 numerical probability (Keynes) 72, 272
 null hypothesis 46, 51
- Ockham's razor 91, 99–100, 102, 105–6, 111, 117n3, 270
 Oedipus effect 14, 15, 222, 230, 273
 Ohlin–Samuelson programme 265
 operationalism 80, 82, 137, 139

Subject Index

311

- ordinary least squares analysis 120
orthogonalization 152, 167
- parametric identification 149, 167,
170–3, 175
PC-GIVE 158
permanent income consumption
function 153, 159, 221, 265
personalist probability theory 22,
81–7, 93
place selection 39
pluralism 245
positivism vii–viii, 165, 193, 213–61,
264, 273–4
posterior odds approach to
testing 256–7
pragmatism 4–5; *see also* Peirce
prediction 70, 102, 115, 122, 163,
177n6, 200, 208, 219, 241–4,
260n15; Austrian critique 244–6
principle of insufficient reason: *see*
indifference theory
principle of limited independent
variety (Keynes) 26, 69–72, 76–7,
96n8, 101, 111, 131
principle of parsimony 108
principle of sufficient reason (Leibniz)
225
principle of uniformity of nature
6–7, 18, 96n8, 131, 225, 234
principle of universal causation
(Kant) 6, 224, 225, 227–8, 229, 231,
233
principle of the impossibility of a
gambling system: *see* randomness
condition; Dutch Book argument
prior probabilities 23, 58, 61, 65n8,
79, 87–93, 94, 102, 110–11, 261n,
267, 272–3
profligate estimation: *see* Vector
Autoregressive modelling
propensity theory (Popper) 21, 59–60,
62
Pyrrhonism 4, 5, 223
- ‘Quetelismus’ 122–3
‘quincunx’ (Galton’s Board) 122, 124,
230
- random variables 31–2
random walk model 159, 178n12
randomization (Fisher) 47–9, 65n10,
98, 129–30, 132, 145, 154, 159, 168,
233
randomness 31, 39; condition
35–6, 39, 42, 73, 83, 121, 140n7,
266; role of place selection 39
realism 156, 172, 176, 215–17
reductionism 98–100, 143, 153–6,
176; diagnostic testing 159–65;
Fisher 41; general-to-specific
approach (Hendry) 156–77, 178n9
reflexivity: *see* Oedipus effect
regression 72, 122–30, 237
relativity, Einstein’s theory 10
Rotterdam system 188, 190, 197–8
rule of succession (Laplace) 3, 25–6,
27, 37, 78–80, 84
- sample space 28–9, 78
sampling theory 119–22, 130–5,
140n11, 162, 163, 173
scandal of philosophy: *see* induction
scepticism; *see* Humean scepticism
second law of large numbers (von
Mises) 37, 266
selection bias 139
sensitivity analysis 54, 98–9, 143,
148, 165–70, 176–7, 249
Septuagint 75
serial correlation 127, 133; *see also*
spurious correlation
significance levels 5, 51, 54, 94, 159,
162, 195, 234
significance testing 43, 46–7, 48, 55,
96n, 98–9, 135, 154, 162–3, 173–4,
176–7, 211–12, 249–50, 268
simple regression analysis 109–14,
124

312 **Subject Index**

- simplicity postulate (Jeffreys–Wrinch) 26, 103–7, 109–10, 177, 233–4, 236, 239, 241, 253, 264
- simplicity theory 11, 98–118, 258
- simplification search 209–10; and testing 249
- simultaneous equations 185, 236; bias 147; *see also* Cowles methodology
- Slutsky matrix of compensated price responses 181, 185
- small world; *see* large world
- Solomonoff-Levin distribution 106, 114, 118n9
- specification uncertainty 98–9, 142–3, 152, 166–8, 173, 175, 240, 244, 263, 265–6, 271, 274–5
- spurious correlation 127–8, 232, 237, 261n21
- St Petersburg paradox (Bernoulli) 84
- stability of mass phenomena 7
- stability of statistical frequency: *see* law of large numbers
- statistical inference: *see* hypothesis testing; causal inference
- straight rule 26, 37, 79
- structural econometrics 98, 113, 143, 146, 153, 171, 240
- stylized facts 153, 171, 221
- sufficiency 43, 45, 154
- symmetric testing 253–5
- target population 121
- ‘tea-cup lady’ test 48
- test procedure and operationalism 80
- testing 144–6, 159–61, 175, 246–9; and constants 221; methods of 249–58, 268; importance testing 167, 209, 250; *see also* significance testing; methodological falsificationism
- theory, as part of research programme 16, 18, 175
- truth, and econometrics viii; and inference 156, 269–74
- Turing machine 106, 117n8, 272
- type I and II errors 51, 178n13, 251
- unbiasedness 43–4
- uniform prior probability distribution 88
- uniformly most powerful (UMP) tests 51, 53, 54, 250
- universal priors 92–3, 108–9, 115
- utility theory 84, 89
- validity testing 158–65, 167, 248–9
- Veblen (snob) goods 189
- Vector Autoregressive (VAR) modelling 98–9, 142, 149–53, 157–8, 171, 176, 177, 208; and consumption analysis 153; and inference 152–3; innovation accounting 151–2
- verifiability principle 8–9, 77, 174
- verification 174, 200, 234
- verisimilitude, measurement of 11, 17, 60–2, 165
- Vietnam draft lottery 139
- Wald test 158, 178n9
- weak consistency 43
- Wiener Kreis* 8, 13, 19n5, 77, 214, 278–9
- zero probability of laws in infinite domain 69
