1 Introduction
1.1 The economics of professional team sports: three seminal contributions
1.2 Outline of this volume

2 The economic theory of professional sports leagues
2.1 The North American professional team sports model
2.2 A model of an n-team league
2.3 A model of a two-team league
2.4 Revenue sharing
2.5 Restraints on expenditure on players' salaries

3 Competitive balance, uncertainty of outcome and home-field advantage
3.1 Measuring competitive balance and competitive inequality
3.2 Home-field advantage
3.3 Distributional properties of the goals scored by the home and away teams
3.4 Good and poor sequences, and persistence in football match results

4 Forecasting models for football match results
4.1 Previous literature on modelling and forecasting match results in football
4.2 A goals-based forecasting model
4.3 Probabilistic forecasts for match results in 'scores' format

## Contents

4.4 A results-based forecasting model 95  
4.5 Probabilistic forecasts for match results in 'win-draw-lose' format 98  
4.6 Evaluation of the goals-based and results-based forecasting models 100

5  Game theory and football games 106  
5.1 The penalty kick 107  
5.2 A game-theoretic model of in-play strategic choice for football teams 111  
5.3 The timings of player dismissals and goals 119  
5.4 An empirical model for the in-play arrival rates of player dismissals and goals 122  
5.5 Estimation results and interpretation 124  
5.6 Stochastic simulations for in-play match result probabilities conditional on the current state of the match 130

6  English professional football: historical development and commercial structure 139  
6.1 English professional football: competitive structure and team performance 139  
6.2 Match attendances 150  
6.3 Financial structure of English football: overview of profit and loss accounts 159  
6.4 Gate revenues and admission prices 162  
6.5 Broadcast revenues 171  
6.6 Football’s labour market: players’ salaries and the transfer system 179  
6.7 Ownership, governance and finance 186

7  Determinants of professional footballers’ salaries 197  
7.1 The compensation of professional footballers 198  
7.2 The economics of superstars 201  
7.3 Rank-order tournaments and intra-team earnings distributions 204  
7.4 Determinants of players’ compensation: empirical evidence 209

8  Professional footballers: employment patterns and racial discrimination 216  
8.1 Employment mobility, migration and career structure in English football 217  
8.2 International migration of professional footballers 227  
8.3 Racial discrimination in professional team sports 236

9  The football manager 249  
9.1 The role of the football manager 251  
9.2 Measuring the managerial contribution: the production frontier approach 254
