Index

Ablowitz–Ladik scattering problem, 48
AKNS method, 5
AKNS spectral problem, 19

Bose–Einstein condensate, 16
Bound state, 41, 63, 86, 117, 192;
  see also Discrete eigenvalue

Collision induced timing jitter, 13
Conserved quantities, 6, 17, 19, 42, 47, 87, 91, 128, 129, 201, 203
Coupled NLS equation, 6;
  see also VNLS equation

Davey–Stewartson equation, 5
Davydov's alpha-helix solitons, 229
Diffraction-managed solitons, 16
Diffraction management, 16
Discrete eigenvalue, 36, 64, 66, 70, 73, 78, 80, 102, 103, 105, 111, 114, 159, 161, 171, 176, 177, 179, 182, 191, 194, 232, 240;
  see also Bound state
Discrete NLS equation (DNLS), 8, 15
Discrete Schrödinger equation (operator), 208
Dispersion, 10–13
Dispersion managed (DM) solitons, 13, 16
Dispersion management, 13

Eigenfunction, 4, 17, 20
  for IDMNLS, 133, 144, 146, 153, 159
    asymptotics in z, 139
    existence and analyticity, 136, 137, 138
    inverse problem, 160, 161, 169

Fermi–Pasta–Ulam problem, 1
Four wave mixing (FWM), 13
Fredholm integral equations, 37, 81, 112, 183

Gel'fand–Levitan–Marchenko (GLM) equation
  for IDMNLS, 178, 179, 183
  for IDNLS, 47, 76, 77, 81
  for MNLS, 90, 108, 109, 112
  for NLS, 18, 34, 37
  for the discrete Schrödinger equation, 225
Gordon–Haus jitter, 13
Green's function, 21, 50, 51, 52, 55, 65, 94, 134, 135, 211
Group velocity dispersion (GVD), 10

Hamiltonian structure, 42, 43, 45, 87, 88, 91, 128, 129

Integrable discrete NLS (IDVNLS) equation, 8, 132, 190
Integrable discrete NLS equation (IDNLS), 5, 8, 16, 46
Inverse scattering transform (IST), 2–5, 9, 17, 43, 76
  for IDMNLS, 132, 133–185
  for IDNLS, 46, 48–83
  for MNLS, 90, 91–113
  for NLS, 6, 18, 19–39
  for the discrete Schrödinger equation, 209
  for VNLS, 90

Jost function
  for IDNLS, 49, 50, 62, 63, 72, 81
    asymptotics in z, 57, 59
    existence and analyticity, 53, 55–57
    symmetries, 65
  for MNLS, 92–95, 105, 112
    asymptotics in k, 97
    existence and analyticity, 95
  for NLS, 20–22, 31, 37
    asymptotics in k, 25
    existence and analyticity, 22
    symmetries, 28

More information

Kadomtsev–Petviashvili equation (KP), 5
Kerr effect, 10, 14
Korteweg–de Vries equation (KdV), 1

Lax pair, 3, 8, 91, 230

Matrix nonlinear Schrödinger equation (MNLS), 7, 16
Maxwell's equations, 12, 14

Neumann series, 22, 23, 25, 53–56, 95, 96, 136–138, 205, 213, 214
Nonlinear ladder network, 5, 17, 209, 210, 217, 224, 226–228, 240–242
Nonlinear optics, 9, 16
Norming constant
  for IDMNLS, 146, 148, 166, 172, 176, 177, 185, 191, 192, 198
    symmetries, 149, 153, 154, 156, 158
    time-dependence, 184
  for IDNLS, 63, 64, 65, 72, 75, 78, 83
    symmetries, 64, 65, 66, 67
    time-dependence, 82
  for MNLS, 101, 102, 105, 114, 117
    symmetries, 104
    time-dependence, 113
  for NLS, 27, 28, 31
    time-dependence, 38
  for the discrete Schrödinger equation, 220–222, 225, 227, 228

Optical amplifiers, 10, 11
Optical fiber, 6, 7, 9, 13, 14
Optical formats ("NRZ, RZ"), 11, 12

Parseval's identity, 37, 80, 111, 182
Poisson brackets, 43–45, 89, 129
Polarization shift, 3, 17, 91, 125, 196, 201
Polarization vector, 91, 114, 115, 117, 120, 121, 190, 191, 194
Projection operator, 32, 71, 106, 162, 169, 170, 221

Quasi-linear modes, 13

Reflection coefficient
  for IDMNLS, 146, 149, 159
    symmetries, 151, 153, 154, 156–158, 171
    time-dependence, 184
  for IDNLS, 63
    symmetries, 66
    time-dependence, 82
  for MNLS, 101, 105
    symmetries, 102
    time-dependence, 113
  for NLS, 27, 31
    time-dependence, 38
  for the discrete Schrödinger equation, 216, 221, 227, 228
Reflectionless potential
  discrete Schrödinger equation, 221, 223, 224
  IDMNLS, 172, 173
  IDNLS, 74, 83
  MNLS, 169
  NLS, 40
Riemann–Hilbert problem, 4, 17, 19, 31, 47, 69, 70, 90, 104, 105, 146, 160, 161, 220

Scattering data, 3, 4, 17, 18
  for IDMNLS, 142, 146, 164
    characterization equations, 144
    inverse problem, 161, 169
    reflctionless case, 172
    symmetries, 148, 154, 157, 160
    time-dependence, 183, 184
  for IDNLS, 47, 59, 61, 65, 83
    inverse problem, 68, 71
    reflectionless case, 74, 83
    symmetries, 65, 75, 76
    time-dependence, 81
  for MNLS, 97, 102
    characterization equations, 101, 104
    inverse problem, 105, 106
    reflectionless case, 113, 116
    symmetries, 103
  for NLS, 25, 39
    characterization equation, 26
    inverse problem, 31
    reflectionless case, 40
    symmetries, 29
    time-dependence, 37
  for the discrete Schrödinger equation, 215, 216, 217, 221, 226, 228
Self-dual Yang–Mills equations (SDYM), 2
Solitary wave, 1, 2, 8, 16
Soliton, 1, 2, 3, 6, 8, 11, 12, 38
  IDMNLS, 185, 186
    composite, 177, 185
    fundamental, 177, 185, 190, 191
  IDNLS, 47, 83, 84, 85
  IDNLS with a potential term, 240
  NLS, 39
  NLS with a potential term, 232
  nonlinear ladder network, 228
  Toda lattice, 227
  VNLS, 91, 113, 114
Soliton phase shift, 3, 10, 19, 42, 47, 87, 91
Spectral (scattering) parameter, 4, 33, 63, 64, 146, 220, 229, 230, 231, 234, 235, 237, 241
Strong coupling, 239, 240
Symmetry reduction
  for IDMNLS, 164, 165
  for IDNLS, 64, 65
