfare dependence and, 618–19; production factors and, 61; secret voting and, 473n49; stock options as, 103–4, 104n13; terrorism and, 173–4; unemployment insurance and, 613–18; wage subsidies, 621–2; welfare reform and, 625, 626n43, 627; work ethic and presumption of, 539

income-consumption curve: price changes and, 624n39; recipients' perspective on in-kind transfers and, 589, 590n2, 591; tax avoidance and, 296, 296n42, 298; taxes and in-kind transfers and, 591–3

income distribution. *See also* intergenerational income sharing; personal incomes: beneficiaries of, 473–8; Bentham social welfare function, 508n19, 707n46; bond financing of present generation and, 292; certainty-equivalent income, 496; changes in, voluntary public goods contributions and, 227–8; coalition of low- and high-income voters and, 474; in competitive markets, 28–9f; corruption and, 99, 99n11, 126; cost-benefit analysis of public goods and, 216–17; cultural norms concerning, 469, 469n46, 470; decisions about voting and, 472–3; earned and unearned money, norms of fairness and, 560–1; economic mobility and, 566, 566n74; educational inequality and, 609; efficiency costs of, 517n29; expected utility of income, 495; expenditure tax and, 701–4; feasible redistribution, 505–6; fiscal federalism and, 254; franchise voting rights and, 470–1; general equilibrium and, 61f; income losses, compensation for, 26, 26n20; inequality in, measurement of, 493; intergenerational economic mobility and, 562–4; Laffer curve and, 513–14; majority voting and, 462–70; market equilibrium and, 10n7; measurements of inequality and, 573–5; middle-class voting coalitions and Director's law, 475–6; political income redistribution, 723–4; pooled income, 531–2; predetermined income, 502–7; preferences in public-goods contributions and, 228n82; progressive taxes and, 692; property taxes and zoning and, 206, 228–30, 237; public spending and, 216–17; quality of life and growth in, 741–3; regressive taxation and lack of work incentive and, 688–96; social justice and insurance and, 492–527; social status and, 553–4, 554n57; societal comparisons of, 573–5; student loans and, 610n28; terrorism and, 172; Tiebout locational choice mechanism and, 205–6; uncertain incomes and demand for insurance, 494–9; veil of ignorance metaphor concerning, 494;

voter participation and, 474; voting and, 420, 461–78, 481–2; welfare payments and, 620–1; zero marginal tax rates and, 688–9

income effect: Coase theorem and, 325–6; excess burden of income tax and, 247n3, 248, 248n4, 273–4, 274n28, 295–8; inefficiency of Nash equilibrium and, 227; substitution effect combined with, 221–2; voluntary payment for public goods, 221; wages and, 222n77

income taxes. *See also* expenditure tax: on capital income, 694, 694n33, 696; computations and simulations of, 690; corporate/company taxation, 697, 697n34, 701; equal-sacrifice principle of taxation and, 679–81; excess burden of, 247–8; government budget constraints and, 685; history of, 744n2; hyperbolic discounting and, 376n52; indirect taxes with optimal taxation, 707–8; linear income tax, 683, 684n20, 686; optimal income taxation, 682–90; personal incomes, source-based differences in, 697n35, 698n36; as progressive taxes, 693; Ramsay rule for efficient taxation of, 669–70; schedule, 676, 676n8, 676n9, 678, 730; tax bracket-based tax schedules, 676–8, 678n11

income transfers: effort decisions by recipients of, 528; entitlements as, 589–95; expressive voting for voluntary redistribution, 547–8, 548n48; government budgets and, 75, 75n1; income support contingent on work, 619–25; in-kind transfers *vs.*, 591f; interdependent utilities and income transfer and, 544–6; involuntary transfers, justification for, 491; leaky bucket of income distribution and, 504–5, 505n12, 505n13; market spending and, 593, 593n5; moral hazard and prisoners' dilemma and, 529–32; pay-as-you-go transfers, social contract and, 629; preferences and, 601; recipients' perspective on, 589–91; wage subsidies and, 621–2; younger generation's tax burden and retirement entitlements, 632n47

incomplete contracts, subsidies to natural monopoly and, 120

indirect taxes, 731; fiscal federalism and, 254; fiscal illusion and, 273, 273n27; optimal income tax and, 707–8; tax evasion and, 708

indirect user prices, public goods and, 187

industrial revolution, middle-class emergence and, 743–4

industry profits: environmental policy and, 353; public interest *vs.*, 355n35; rent seeking and, 353n33

inefficiency. *See also* efficiency loss: burden in Nietzschean anarchy of, 49–50; of Condorcet winner, 426–7; cross-subsidized collective spending on private goods, 463; of exclusion,

- user prices and, 193–4; hoarding of inputs and, 111n23; logrolling and, 430–1; Nash equilibrium in public-goods contributions and, 224–5, 227; of negative externality, 310f; Nietzschean anarchy and sources of, 46; rent creation and seeking and, 88, 88n3; of self-interest, 42–5; in shadow economy, 287–8; of tax evasion, 287; understating of public goods as, 148; of war, 168
- inequality. *See also* ex-post equality/inequality: aversion to, 34, 496; income inequality, measurement of, 493, 573–5
- inflation, taxation through, 705–6, 706n43, 731
- informal economy. *See* shadow economy
- information: aggregate information, 20; asymmetric information, 19; Clarke tax and truthful self-reporting, 180–5; communism and role of, 110–11; direct and representative democracy and, 438–41; efficiency in markets of, 23; government requirement for, taxation and, 274; government role and problem of, 178–80; incompleteness of, for taxpayers and voters, 76; misrepresentation of, impossibility of gain through, 182; normative and positive conclusions about, 23; paternalism and price of, 391–2; public goods and, 76, 178–208; revealed information, 498; spontaneous order and, 20–3; supply and role of, 21–2; Tiebout locational choice mechanism and, 195–208; user prices for public goods and, 185–94
- infrastructure, natural monopoly ownership transfer of, 120
- inheritance, taxation of, 704–5, 705n42, 731
- in-kind transfers: entitlements as, 589–95, 652; income transfers vs., 591f; recipients of, 589, 589n1, 591; rejection of vouchers as, 596–605; social objectives and, 593–4; taxpayers and, 591–3; vouchers as, 595, 595n6, 596
- innovation, as response to Pigovian taxes, 342
- insider-outsider explanation of unemployment, 614
- instability, voting and, 422–4; benefits of, 436–7; coalition instability, 464; money transfers and logrolling and, 432
- institutions, role of, 73–129; environmental policy and, 355–6; literature notes on, 129–32; natural monopolies and, 107, 116
- insurance: adverse selection and asymmetric information, 527; catastrophic insurance, 644–52; competitive markets for, 497; efficiency of social justice in, 498; markets in, 497–8; moral hazard and, 527–32; mutual risk sharing, 497–8; objective verification of outcomes and, 540; public-policy response to moral hazard and, 543; risk aversion and, 494–6; rule of law and, 55; social justice and, 492–527; uncertain incomes and demand for, 494–9
- interdependent utilities: altruism and charity and, 544, 544n47, 546; paternalistic public policy and, 388–92
- interest groups. *See also* lobbyists: environmental-policy politics and, 353; government growth and influence of, 750–1; international trade policy and, 750; political decision making and, 74–5; political income redistribution and, 723–4; rent extraction and, 99, 99n10; voting and, 80, 476–7
- interest rates: bounded rationality and, 386n66; business dispensations and, 380n56; discount rate for public goods and, 214–15; inflation and financial repression-based taxation and, 705–6; payday lending and, 380, 380n55; retirement entitlements and negative interest rates, 637–8
- intergenerational income sharing and transfer: asymmetric income transfer, 635; demographic prisoners' dilemma of, 633, 633n50, 635; economic mobility and, 562, 563n68, 566; effect on savings and growth of, 640–1; generational accounting and, 635; government growth and, 747; political procrastination concerning, 636–7; rate of return from, 631; retirement social contract and, 627–44; sustainability of, 637–45; transition from dependence on, 641–4; U.S. economic characteristics and, 563–4t
- intergenerational risk sharing: catastrophe insurance and, 644; entitlements and, 630–44
- intergenerational tax sharing: government borrowing and, 291–4; Ricardian equivalence and, 292–3
- international agreements: global externalities and, 356–66; prisoners' dilemma and impediments to, 359–63
- international aid: global government and, 728n62; global insurance and moral hazard of, 569–71
- International Monetary Fund (IMF), 366, 366n46; absence of corruption in, 573n80; direct democracy and policy, fiscal federalism and, 480, 728; global social insurance and, 568
- international trade: gains from, 62n54, 62n55; import quotas and, 278–9; taxes on, 274–9, 300; interest groups and, 750
- international trade policy, Pareto efficiency and compensation, 57; social insurance and, 753; size of government and, 752; use of import duties, 274
- Internet, direct and representative democracy and, 438–41

- intuition, paternalistic public policy and limits of, 382–6
- investment: compulsory *vs.* voluntary savings and, 639; dividend payments, taxation of, 699–700; home bias in, capital income taxation and, 694; Laffer curve and, 267; portfolio investment and real assets, taxation of, 695
- invisible hand (Adam Smith): competitive markets and, 4–5, 64; favors in markets and, 4–5; self-interested decisions and, 42, 73–4; social benefits of, 12–13; voting behavior and, 35, 65–6
- involuntary unemployment: Mirrlees problem in optimal income taxation and, 689n25, 690n27; unemployment insurance and, 613–15
- joint costs, private suppliers of public good, user prices and, 192, 192n56
- jurisdiction preferences and differences: decision to leave jurisdiction, 201–2; entitlements and locational choice and, 605–6; fiscal federalism and externalities in, 711, 712n52, 714; homogeneous and mixed jurisdictions, 204; income distribution and locational rents and, 205–6; locational choice of public goods and, 195; low-benefit *vs.* high-benefit persons, locational choice of public goods and, 197–8, 198n60, 202n64; public-good choices and, 711n51; separate jurisdictions, cost sharing and, 200–1; single-jurisdiction cost sharing, locational choice and, 200; tax competition and, 715, 717n57, 718; tyranny of majority and homogeneous jurisdictions, 477
- kibbutz model of self-managed labor, 123–4, 124n33, 124n34, 134, 168n34, 759n14, 760n14
- kidnapping and ransom, externalities and incentives for, 334
- labor force: allocation of, 57–8; competitive market wages and, 28, 28n22, 29; elasticity of supply, 249–50, 256–8, 262–3, 263n18, 264, 265n22, 266; excess burden of taxation and, 262–3, 263n18; incentives and monitoring of, 123; income support contingent on work, decision making and labor supply, 620; kibbutz model of, 123–4; Laffer curve and, 264–6, 267n24; leaky-bucket model of income distribution and, 505n12, 505n13; literature notes on, 134; meritocracy and economic mobility, 565, 565n73, 566, 566n73; production factors in, 267n24; property rights and market for, 37; Ramsey rule of efficient taxation and elasticity of, 672; self-management of, 111, 122–3, 123n31, 129, 134; supply response, excess burden of income tax and, 247, 247n3, 248, 248n4, 250n7, 250n8; taxation and politics and, 271–2; as tax revenue source, 264–6, 748; welfare reform and participation in, 626n42; women in, revenue growth and, 748; worker substitution plans, 624–5, 625n41
- labor self-management, 122–3; communism and, 111; kibbutz model of, 123–4
- Laffer curve: Bentham social welfare function and, 514, 577; income distribution and, 513–14; income taxation and, 686, 730; individual behavior and, 266; investment and, 267; leviathan government and, 266–8; lump-sum taxes and, 772–3; majority voting and income distribution and, 467–8; political sensitivity of, 267–8; progressive taxation and, 674; progressive *vs.* regressive taxation and, 687, 687n21, 688, 688n23; Rawls social welfare function, 514; tax evasion and, 288; tax reform and, 692; tax revenue and, 264, 265n23, 266
- law enforcement: crime and externalities and, 334; monopoly suppliers of, 141–2; as natural monopoly, 146n7; user prices for, 194
- laziness, Nietzschean anarchy and, 50
- leaky bucket of income distribution: choice of social insurance and, 511–12; economic growth and, 507; incomplete insurance and, 506f, 506–7n16; inequality measurements and, 574–5; social justice and, 773
- legal rights: case against subsidies and, 342–3; Coase theorem and, 323–5, 327, 329, 361; corrective taxes as public policy and, 340; paternalistic public policy and, 388–90; quotas and, 346–9; reciprocal externalities and, 345; regulation and, 345
- legal system: campaign contribution entities and, 82; corporation as legal entity in, 697–8; rent seeking and, 98; rule of law and, 56, 56n50
- legal tax incidence, 270, 299; social justice and, 491
- legally addictive goods, taxes on, 259
- leisure: income distribution and, 506n16, 507n16; unemployment insurance and, 616–17; wage subsidies and valuation of, 623
- Lenin, Vladimir, 168n33
- leviathan government, 268n25; choice of taxes in, 708, 731; Hobbes's concept of, 758–9, 759n13, 763; fiscal federalism and, 751–2; Laffer curve and, 266–8; local government principal–agent problems and yardstick competition, 721–3; locational mobility and escape from, 721; Ramsay rule for efficient taxation and, 671, 731; restraints on, 759–60
- libertarianism: moral relativism and, 387n67; “rational addiction” theory and, 379n53

- Lindahl consensus on public goods, 149–58;
 efficiency of user prices and, 193; first-best *vs.* second-best outcomes and, 203; fiscal federalism and, 710–11; group size and, 158; information problem, government role in, 178–80; jurisdictional preferences and, 202–3; locational choice as market substitute and, 195, 235–6; majority voting and income distribution and, 462–70; majority-voting equilibrium and, 413–18; prices and politics in locational choice and, 204–5; public financing of public goods and, 245n1, 247n2, 435n16, 773; second-best outcomes and, 200; single-jurisdiction cost sharing and, 200; Tiebout locational choice mechanism and, 199; user prices and, 186–7; voluntary cooperation and, 765n17; voting and, 409, 412n1, 413, 478
- linear income tax, 683, 684n20, 686; tax competition and fiscal federalism, 715–18f
- lobbyists. *See also* interest groups: political benefit and rent creation by, 87–8; rent seekers and, 87, 98
- locational choice: benefit principle and, 196; community values as public good and, 711, 711n51; cost sharing in separate jurisdictions and, 200–1; decision to leave jurisdiction and, 201–2; entitlements and, 605, 605n19, 606; escape from leviathan governments and, 721; externalities and, 395; fiscal federalism and, 709; government role in public-goods projects and, 227–8; gun laws and, 334; homogeneous and mixed jurisdictions and, 204; identification of tax payers and, 269; incentives revelation of benefits and, 198–9; market for public goods, 195; natural monopoly and cost sharing, 199; non-locational cost sharing through clubs and, 206; norms and conventions as public goods and, 197; paternalistic public policy and, 386–8, 398; prices and politics in, 204–5; public goods and fiscal federalism and, 710–11; quantities or qualities of public goods and, 197, 198n60, 202n64, 204; scope of, 196; second-best outcomes and, 200; single-issue voting and, 442n21; Tiebout locational choice mechanism, 195–208; voting and, 479
- logrolling: inefficiency and, 430–1; money payments and, 431–4; public spending efficiency and, 429–30; voting and, 428–34, 479
- Lorenz curve, income inequality measurement and, 573, 573n81, 575, 575n82
- loss aversion, prospect theory and, 522
- lotteries: financing of public goods and, 229; average *vs.* expected utility in, 518n31;
- Bentham's incomplete insurance and, 517, 517n30, 519; entitlements and, 607–8; as ex-ante equality, 31–2, 32n25, 32n26; outcomes of, 519, 519n34; paternalistic public policy and limits of, 382t, 383n60, 383n61, 386; as taxation, 705, 731
- low-income societies: corruption in, 572, 572n79, 573; global insurance and moral hazard in, 569–71; market capitalization and Coase theorem and, 330–1
- luck, effort decisions and, 528–529
- lump-sum tax, 259, 260–1; political economy and, 772–3
- majority voting: checks and balances and, 434–7; common-pool problem, fiscal federalism and, 725–30; Condorcet winner and, 422, 425, 728; constitutional restraints on, 760–1; cultural norms and, 462n41; equilibrium and, 413, 416n2, 418, 422, 451n30, 452n30; externalities of collective decision making and, 427; growth of government and, 749; income distribution and, 462–70; lack of exploitation in, 464; median voter and, 409–17, 437, 478–9; outcome cycling or instability, 422–4, 479; pair-wise majority voting, 422, 728; political competition and, 437–61; private benefits of, 463; public spending efficiency and, 418–20; social welfare function and, 499–503, 561–2; tyranny of, 437, 453, 455–6, 477; voluntary income transfers and, 548
- management: performance monitoring of, 104, 104n14; principal-agent problems and, 103–7, 127
- Mao Zedong, 168n33
- marginal excess burden: size of, 263–4; tax-financed public spending, 256–8
- marginal rate of substitution, efficiency of public and private goods and, 232–3
- marginal tax rate: income-tax schedules, 676–8, 678n11; optimal tax rate, 669n5, 698n37; pre-tax income and, 692n32; zero marginal tax rates, income distribution and, 688–9, 730
- marginal utility, 7n5; efficient contributions to public good and, 223n78; equal-sacrifice principle of taxation and, 681, 681n15, 681n16; of income, examples of, 681n17, 682n18; of income, risk aversion and, 495; of income, socially just taxation and, 675
- Marine Mammal Protection Act, 364–5
- market corrections: externalities and private resolution, 309–34, 351–95; externalities and public policies, 334–66; paternalist public policy and, 367–92; self-harm and hyperbolic discounting and, 367–82

- market equilibrium: competitive
 - market-adjustment mechanism, 10–11f;
 - consumer surplus and, 10n7, 10n8; efficiency in, 9, 11f, 13, 56–62, 70; Lindahl consensus on public goods and, 151; public and private goods and, 147; stable and unstable equilibria, 15–16
- market rate of interest, discount rate for public goods and, 214–15
- market valuation: bounded rationality and, 386n66; cost-benefit analysis and absence of, 209–10; over time, cost-benefit analysis of public goods and, 212–15
- markets: absence of equilibrium prices in, 392–4; alternative markets for health care, 647–8; case for, 4–23; communism and absence of, 107–13; competitive market efficiency, 5–16; creation of Coase theorem and aversion to, 328; defense spending and, 171; dissipation of power with, 113n24; for emission rights, 350–1; entitlements and, 602; environmental policy and, 366; excess burden of taxation and, 251–2, 260n16, 262; failure to achieve efficiency by, 16–20; favors in, 4–5; for health insurance, 646–7; illegal markets, 370–1; income transfers and, 593, 593n5; information and spontaneous order in, 20–3; information efficiency in, 23; insurance markets, 497–8; literature notes on case for, 67–8; popular bias against efficiency of, 33; private property rights and, 37–8; public goods and role of, 146–7f, 196, 233; rule of law and, 36–56; self-harm and hyperbolic discounting in, 367–82; self-interest and, 4–5; social benefit of, 754; trust in anonymous market transactions, 769; undesirable markets, 369–72; universal health entitlements through, 648–9; valuation of entitlements and, 594–5; voting *vs.*, 407, 420–1, 479
- marriage: assortative mating and economic mobility, 564; commercial-sex market and, 371n49; social status and, 554n57
- maximally appropriative taxes, majority voting and, 467–70
- May's theorem, on majority voting, 413
- means testing, for retirement benefits, 640
- media: principal–agent problems and, 81–2; proximity to political decision making, 724
- median voter: benefits distribution and, 419, 419n5, 420; identity of, 417–18; income distribution and, 474; majority voting and, 409–16, 416n3, 416n4, 417, 437, 478–9; middle-class voting coalitions and Director's law, 475–6; public spending and, 476; single-issue voting and political competition, 441–6; unequal tax shares of, 417f
- mercantilism: historical evolution of, 743; rent seeking and, 97–8
- meritocracy: ex-ante equality and, 612; in labor markets, economic mobility and, 565, 565n73, 566, 566n73
- middle class: benefits of public goods for, 746; economics of choice and, 14–15; industrial revolution and emergence of, 743–4
- military alliances, national security and, 169
- minimum wage, as explanation for unemployment, 613
- Mirrlees problem: indirect taxes and, 707n47; optimal income taxation and, 687, 730; work incentives and, 688–90
- “missing markets” concept, externalities and, 314–15, 393–4
- mixed populations, ethical behavior and, 53–4
- mixed-strategy equilibrium: anarchy and, 47n42; burden of inefficiency in, 49–50; example of, 48n43; randomizing behavior and, 47–8; rent-seeking contests and, 92, 92n8; strong and weak in, 46–7t, 48; volunteer-type public goods, 165, 165n27, 166; weakest-link public goods, 161
- Modigliani-Miller theorem, 700n39
- money transfers: entitlements as, 589–95, 652; instability of outcomes with logrolling and, 432; logrolling and, 429t, 431–4; money laundering, 288n40; recipients of, 589–91
- monopolies: economic freedom compromised by, 17; efficiency losses in, 16, 16n14, 17f; import quotas and, 279n33; natural monopolies, 19; profits, literature notes on, 70; quotas and, 346, 346f; regulatory bureaucracies as, 101–2; rent creation and seeking and social losses from, 88f; rent endurance over time and, 93–4; second-best outcomes theory and, 347n29; social justice and, 17–20, 63–4; taxation and marginal damage and, 341n23
- monopsony: economic freedom compromised by, 17; efficiency losses in, 17n16; minimum wage and, 613n31
- Montreal Protocol, 357
- moral dilemma, terrorism and, 174–6
- moral hazard: adverse selection and, 533; asymmetric information and, 528; behavior and absence of, 532–3, 773–4; fiscal federalism and, 723–4; global social insurance and, 569–71; incomplete insurance and, 541–3; insurance and, 527–32; paternalistic public policy and usury and, 380–1; prisoners' dilemma and, 529–32; public-policy responses to, 543; self-deprivation and, 532; social insurance and, 540, 540n45, 541; social justice and, 527–43; summary of principles of, 578–9;

- unemployment insurance, 615–16; voluntary insurance and, 528, 532; welfare reform and, 625–7; work ethic and, 533
- moral philosophy, markets and, 4
- moral relativism: ethical principles vs., 711n51;
- paternalistic public policy and, 387, 387n67, 388
- Most-Favored-Nation clause, of international trade agreements, 754n10
- Moving to Opportunity program, 607–8
- mutual risk sharing, insurance and, 497–8
- Nash bargaining solution for cooperative games, cost sharing for public goods and, 208, 208n66, 208n67; voting coalitions and, 433n15
- Nash equilibrium, 40n31; campaign contributions and, 78n2; Clarke tax and, 182, 182n45, 183; cooperation on public goods and, 157, 208, 208n66, 208n67, 208n68; defense spending and, 169, 170; demographic dilemma, intergenerational income transfers, 633–5; efficient contributions to public good and, 223–4; effort decisions and moral hazard, 531, 531n42; expressive voting for voluntary income transfer and, 547–8; government free riding and, 361–2; group size and voluntary payment for public goods, 225–7; honest vs. predatory persons and, 54; impediments to international agreements and, 360; income changes and public goods contributions, 227–8; inefficiency of, 49–50, 50n45, 224–5, 227; Locke's concept of government and, 757; misrepresentation of charitable donor preferences and, 551n54; national security and, 234; Nietzschean anarchy and, 46–7t, 47n42, 49; non-Nash behavior conjectures, 765n17; pleasure from voluntary giving and, 548–9, 549n49, 549n51; prisoners' dilemma and, 41n34; private income transfers and, 546; public goods and, 152–3, 153n10; rational behavior in, 763, 763n16; reaction function, voluntary payment for public goods and, 219–22; rent seeking and public goods and, 228; rent seeking as prisoners' dilemma and, 86–7; roving and stationary bandits and, 50–2; rule of law and, 40–1, 66; self-enforcing contract and, 40–1; self-interested decisions and, 42–5; sequential decisions, 41–2; single-issue voting and, 441–6; social welfare function and, 518, 518n33, 520n35; strategic behavior in rent-seeking contests, 90; tax competition and coordination and, 719–20; tax coordination and political behavior, 720; trust in anonymous market transactions, 769; Tullock rent-seeking contest and, 115–16; utility maximizing choice, contributions to public goods and, 218–19; voluntary payment for public goods and, 222–3; volunteer-type public goods, 165, 165n25, 165n26, 167; weakest-link public goods, 160–2; zero public-goods contributions, tendency toward, 227
- national security: asymmetric warfare and terror defense, 171–7; capabilities and technology and, 170; defense spending as strategic decision, 169; democracy and, 170–1, 171n36; markets and defense equipment, 171; military alliances and, 169; monopoly suppliers of, 141–2; as public good, 168–78, 234
- national sovereignty, environmental policy and, 366
- natural monopolies: capture in, 119; conditions for, 19; efficient supply and, 118; financing solutions for, 125; fixed and sunk costs of, 117, 117n27; government ownership and privatization of, 121, 121n30, 122; institutions and, 107, 116; literature notes on, 133–4; for private goods, fiscal federalism and, 712–14; private goods and, 140–1f, 142; private suppliers of public good, user prices and, 191–2; profit maximization and, 118; public goods and, 140–2, 146n7; self-financing price and, 118; subsidies and, 118, 119n28, 120; summary of, 128–9; Tiebout locational choice mechanism and, 199; user prices and, 187; waste-management example of, 120–1
- natural right of possession: reservations concerning, 29, 29n23; social justice as, 32–3, 65; voting on income redistribution and, 451; experiments with dictatorship games and, 560
- natural selection theory, eugenics and, 390–2
- negative interest rates, retirement entitlements and, 637–8
- negligence, Coase theorem and, 326
- Nietzschean anarchy: burden of inefficiency in, 49–50; capture theory and, 725; credibility and, 50; equilibrium in, 46–7t, 47n42, 49; global government and fiscal federalism and, 728; global social insurance and, 567–8; government breach of contract and, 56; joint probabilities of weak and strong and, 49, 49n44; laziness and, 50; rent seeking and, 98; roving and stationary bandits and, 50–2, 52n48; rule of law and, 45–52, 66; source of inefficiency in, 46; voting and income distribution and, 475
- NIMBY (not in my backyard), market capitalization and Coase theorem and, 330
- non-competitive markets, efficiency losses in, 16–17
- non-convexities, externalities and, 340–9, 392–4
- nondemocratic governments, global externalities in, 365–6

- non-Nash behavior conjectures, and Lindahl mechanism, 153; voluntary cooperation and, 765n17
- normative questions: about competitive markets, 13; about information and spontaneous order, 23; about progressive taxation, 678; benefits of public goods and, 139; excess burden of taxation and, 264; income distribution and, 491–577; involuntary income transfers and, 491; Pareto efficiency and ex-post equality, 31; political decision making and, 74; tax coordination and political behavior, 720; voting systems and Condorcet winner and, 453
- Obesity: *See* overeating and obesity
- objective probability, 522n37; Bentham’s expected utility and, 516, 516n28; deviation from, 521–2
- objective verification, public policy and moral hazard with, 540
- obsolescence: compensation and, 26–7; natural right of possession and, 29
- oil exploration: corporate profits tax and risk in, 698; Ramsay rule for efficient taxation and, 696
- oligopolies, efficiency losses in, 17n16
- open access, natural monopolies and, 120
- opportunism: anonymous cooperative and opportunistic societies, 768–9; consensus voting and, 412–13
- optimal taxation, 667–93; Bentham social welfare function and, 707n46; computations and simulations, 690; exemptions and deductions, 690n29; income taxation, 682–90; indirect taxes and, 707–8; Mirrlees problem and, 687; political and social objectives, 690–3; progressivity or regressivity in, 689–90; reform of, 692; summary of, 729–30; value of tax rate and, 686
- organ transplants, illegal markets and, 370–1
- Origin of the Family, Private Property and the State*, 112
- Ostrogorski’s paradox, direct and representative democracy and, 438n19, 439, 440n20, 441
- overeating and obesity: microwave oven and, 377; paternalistic public policy and, 372
- ozone layer, global externalities and deterioration of, 357, 357n38
- paradox of gain from coercion, 44
- Pareto efficiency: Coase theorem on externalities and, 323; compensation and, 24–7, 65, 427–8, 428n10; cooperation and, 40; cost-benefit analysis and, 24–5; demand function of user prices and, 190; efficiency of public and private goods and, 232–3; entitlements and, 599n15; envy and, 33–4; ex-post equality and, 30; externalities and, 314; folk theorem and, 51n47; free choice and, 388–90; goods allocation and distribution, 58–9; goods production and, 58–9; income distribution and, 61; insurance and social justice and, 498; interdependent utilities and income transfer and, 544–5f; intergenerational social contract and, 627–8; multiple-issue voting and public spending, 447f; predetermined income distribution, 503; public good cost-benefit analysis and, 209–17; of public goods, 143; public goods, Lindahl prices and, 186–7; public goods contributions, 223–4; resource allocation and, 57n51, 57n52; roving and stationary bandits and, 51–2; social benefit of government growth and, 754–6; social justice and compensation and, 25–7; social welfare function and, 499–500; tax competition and coordination and, 719–20; voting consensus and, 409–13, 478; of wage subsidies, 622–5
- paternalistic public policy, 367n47; bounded rationality and, 386; community values and locational choice, 386–8; compulsory spending and, 367–8; eugenics and, 390–2; framing effects, 385–6; government growth and, 747; homeownership and, 368; in-kind transfers and, 594; interdependent utilities and censorship and, 388–92; limits of intuition and, 382–6; market correction and, 367–92; personal behavior and, 372–3; self-harm and hyperbolic discounting in markets and, 367–82; social benefit of, 754; summary of, 397–9; undesirable markets and, 369–72; usury and, 380–1
- pay-as-you-go income transfers: asymmetric income transfer, 635; demographic prisoners’ dilemma and, 633–5; designated contributions, 630–1; family demographics and, 633–4; generational accounting and, 635; immigration and, 633; intergenerational risk sharing and, 630–44; savings and growth and, 640–1; social contract and, 629; sustainability of intergenerational income sharing and, 637–45; transition from dependence on, 641–4
- payday lending, hyperbolic discounting and, 380
- payroll taxes, unemployment insurance and, 611n29
- pensions. *See* retirement entitlements
- personal behavior: absence of moral hazard and, 532–3; changes in cultural norms and, 536; community values and locational choice and, 386–8; diverse population and norms of, 533; earned and unearned money and, 560–1;

- excess burden of taxation and, 249;
externalities and, 312, 314; failure of ex-ante equality, 607; hyperbolic market discounting and, 373–80; market aversion, Coase theorem failure and, 328; misrepresentation of charitable preferences and, 551–2; moral hazard and, 527–32, 773–4; norms of fairness and, 554–62; paternalistic public policy and excesses of, 372–3; personal exit as checks and balances alternative, 436; private charity and public assistance, 554; private resolution and, 378–9; procrastination, hyperbolic market discounting and, 377; prospect theory and, 521–2; regret and, 522; risk aversion and insurance and, 494–6; volunteer-type public goods, 167; welfare reform and, 625, 626n44, 627
- personal freedom: communism and, 112–13; externalities and, 336–7; Hobbes's discussion of, 758–9; leviathan governments and, 759n14, 760n14; paternalistic public policy and, 388–90; voluntary cooperation and, 766; volunteer-type public goods and, 167–8
- personal head tax, 260, 260n16, 261
- personalized accounts, for unemployment insurance, 617–18
- Pigovian taxes and subsidies: adverse externalities of inputs and, 341; case against, 342–3; cost-benefit analysis, 342; education as positive externality and, 344; environmental taxes, 341; externalities and nonconvexities and, 340–9; innovation as response to, 342; producers' opposition to, 350n31; public policy implementation and, 337–9; quota rights in competitive markets and, 347–8; regulation and, 344–5; summary of, 396–7
- plebiscite, as direct democracy, 437
- plurality, voting rule, 454–5
- political competition: Condorcet winner and voting systems, 453–61; direct and representative democracy, 438–41; equilibrium and, 450–1; ideology and principle with equilibrium in, 451; multiple-issue voting and, 447–51; number of candidates and, 446; representative democracy and, 480–2; single-issue voting and, 441–6; voting and, 437–61
- political correctness: and moral relativism, 387
- political decision making. *See also* electoral politics; principal–agent problem; voting: asymmetric information and, 74–7; collective action and, 80; cost-benefit analysis of public goods and, 217; deferral of, on retirement policies, incentives for, 643, 643n55; environmental policy and, 351–6; externalities and public policy, 335–6, 349–56; fiscal federalism and, 720–30; government budget example of, 75–6; growth of government and, 749–53; income redistribution and, 723–4; industry profits and, 353; institutions and, 73; Laffer curve and, 267–8; literature notes on, 129–32; lobbyists and rent seekers and, 87; locational mobility and leviathan governments, 721; majority voting and externalities and, 427; market allocations and, 22, 23; moral hazard and incomplete insurance and, 543; optimal taxation and, 690–3; personal savings contributions for retirement and, 640; probabilistic voting and tax structure complexity, 691n30; producer–environmental alliances and, 363–5; proximity to, 724; public financing of public goods and, 245–6; public interest and, 353–4; public policy support and, 77–84; rent creation and rent seeking, 84–98; rent extraction and, 100; retirement policies and, 636–7; stakeholders in, 81; taxation and, 271–2, 708n49; term limits and, 83–4; terrorism and, 177–8; Tiebout locational choice mechanism and, 204–5; voters *vs.* interest groups and, 80; voting decisions and, 472–3
- poll tax, 260
