Advances in Economics and Econometrics

This is the second of three volumes containing edited versions of papers and commentaries presented at invited symposium sessions of the Eighth World Congress of the Econometric Society, held in Seattle, WA, in August 2000. The papers summarize and interpret recent key developments, and they discuss future directions for a wide range of topics in economics and econometrics. The papers cover both theory and applications. Written by leading specialists in their fields, these volumes provide a unique survey of progress in the discipline.

Mathias Dewatripont is Professor of Economics at the Université Libre de Bruxelles where he was the founding Director of the European Centre for Advanced Research in Economics (ECARE). Since 1998, he has been Research Director of the London-based CEPR (Centre for Economic Policy Research) network. In 1998, he received the Francqui Prize, awarded each year to a Belgian scientist below the age of 50.

Lars Peter Hansen is Homer J. Livingston Distinguished Service Professor of Economics at the University of Chicago. He was a co-winner of the Frisch Prize Medal in 1984. He is also a member of the National Academy of Sciences.

Stephen J. Turnovsky is Castor Professor of Economics at the University of Washington and recently served as an Editor of the *Journal of Economic Dynamics and Control*. He is an Associate Editor and is on the Editorial Board of four other journals in economic theory and international economics.

Professors Dewatripont, Hansen, and Turnovsky are Fellows of the Econometric Society and were Program Co-Chairs of the Eighth World Congress of the Econometric Society, held in Seattle, WA, in August 2000.

Econometric Society Monographs No. 36

Editors:

Andrew Chester, University College London
 Matthew Jackson, California Institute of Technology

The Econometric Society is an international society for the advancement of economic theory in relation to statistics and mathematics. The Econometric Society Monograph Series is designed to promote the publication of original research contributions of high quality in mathematical economics and theoretical and applied econometrics.

Other titles in the series:

- G. S. Maddala *Limited dependent and qualitative variables in econometrics*, 0 521 33825 5
 Gerard Debreu *Mathematical economics: Twenty papers of Gerard Debreu*, 0 521 33561 2
 Jean-Michel Grandmont *Money and value: A reconsideration of classical and neoclassical monetary economics*, 0 521 31364 3
 Franklin M. Fisher *Disequilibrium foundations of equilibrium economics*, 0 521 37856 7
 Andreu Mas-Colell *The theory of general economic equilibrium: A differentiable approach*, 0 521 26514 2, 0 521 38870 8

Preface

These volumes contain the papers of the invited symposium sessions of the Eighth World Congress of the Econometric Society. The meetings were held at the University of Washington, Seattle, in August 2000; we served as Program Co-Chairs. Volume 1 also contains an invited address, the “Seattle Lecture,” given by Eric Maskin. This address was in addition to other named lectures that are typically published in *Econometrica*. Symposium sessions had discussants, and about half of these wrote up their comments for publication. These remarks are included in the book after the session papers they comment on.

The book chapters explore and interpret recent developments in a variety of areas in economics and econometrics. Although we chose topics and authors to represent the broad interests of members of the Econometric Society, the selected areas were not meant to be exhaustive. We deliberately included some new active areas of research not covered in recent Congresses. For many chapters, we encouraged collaboration among experts in an area. Moreover, some sessions were designed to span the econometrics–theory separation that is sometimes evident in the Econometric Society. We followed the lead of our immediate predecessors, David Kreps and Ken Wallis, by including all of the contributions in a single book edited by the three of us. Because of the number of contributions, we have divided the book into three volumes; the topics are grouped in a manner that seemed appropriate to us.

We believe that the Eighth World Congress of the Econometric Society was very successful, and we hope that these books serve as suitable mementos of that event. We are grateful to the members of our Program Committee for their dedication and advice, and to Scott Parris at Cambridge University Press for his guidance and support during the preparation of these volumes. We also acknowledge support from the officers of the Society – Presidents Robert Lucas, Jean Tirole, Robert Wilson, Elhanan Helpman, and Avinash Dixit – the Treasurer, Robert Gordon, and Secretary, Julie Gordon. Finally, we express our gratitude to the Co-Chairs of the Local Organizing Committee, Jacques Lawarree and Fahad Khalil, for a smoothly run operation.
