## SUBJECT INDEX

- **self-determination, in wisdom, 830**
- **self-determination theory, 765**
- **self-discipline, 266, 761–2**
- **self-efficacy, 574, 800**
- **self-evaluation, accurate, 800**
- **self-identification, racial, 294–5**
- **self-knowledge, rich, 574**
- **self-monitoring, 425, 595**
- **self-recognition, in animal intelligence, 319**
- **self-reference, 444**
- **self-regulation, 760–3**
  - behavioral regulation and effortful control, 762
  - delay of gratification and self-discipline, 761–2
  - heuristics for, 540–1
  - improving, 762
  - overview, 760–1
  - and sex differences in intelligence, 266
- **self-regulatory systems and plans, 575**
- **self-relativism, 840–1**
- **self-reported intelligence, 721, 722**
- **self-reports**
  - CSQ, 587
  - individual differences in Mating Intelligence, 612
  - mixed models of emotional intelligence, 538–9
  - personal wisdom, 838–9
  - social intelligence, 567, 568
  - self-triggered recall and rehearsal loop, 333–4
  - SEM (Schoolwide Enrichment Model), 248–9
- **semantic memory, 315**
- **semantic networks, in AI, 472**
- **semantics, 313**
- **semantic social knowledge, 575**
- **semantic web, 479**
- **senescence, 182**
- **sensations task, MSCEIT, 538**
- **sense of destiny, in three ring conception of giftedness, 243**
- **sensitive periods, 134–5**
- **sensory systems, versus intelligences, 491–2**
- **sentence verification task, 15**
- **separate abilities, versus general intelligence theory, 40–4, 223–6. See also specific intelligence factors; specific theories of intelligence**
- **serial-reversal learning, 311–12**
- **Series subtest, Test of g: Culture Fair, Level II, 515**
- **SES. See socioeconomic status**
- **seven-repeat allele (7-DRD2), 138**
- **sex, biological, and Mating Intelligence, 604**
- **sex differences in intelligence, 253–66. See also Mating Intelligence**
  - across lifespan, 256–8
  - future directions, 266
  - general discussion, 876–7
  - imaging studies on, 359–60
  - MRI studies, 357
  - over time, 258
  - overview, 257–4
  - PET studies of, 355–6
  - reasons for, 258–66
  - biological perspectives, 259–62
  - biopsychosocial model, 265–6
  - evolutionary perspectives, 258–9
  - sociocultural perspectives, 262–5
  - smarter sex, 254–6
  - stereotype threat, 755–6
  - sex education, 615–16
  - sex hormones, 259–62
  - sex role stereotypes, 263–4
  - sexual selection, 339–40, 609–10
  - sexy-hand axe hypothesis, 339–40
  - shaping, in theory of successful intelligence, 505–6
  - shared genetic variance, 92
  - short-term apprehension and retrieval, 538
  - short-term memory, expert, 852–3
  - short-term or immediate memory (Gsm), 48
  - short-term store (STS), 396, 397–8
  - short-term visual memory, 48
  - SHRDLU program, 477
  - signal theory of educational effects, 675
  - sign language, in chimpanzees, 318
  - Similarities subtest, Wechsler scales, 651, 652, 657
  - simple span tasks, 397, 401–2, 403–6, 409–10
  - simulation in AI, 470
  - and rationality, 787, 793
  - simultaneous processing, 33–4, 73, 777
  - single-case evidence, limits of, 807
  - single-nucleotide polymorphisms (SNPs), 95, 96
  - single-sex schooling, 253–4
  - single versus multiple intelligences, 133–4. See also g; general intelligence, theory of; multiple intelligences theory
  - situated action, 470, 473–4, 475, 559–60
### SUBJECT INDEX

977

situated cognition, 477–8  
situated learning, 592  
Situational Test of Emotional Understanding (STEU), 537  
Situational Test of Emotion Management (STEM), 537  
skills. See also dynamic skill theory  
versus intelligences, 492  
specific cognitive, teaching, 119–20  
smoking, in cognitive epidemiology, 688, 690, 697–8  
Snijders-Oomen Nonverbal Intelligence Scale for Children (SON), 634  
SNPs (single-nucleotide polymorphisms), 95, 96  
SOA (stimulus-onset-asynchrony), 381  
Social Adaptation, BIDS, 661  
social awareness, 572  
social capital, 300  
social cognition, 455, 456–8, 575  
social-cognitive domain theory, 570  
social communication, 569  
social competence, 627, 628  
social concepts, 575–6  
social environment, and intelligence, 871–2. See also society and intelligence  
social explanations for intelligence of Homo erectus, 333  
social facility, 572–3  
social insight, 569  
social intelligence, 564–77  
versus cultural intelligence, 589  
defining, 564  
development of, 568–70  
autism, 560–70  
mental retardation, 568–9  
moral reasoning, 570  
overview, 568  
fall and rise of, 570–3  
emotional intelligence, 572  
overview, 570–1  
social neuroscience, 572–3  
theory of multiple intelligences, 571  
knowledge view of, 573–7  
evolution of cognitive views of personality, 574–5  
overview, 573–4  
social intelligence as social knowledge, 575–6  
social intelligence in life tasks, 576–7  
measuring, 564–7  
convergent and discriminant validity, 567  
George Washington Social Intelligence Test, 565  
Guilford’s Structure of Intellect model, 565–7  
overview, 564–5  
prototype of, 597–8  
in theory of successful intelligence, 512  
Social Intelligence Interview, 569  
social interactions, developmental web for, 162, 165–5  
social intuitionist model of moral reasoning, 445–6  
social knowledge, social intelligence as, 575–6  
social learning theories, 262–6, 574  
social models of intelligence, 67–73  
critique of, 72–3  
emotional intelligence, 71–2  
multiple intelligences, 69–71  
overview, 67  
theory of successful intelligence, 67–9  
WICS, 60  
social networks, and cultural intelligence, 593  
social neuroscience, 572–3  
social rejection, 759. See also belonging, beliefs about  
social sensitivity, 569  
social skills, in Down syndrome, 198  
social trends, BIDS, 661  
society and intelligence, 666–78  
caveats, 677–8  
cognitive competence and measures of  
wellbeing, 671–2  
direction of causality, 672–4  
future research, 678  
international differences in cognitive competence  
meaning of, 668–71  
overview, 667–8  
malleability of ability, 674–6  
overview, 666–7  
policy implications, 676–7  
sociocultural adjustment, 591  
sociocultural perspectives  
multicultural perspectives of intelligence, 276–7  
sex differences in intelligence, 262–5  
socioeconomic status (SES)  
health and, 693, 694, 699  
and heritability, 90, 109, 136  
and international differences in intelligence, 672–3, 676  
and IQ, 299–300  
multicultural perspectives of intelligence, 276–7, 282–3  
sociopolitical orientation, 728  
SOI (Structure of Intellect) model, 10–11, 43–4, 565–7, 772  
SON (Snijders-Oomen Nonverbal Intelligence Scale for Children), 634
standardization samples, in deviation IQ, 21
Stanford-Binet Intelligence Scale (SB), 23, 30, 31–3
Stanford-Binet Intelligence Scales-Fifth Edition (SB5), 34
Stanford Revision of the Binet-Simon Intelligence Scale, 23
STAT (Sternberg Triarchic Abilities Test), 68–9, 513–14, 520–1
statistics, teaching to increase cognitive performance, 119
status quo bias, 380
STEM (Situational Test of Emotion Management), 537
stereotype lift, 112, 758–9
stereotypes, gender, 265–4
stereotype threat, 754–8
in African Americans, 263–4
Black-White score gap, 284–5
general discussion, 112
motivational argument, 756–8
overview, 754–5
studies of, 872
understanding, 755–6
stereotyping, and cognitive unconscious, 457–8
Sternberg Triarchic Abilities Test (STAT), 68–9, 513–14, 520–1
STEU (Situational Test of Emotional Understanding), 537
stigmatization, and stereotype threat, 755
Stimpy robot, 470
stimulation, intellectual, and retention of cognitive function, 114
stimulus class formation, in animal intelligence, 312–13
equivalence relations, 312–13
perceptual classes, 312
stimulus generalization, 311
stimulus-onset-asynchrony (SOA), 381
stipulative definitions, 847, 848–9
stories, in test of creative abilities, 516
strategic combination, 424–5
strategic flexibility, 459–60
strategic inefficiency, 758
strategic thinking, 422
strategies
in assessment of analytical intelligence, 309
as knowledge, 745
as reasoning, 423
instream of thought, 333
street vendors, and everyday mathematics, 553
strengths, in theory of successful intelligence, 505
strong methods of reasoning, 423
structural imaging studies, 356–7, 361–2

sound-analysis, in reading, 155–6
South Africa, intelligence testing in, 637
South America, implicit theories of intelligence in, 630
spandrel, intelligence as evolutionary, 339
Spanish version, WAIS-III, 257
span tasks
complex, 397, 399–401
simple, 397, 402–2
spatial complex span tasks, 401
spatial imagination, in CISYC, 638
spatial intelligence, 70, 243, 498
spatial perception, 256
spatial processor, 74–5
spatial simple span task, 401, 405–6
spatial visualization, 256, 257
spatial working memory, 255
special education, racial and ethnic minority students in, 284
special expertise, belief in, 809
specialized intelligences, 336–7
specialized knowledge, in task performance, 741
species-typical mating mechanisms, 611–12
specific-ability models of emotional intelligence, 531–337
specific intelligence factors (3). See also multiple intelligences theory; successful intelligence, theory of
in prodigies, 217–19, 238–9, 230–1
psychometric models, 60

### SUBJECT INDEX

| two-factor theory, 6 | validity. See also construct validation of reasoning tests; predictive validity |
| two-action procedure for imitation, 319 | Bremen measure of personal wisdom, 841 |
| twin studies | convergent and discriminant, in social intelligence, 567 |
| general discussion, 86 | of intelligence tests, 31–2 |
| genetic/imaging studies, 362–3 | of IQ tests, 297–9 |
| two-factor theory, 6–8, 9–11, 148 | of IQ versus job performance, 551–2 |
| general intelligence, theory of | logical, 827 |
| two-group approach to intellectual disabilities, 165 | self-concept maturity, 841–2 |
| Type 1 processes/processing, 445–7, 786–8 | of self-report, 539 |
| Type 2 processes/processing, 446–7, 786–8 | of social models of intelligence, 72–3 |
| typical behavior, 715–16, 724 | tests of intelligence, 27 |
| Typical Intellectual Engagement (TIE), 720–1 | valine-to-methionine substitution, 98–9 |
| typical performance situations, 789–90 | relativism of in Berlin wisdom paradigm, 836 |
| Ugandan implicit theories of intelligence, 629 | and sex differences in intelligence, 263 |
| unbiased processing of evidence, 800, 809 | Values facet, Openness/Intellect, 728 |
| unbiased samples, recognizing, 807 | variability. See also childhood intelligence |
| uncertainty, recognition and management of, 836 | of behavior in children, 145–6 |
| unconscious. See cognitive unconscious | of individual reaction times, 379–81 |
| unconscious representations, 444 | in intelligence, sex differences in, 255–6 |
| Unconscious Thought Theory (UTT), 453 | variability-as-information concept, 146 |
| understanding, emotional, 532, 533, 537, 538 | variable functions, genes of, 96 |
| undifferentiated approaches to intellectual disabilities, 165 | variance, method, 718 |
| unitary store models of memory, 398 | variation, in dynamic skill theory, 155 |
| United Kingdom | VBM (voxel-based morphometry), 357–8, 362 |
| Aberdeen Children of the 1950s study, 700–1 | verbal-educational) factor, 11 |
| British birth cohorts, 696–8 | vegetarians, in cognitive epidemiology, 608 |
| measurements of intelligence in, 634 | Venezuela, Project Intelligence in, 116–17 |
| Newcastle Thousand Families study, 702 | verbal ability, 742–3 |
| United Kingdom Health and Lifestyle Survey, | verbal complex span tasks, 401 |
| 604–6 | verbal intelligence, 712–13, 720, 721 |
| United States. See multicultural perspectives of intelligence | verbal intelligence tests, 29 |
| universality of emotional intelligence, 543–4 | Verbal IQ (VIQ), 31 |
| universally designed instruction, 202–3, 205 | verbal processor, minimal cognitive architecture theory, 74–5 |
| unrealistic optimism, 809 | verbal reasoning, 423 |
| untranslated region, defined, 95 | Verbal Scholastic Aptitude Test (VSAT), 396–7 |
| Upper Paleolithic period, 335–8 | verbal subtests, WISC, 632 |
| cognitive fluidity, connected modules, and cross-domain thinking, 336–7 | verification phase, cognitive model of creativity, 776 |
| explicit and implicit modes of thought, 337–8 | VI (vocabulary and information acquisition), BIDS, 661 |
| overview, 335–6 | Victoria Longitudinal Study (VLS), 180–1 |
| syntactic language and symbolic reasoning, 336 | Vietnam Experience Study, 690–3 |
| synthesizing accounts of, 338 | Vineland Social Maturity Scale, 519 |
| U.S. Army Alpha test, 8, 23 | VIQ (Verbal IQ), 31 |
| U.S. Army Beta test, 8 | vision, computer, 475 |
| UTT (Unconscious Thought Theory), 453 | visual array comparison task, 402 |
| Val158Met variant, 98 | visual-graphic skills, in reading, 155–6 |
| Val66Met substitution, 98–9 | visual interest test, 131–2 |
SUBJECT INDEX

visual IT tasks, 381–2
visualization, spatial, 256, 257
visual processing, extended Gf-Gc theory, 559
visual-spatial thinking (Gv), 47, 48
visuospatial skills
sex differences in intelligence, 256–7, 262–3
in Williams syndrome, 199
VLS (Victoria Longitudinal Study), 180–1
vocabulary
in assessment of analytical intelligence, 508–9
and IQ gains, 648–9
vocabulary and information acquisition (VI), 26
Vocabulary subtest, Wechsler scales, 632
Vocabulary tests, 26, 450
voxel-based morphometry (VBM), 357–8, 362
VSAT (Verbal Scholastic Aptitude Test), 396–7
WAIS. See secular changes in intelligence:
Wechsler Adult Intelligence Scale
WAIS-III (Wechsler Adult Intelligence Scale–Third Edition), 287
WAIS-IV (Wechsler Adult Intelligence Scale–Fourth Edition), 34
WAIS-R (Wechsler Adult Intelligence Scale–Revised Edition), 35, 280
Wall Street Journal, 274
"wastebasket" parameter, 434
Watson, James, 203
weak methods of reasoning, 423
weaknesses, in theory of successful intelligence, 505
wealth, 672–3, 676. See also socioeconomic status
webs
constructive, 151, 154–5, 163–4
developmental, for nice and mean social interactions, 162, 163–5
semantic, 479
Wechsler Adult Intelligence Scale (WAIS). See also secular changes in intelligence
"don’t-hold" tests, 174
g (general factor), validity of, 12
gray matter, assessment of, 357
and IQ gains, 648, 649, 651, 652, 655, 657
Wechsler Intelligence Scale for Children-Third Edition (WISC-III), 286–7, 669
Wechsler Intelligence Scale for Children-Fourth Edition (WISC-IV), 34
Wechsler Intelligence Scale for Children-Fourth Edition Integrated (WISC-IV Integrated), 35
Wechsler Intelligence Scale for Children-Revised (WISC-R), 32, 656, 669
Wechsler scales. See also specific tests by name
American Indian cognitive abilities, 286
changes in, 33
Hispanic samples, 287
and IQ gains, 648
testing changes produced by, 30–2
worldwide popularity of, 632
weight gain, in cognitive epidemiology, 697
wellbeing, societal measures of
direction of causality, 672–4
overview, 671–2
Western (analytic) mode of wisdom, 832
Western scrub jays
episodic memory, 315
planning by, 314
West of Scotland Twenty-07 Study, 693–4
White Americans, test scores of, 283–5. See also
multicultural perspectives of
intelligence
Whitehall II Study, 698–9
white matter
and basic processes of intelligence, 387–8
effect of experience on, 111
genetic/imaging studies, 362–3
MRI studies, 357
sex differences in intelligence, 360
whole-genome scans, 94–6
WICS (wisdom, intelligence, and creativity synthesized) model, 69
wide-span memory, 61
Wiesel, Elie, 582
Williams syndrome, 198–200, 204
window task, in CISYC, 638
win-stay-lose-shift strategy, 312
WISC. See Wechsler Intelligence Scale for
Children
WISC-III (Wechsler Intelligence Scale for
Children–Third Edition), 286–7, 669
WISC-IV (Wechsler Intelligence Scale for
Children–Fourth Edition), 34
WISC-IV Integrated (Wechsler Intelligence Scale for
Children–Fourth Edition Integrated), 35
WISC-R (Wechsler Intelligence Scale for
Children–Revised), 32, 656, 669
wisdom, 827–42
   explicit theories and assessment of, 832–42
   distinction between general and personal wisdom, 833–5
   general wisdom, psychological conceptions of, 835–8
   overview, 832–3
   personal wisdom, psychological conceptions of, 838–42
   future directions, 842
   historical background, 827–8
   implicit (subjective) theories of, 829–32
   overview, 505, 827
   psychological approaches to definition of, 835–9

women, talent development in, 240. See also sex differences in intelligence

Woodcock-Johnson III Test of Cognitive Abilities (WJ III), 10, 33, 34
   word attack tests, 743
   word problems, mathematical, 744
   word recognition tests, 743
   word span task, 396–7

working memory (WM), 394–414. See also working memory capacity
   achievement and intelligence, 740–1
   age-related changes in, 180
   breaching .30 barrier, 16
   in CHC theory, 48
   contemporary view of, 397–400
   and ERPs, 91
   expert, 852–3
   historical perspective on, 395–7
   and implicit learning, 452
   and inspection time, 584
   malleability of, 113
   mental models theory, 421
   mental rules theory, 421
   multi-mechanism view, 410–11
   and Openness/Intellect personality domain, 722–3
   overview, 16, 394–5
   and processing speed, 372, 374–5
   and reaction time, 380–1
   and reasoning, 415–7
   spatial, and sex differences in intelligence, 255
   training to boost intelligence, 411–13

working memory capacity (WMC)
   construct representation of reasoning tests, 435
   contemporary view of, 397–400
   defined, 395
   empirical evidence linking Gf and, 403–7
   and fluid intelligence, 395

and information processing, 869–70
   measurement of, 399–403
   complex span tasks, 399–401
   coordination and transformation tasks, 402–3
   n-back tasks, 403
   overview, 399
   scope of attention tasks, 402
   simple span tasks, 401–2
   multi-mechanism view, 410–11
   reading span task, 396–7
   and reasoning, 425–7
   theoretical accounts of link between Gf and, 408–10
   active maintenance and controlled retrieval, 409–10
   binding limits, 409
   executive attention, 408
   overview, 408
   scope and control of attention, 408–9
   training WM to boost intelligence, 411–13
   working memory tasks, 16
   working styles, 491, 790
   work performance, and cultural intelligence, 591–2
   worldviews, evolution of, 341
   worldwide perspective, intelligence in, 623–42. See also multicultural perspectives of intelligence; society and intelligence
   implicit theories of intelligence, 624–7
   Africa, 629–30
   China, 630
   other Asian peoples, 627–9
   overview, 624–5
   South America and East Europe, 630
   measurements of intelligence, 630–40
   Africa, 636–7
   Asia, 637–40
   Europe, 635–5
   overview, 630–3
   overview, 623–4
   worst performance (WP) analyses, 380
   writing, and sex differences in intelligence, 257
   writing prodigy, study of, 213–14
   written stories, in test of creative abilities, 516

XBA (Cross-Battery Assessment), 33, 46–7, 281–2

Yup’ik Alaskan communities, 553

Zahlen-Verbindungs Test (ZVT), 615
   Zambia
      implicit theories of intelligence, 629
      intelligence testing, 617
   zero-sum games, 807
   Zimbabwe, intelligence testing in, 636–7
