## 1 Introduction
Norman Epstein and John R. Grace

1.1 The spouted bed 1  
1.2 Brief history 3  
1.3 Flow regime maps encompassing conventional spouting 5  
1.4 Nonaxisymmetric geometries of spouted beds 7  
1.5 Spouted beds in the gas–solid contacting spectrum 9  
1.6 Layout of chapter topics 12  
   References 14  

## 2 Initiation of spouting
Xiaotao Bi

2.1 Introduction 17  
2.2 Evolution of internal spout 19  
2.3 Peak pressure drop 22  
2.4 Onset of external spouting and minimum spouting velocity 23  
   Chapter-specific nomenclature 26  
   References 27  

## 3 Empirical and analytical hydrodynamics
Norman Epstein

3.1 Constraints on fluid inlet diameter 29  
3.2 Minimum spouting velocity 30  
3.3 Maximum spoutable bed depth 35  
3.4 Annular fluid flow 39  
3.5 Pressure drops, profiles, and gradients 47  
3.6 Spout diameter 51  
3.7 Flow split between spout and annulus 53  
   References 54

4 Computational fluid dynamic modeling of spouted beds 57
Xiaojun Bao, Wei Du, and Jian Xu

4.1 Introduction 57
4.2 Eulerian-Eulerian approach 57
4.3 Eulerian-Lagrangian approach 68
4.4 Concluding remarks 76
  Chapter-specific nomenclature 77
  References 78

5 Conical spouted beds 82
Martin Olazar, Maria J. San José, and Javier Bilbao

5.1 Introduction 82
5.2 Conditions for stable operation and design geometric factors 82
5.3 Hydrodynamics 84
5.4 Gas flow modeling 87
5.5 Particle segregation 90
5.6 Local properties 92
5.7 Numerical simulation 96
5.8 Applications 97
  Chapter-specific nomenclature 100
  References 101

6 Hydrodynamics of spout-fluid beds 105
Wenqi Zhong, Baosheng Jin, Mingyao Zhang, and Rui Xiao

6.1 Hydrodynamic characteristics 105
6.2 Typical applications 119
6.3 Closing remarks 122
  Chapter-specific nomenclature 123
  References 123

7 Spouted and spout-fluid beds with draft tubes 128
Željko B. Grbačić, Howard Littman, Morris H. Morgan III, and John D. Paccione

7.1 Operation of draft tube spout-fluid beds 128
7.2 Novel applications and experimental studies 133
  Chapter-specific nomenclature 138
  References 138

8 Particle mixing and segregation 141
Giorgio Rovero and Norberto Piccinini

8.1 Gross solids mixing behavior 141
8.2 Mixing in a pulsed spouted bed 148
8.3 Origin of segregation studies 149
8.4 Segregation in continuously operated spouted beds 150
8.5 Top surface segregation 153
8.6 Mixing and segregation in conical spouted beds 154
8.7 Mixing and segregation in a multispouting vessel 156
8.8 Mixing and segregation in a modified spouted bed 157
Acknowledgment 157
Chapter-specific nomenclature 158
References 159

9 Heat and mass transfer 161
Andrzej Kmiec and Sebastian Englart
9.1 Introduction 161
9.2 Between fluid and particles 161
9.3 Between wall and bed 166
9.4 Between submerged object and bed 168
9.5 Temperature uniformity 169
Chapter-specific nomenclature 170
References 171

10 Powder–particle spouted beds 175
Toshifumi Ishikura and Hiroshi Nagashima
10.1 Description of powder–particle spouted beds 175
10.2 Fundamentals 177
10.3 Applications 182
Chapter-specific nomenclature 184
References 184

11 Drying of particulate solids 187
Maria Laura Passos, Esly Ferreira da Costa Jr., and Arun Sadashiv Mujumdar
11.1 Various spouted bed dryers for particulate solids 187
11.2 Dryer design models 194
11.3 Drying model formulation 194
11.4 Computational fluid dynamic models 201
Chapter-specific nomenclature 201
References 202

12 Drying of solutions, slurries, and pastes 206
José Teixeira Freire, Maria do Carmo Ferreira, and Fábio Bentes Freire
12.1 Introduction 206
12.2 Drying process 206
## Contents

12.3 Influence of paste on the fluid dynamic parameters 211  
12.4 Modeling of drying 215  
12.5 Final remarks 218  
   Chapter-specific nomenclature 219  
   References 219  

13 Granulation and particle coating 222  
Sandra Cristina dos Santos Rocha and Osvaldir Pereira Taranto  
13.1 Introduction 222  
13.2 Granulating and coating mechanisms 223  
13.3 Advances in spouted bed granulation/coating 225  
13.4 Surface properties influencing granulation/coating processes 230  
13.5 Concluding remarks 233  
   Chapter-specific nomenclature 233  
   References 234  

14 The Wurster coater 238  
Sarah Palmer, Andrew Ingram, and Jonathan Seville  
14.1 Introduction: particle coating techniques 238  
14.2 Features of the Wurster coater 240  
14.3 Uniformity and quality of coating 241  
14.4 Particle motion studies 243  
14.5 Modeling of coating thickness variation 245  
14.6 Developments in design 246  
   Acknowledgments 246  
   Chapter-specific nomenclature 247  
   References 248  

15 Gasification, pyrolysis, and combustion 250  
A. Paul Watkinson and Antonio C. L. Lisboa  
15.1 Gasification background 250  
15.2 Spouted bed gasification of coal and coke 251  
15.3 Spouted bed gasification of biomass and wastes 256  
15.4 Throughput and scale of spouted bed gasification 256  
15.5 Modeling of spouted bed gasification 257  
15.6 Spouted bed pyrolysis of coal, shale, biomass, and solid wastes 258  
15.7 Combustion of solid fuels 260  
15.8 Spouted bed combustion of coal and other solids 261  
15.9 Concluding remarks 264  
   References 265
