The Primacy of Politics

Social Democracy and the Making of Europe’s Twentieth Century

Political history in the advanced industrial world has indeed ended, argues this pioneering study, but the winner has been social democracy – an ideology and political movement that has been as influential as it has been misunderstood. Sheri Berman looks at the history of social democracy from its origins in the late nineteenth century to today and shows how it beat out competitors such as classical liberalism, orthodox Marxism, and its cousins, fascism and National Socialism, by solving the central challenge of modern politics: reconciling the competing needs of capitalism and democracy. Bursting onto the scene in the interwar years, the social democratic model spread across Europe after the Second World War and formed the basis of the postwar settlement commonly but misleadingly labeled “embedded liberalism.” This is a study of European social democracy that rewrites the intellectual and political history of the modern era while putting contemporary debates about globalization in their proper intellectual and historical context.

Sheri Berman is an associate professor of political science at Barnard College, Columbia University. She was previously an assistant professor of politics at Princeton University. Berman is the author of The Democratic Moment (1987). She has written articles for top political science journals including Perspectives on Politics, World Politics, and Comparative Politics, as well as publications such as Foreign Affairs, Dissent, and World Policy Journal.

Acknowledgments

This book has been a long time in the making and I owe many debts to many people who made getting through this ordeal easier. First, I want to thank those who provided comments on all or part of the manuscript or who helped move the book along in other ways: Mark Blyth, Consuelo Cruz, Peter Hall, Harold James, Kate McNamara, Bo Rothstein, Anna Seleny, Kathryn Stoner-Weiss, Michael Walzer, and editors at *Dissent*, the editors of *Social Philosophy & Policy*, and the anonymous reviewers at Cambridge University Press. Parts of the argument from this book were also presented to audiences at Georgetown University, Harvard University, McGill University, Princeton University, the Remarque Institute and the Center for European Studies at New York University (NYU), the University of Chicago, and the University of Toronto. I want to thank all those who came to those talks and asked hard-hitting and insightful questions. They pushed me to think more clearly about what precisely I was trying to say and do with this book. Second, I want to thank the many people who helped me prepare the book for publication: Lew Bateman and Andy Saff at Cambridge University Press and, more generally, Johannes Beber Bernd Hilmar, Dan Kurtz-Phelan, Arissa Sidoti, and especially Gideon Rose, whose editing is as slow as it is miraculous. Third, I want to thank those organizations that provided the funding and other support that helped make this book possible: Göteborg University, the Institute for Advanced Study, Princeton University, and the Remarque Institute and the Institute for European Studies at NYU. And in the non-academic realm, I want to thank my family – Gideon, Isaac, Lucy, and the cats – for putting up with the obsessions and endless arguments. Finally, although I can’t really thank him, I would like to acknowledge my debt to Karl Polanyi. It was his *The Great Transformation* that got me thinking about this book’s issues many years ago.
